Screen Distribution and the New King Kongs of the Online World Stuart Cunningham,Jon Silver,2013-07-19 Drawing on comparisons with historical shake-ups in the film industry, Screen Distribution Post-Hollywood offers a timely account of the changes brought about in global online distribution of film and television by major new players such as Google/YouTube, Apple, Amazon, Yahoo!, Facebook, Netflix and Hulu.

Online around the World Laura M. Steckman,Marilyn J. Andrews,2017-05-24 Covering more than 80 countries around the world, this book provides a compelling, contemporary snapshot of how people in other countries are using the Internet, social media, and mobile apps. How do people in other countries use the social media platform Facebook differently than Americans do? What topics are discussed on the largest online forum—one in Indonesia, with more than seven million registered users? Why does Mongolia rate in the top-ten countries worldwide for peak Internet speeds? Readers of *Online around the World: A Geographic Encyclopedia of the Internet, Social Media, and Mobile Apps* will discover the answers to these questions and learn about people's Internet and social media preferences on six continents—outside of the online community of users within the United States. The book begins with an overview of the Internet, social media platforms, and mobile apps that chronologically examines the development of technological innovations that have made the Internet what it is today. The country-specific entries that follow the overview provide demographic information and describe specific events influenced by

online communications, allowing readers to better appreciate the incredible power of online interactions across otherwise-unconnected individuals and the realities and peculiarities of how people communicate in today's fast-paced, globalized, and high-technology environment. This encyclopedia presents social media and the Internet in new light, identifying how the use of language and the specific application of human culture impacts emerging technologies and communications, dramatically affecting everything from politics to social activism, education, and censorship.

Since the publication of the fourth edition of *Administering the School Library Media Center* in 2004, many changes have altered the landscape of school library administration: the implementation of NCLB legislation and the revision of AASL standards, just to mention two. The book is divided into 14 chapters, each devoted to a major topic in school library media management. Regulating Speech in Cyberspace Emily B.

Laidlaw,2015-08-07 This book analyses the role of businesses in regulating and influencing the exercise of free speech on the internet.

Regulatory Models for the Online World Rolf H. Weber,2021-10-18 Global networks have become a major political, economic, and legal topic in discussions among the participants of the global community. Around the world, governments, legal scholars, and practitioners are in the process of developing theories in respect of the regulation of the online world. These attempts are usually based on a given national legal culture; this approach, however, underestimates the importance of an umbrella concept. The purpose of this study accordingly consists in the comparative discussion of basic regulatory models (traditional government regulation, international agreements, self-regulation, code-based-regulation) and in the evaluation of their merits related to different topics that play a role in the online world (market entry, access, infrastructure stability, intellectual property, privacy, bad content, etc.). An easy solution is obviously not possible; however, a detailed examination on a comparative legal basis can give some insights for future regulatory initiatives.
