### **Delivering Authentic Arts Education with Student Resource Access 12 Months** Judith

Dinham, 2016-08-23 This practical text helps student teachers develop their confidence, understandings and skills so that they can effectively and authentically teach arts in primary and middle school classrooms. *Delivering Authentic Arts Education* outlines the true nature of arts education and its importance in the curriculum, emphasising the arts as forms of creative activity, meaning-making and expression in a cultural context. Chapters discuss how to recognise and build on your existing artistic abilities and pedagogical skills, how to encourage children's creativity, how to lead arts appreciation experiences, and the general principles of planning and assessment. They then examine the five arts areas: dance, drama, media arts, music and visual arts. The final part of the text contains sample learning activities and resources that demonstrate how to plan an effective lesson within a unit of inquiry. Practical tips, classroom "snapshots", starter ideas and suggestions for online resources show you the links between theory and practice so you can develop arts education experiences that are purposeful, stimulating and engaging for everyone--Publisher's summary.

This Missing Manual gives you all the tools, techniques, and expert advice you need. Plan your site. Create web pages by learning the basics of HTML and HTML5. Control page design with CSS. Format text, images, links, tables, and other elements. Attract visitors. Ensure that people can find your site through popular search engines. Build a community. Add forums, fresh content, and a feedback form to encourage repeat visits. Get smart. Use free tools to identify your site's strengths and weaknesses. Create your own blog. **Podcasting Now!** Andrew J. Dagys, 2006 Podcasting is a combination of MP3 files, Internet radio, RSS (Really Simple Syndication), and iPods. MP3 files are typically individual tracks from music or comedy CDs, Internet radio is done with streaming audio in real time, and RSS lets your computer automatically keep track of new information posted on websites. Podcasting combines these technologies to create radio/music/talk programs that you can download and play on your computer or on an iPod or other portable player. Not only can you listen to podcasts, you can create and distribute your own podcasts without a lot of difficulty. Many of the techniques already used to publicize a website or a blog can be used to promote a podcast. In fact, one popular use for podcasting is as an audio blog. Podcasters can also include images and other data, so podcasting can be used for business as well as entertainment. It's possible to build training curriculum, product briefings, marketing presentations, and even new employee orientations with podcasts: the potential for this field is barely scratched.
