Beyond Imported Magic Eden Medina,Ivan Da Costa Marques,Christina Holmes,2014-08-15 Studies challenging the idea that technology and science flow only from global North to South. The essays in this volume study the creation, adaptation, and use of science and technology in Latin America. They challenge the view that scientific ideas and technology travel unchanged from the global North to the global South—the view of technology as “imported magic.” They describe not only alternate pathways for innovation, invention, and discovery but also how ideas and technologies circulate in Latin American contexts and transnationally. The contributors' explorations of these issues, and their examination of specific Latin American experiences with science and technology, offer a broader, more nuanced understanding of how science, technology, politics, and power interact in the past and present. The essays in this book use methods from history and the social sciences to investigate forms of local creation and use of technologies; the circulation of ideas, people, and artifacts in local and global networks; and hybrid technologies and forms of knowledge production. They address such topics as the work of female forensic geneticists in Colombia; the pioneering Argentinean use of fingerprinting technology in the late nineteenth century; the design, use, and meaning of the XO Laptops created and distributed by the One Laptop per Child Program; and the development of nuclear energy in Argentina, Mexico, and Chile. Superforecasting Philip E. Tetlock, Dan Gardner, 2015-09-29
NEW YORK TIMES BESTSELLER • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE ECONOMIST “The most important book on decision making since Daniel Kahneman's *Thinking, Fast and Slow*.”—Jason Zweig, *The Wall Street Journal* Everyone would benefit from seeing further into the future, whether buying stocks, crafting policy, launching a new product, or simply planning the week's meals. Unfortunately, people tend to be terrible forecasters. As Wharton professor Philip Tetlock showed in a landmark 2005 study, even experts' predictions are only slightly better than chance. However, an important and underreported conclusion of that study was that some experts do have real foresight, and Tetlock has spent the past decade trying to figure out why. What makes some people so good? And can this talent be taught? In *Superforecasting*, Tetlock and coauthor Dan Gardner offer a masterwork on prediction, drawing on decades of research and the results of a massive, government-funded forecasting tournament. The Good Judgment Project involves tens of thousands of ordinary people—including a Brooklyn filmmaker, a retired pipe installer, and a former ballroom dancer—who set out to forecast global events. Some of the volunteers have turned out to be astonishingly good. They've beaten other benchmarks, competitors, and prediction markets. They've even beaten the collective judgment of intelligence analysts with access to classified information. They are superforecasters. In this groundbreaking and accessible book, Tetlock and Gardner show us how we can learn from this elite group. Weaving together

stories of forecasting successes (the raid on Osama bin Laden's compound) and failures (the Bay of Pigs) and interviews with a range of high-level decision makers, from David Petraeus to Robert Rubin, they show that good forecasting doesn't require powerful computers or arcane methods. It involves gathering evidence from a variety of sources, thinking probabilistically, working in teams, keeping score, and being willing to admit error and change course. Superforecasting offers the first demonstrably effective way to improve our ability to predict the future—whether in business, finance, politics, international affairs, or daily life—and is destined to become a modern classic.

Crossing the Rubicon Michael C. Ruppert, 2004-09-15 The acclaimed investigative reporter and author of *Confronting Collapse* examines the global forces that led to 9/11 in this provocative exposé. The attacks of September 11, 2001 were accomplished through an amazing orchestration of logistics and personnel. *Crossing the Rubicon* examines how such a conspiracy was possible through an interdisciplinary analysis of petroleum, geopolitics, narco-traffic, intelligence and militarism—without which 9/11 cannot be understood. In reality, 9/11 and the resulting War on Terror are parts of a massive authoritarian response to an emerging economic crisis of unprecedented scale. Peak Oil—the beginning of the end for our industrial civilization—is driving the elites of American power to implement unthinkably draconian measures of repression, warfare and population control. *Crossing the Rubicon* is more than a story of corruption and greed. It is a map of the perilous terrain through which we are all now making our way.

