Whitlock,2006 The Army needs to implement Army Force Generation (ARFORGEN) in addition to its ongoing transformation and move to a more modular force. This paper describes ARFORGEN, discusses some of its critical assumptions related to reserve component (RC) units, and explains what changes are required at the Department of Defense (DoD), Department of the Army (DA), and the individual RC levels so that the Army can integrate its RC units fully into ARFORGEN. Stretched Thin Lynn E. Davis,J. Michael Polich,William M. Hix,Michael D. Greenberg,Stephen Brady,2005-07-20 The nation has difficult trade-offs in facing calls on Army forces for operations in Iraq and Afghanistan. This report describes the effects of large deployments on the Army's ability to provide forces for other contingencies, to ensure that soldiers are trained, and to continue to recruit and retain soldiers. The authors found that Army plans for transformation and employing reserves at reasonable rates still fall short. Steps to improve the situation all involve high risks or costs. Unless requirements recede, the nation faces an Army stretched thin, with no quick fix or easy solution.