The Craft of Information Visualization Benjamin B. Bederson, Ben Shneiderman, 2003-05-22 Since the beginning of the computer age, researchers from many disciplines have sought to facilitate people's use of computers and to provide ways for scientists to make sense of the immense quantities of data coming out of them. One gainful result of these efforts has been the field

of information visualization, whose technology is increasingly applied in scientific research, digital libraries, data mining, financial data analysis, market studies, manufacturing production control, and data discovery. This book collects 38 of the key papers on information visualization from a leading and prominent research lab, the University of Maryland's Human-Computer Interaction Lab (HCIL). Celebrating HCIL's 20th anniversary, this book presents a coherent body of work from a respected community that has had many success stories with its research and commercial spin-offs. Each chapter contains an introduction specifically written for this volume by two leading HCI researchers, to describe the connections among those papers and reveal HCIL's individual approach to developing innovations. *Presents key ideas, novel interfaces, and major applications of information visualization tools, embedded in inspirational prototypes. *Techniques can be widely applied in scientific research, digital libraries, data mining, financial data analysis, business market studies, manufacturing production control, drug discovery, and genomic studies. *Provides an insider view to the scientific process and evolution of innovation, as told by the researchers themselves. *This work comes from the prominent and high profile University of Maryland's Human Computer Interaction Lab

A Walk in the Park, With Monsters D. Roland

Hess,2019-02-07 I'm a nerd. A nerd for magic. But now I'm buff :P When the Praecants have decided that you're working for them or else, you don't have a lot of choice in the matter. It could be worse. I got beaten into way better shape, learned a lot about tracking and killing magical creatures, and finally made a genuine friend who shares my interest in magical technology. Of course, Babd is still running around spreading her own kind of adorable chaos. All of this stuff -- the other worlds, the proximity to magic, maybe even Babd herself -- is starting to get inside my head. And what's with all the magical creatures that have started popping up? I'm still a nerd at heart, but things are changing... Follow Lincoln, Babd, Fox, Gwen, and some new friends as they try to secure a summit of the world's most powerful Praecants, in Pittsburgh of course. None of them trust each other, so holding it in a place where magic barely works is the only way to get them all in the same room. Will Lincoln stop being so nerdy? Will Fox find a sentient holster and settle down? Will Babd ever eat her kibble?! Download it now! Warnings: language and violence Q&A with the Author LFBd had a strong set of themes. What are the themes for A Walk In The Park...? LFBd's over-riding theme was the cycle of behavior drives biology drives behavior, and I crafted a lot of the arcs to specifically show how that cycle can lead one in different directions, both good and bad. Walk takes on something a little bit -- but not entirely -- different, which is what happens when our own psychology and minds collide with and are influenced by those of others around us. And what if those around us aren't merely humans, but magic users, creatures from

different planes of existence, and even demigods? I guess the full theme is How we defend the Self against the influences the Other, and maybe we don't always want to. It's not nearly as succinct as LFBd, but it worked. This book has a lot more magical creatures. How did you come up with them? Well, there's a part of the book where Gwen is telling Lincoln that he's become a [monster] hunter, and she uses a very specific word instead of monster. I thought it would be fun to take creatures from that other well known mythology as the descriptive basis for the morphs in Walk. They aren't actually that, but it was certainly the inspiration. You'll have to get to that part of the book to see exactly what I'm talking about. Some parts of Walk touch on the Holocaust. That's a sensitive topic. How did you handle it? From the time I had the idea of how that was going to weave into the story, I wanted to make sure that it did so in a respectful manner. I specifically included some friends from the Jewish community with family ties to that awful point in history in the beta reading group, and asked for their frank feedback. I was prepared to cut or alter the manuscript if it hit them with any level of offense. I'm glad to say that it did not, so that part of the story stayed intact. How do you keep the longer-running action sequences clear and coherent? For the big set pieces I usually have a vague idea of how they should flow. To get the details, I drag out action figures and stuffed animals, and then play the sequence out physically. Things occur to you when you do it that way that I find hard to hold entirely in my head. It's like Oh, this person has no idea that other person is there -- how would that change their reaction? I feel like it lends physical grounding to the scenes, because they are physically grounded. It's solid in my head, and that comes through in the prose. I would still like to buy a Babd. Babd is still not for sale.
