Electronic Signatures for B2B Contracts Aashish Srivastava,2012-08-31 The last few centuries have seen paper-based documents and manuscript signatures dominate the way businesses enter into a contractual relationship with each other. With the advent of Internet, replacing paper-based contracts with B2B electronic contracts is a possibility. However, an appropriate technology and an enabling legislation are crucial for this change to happen. On the technology front this feature has the potential to enable business executives to sit in front of their computer and sign multi-million dollar deals by using their electronic signatures. On the legal front various pieces of legislation have been enacted and policies developed at both national and international levels to give legal recognition to such type of contracts. This book presents the findings of an empirical study on large public listed Australian companies that examined businesses' perception towards the use of electronic signatures in B2B contracts. Essentially, it identifies six key factors that create a disincentive to businesses to move from the practice of paper- based signatures to the new technology of electronic signatures. This book offers legal practitioners, academics and businesses insights into issues associated with the use of electronic signatures and suggests a number of measures to promote its usage in B2B contracts.

Review of Some Text to Speech Converters, Voice Changers, Video Editors, Animators, Speaking Avatar Makers and Live Streamers Dr. Hidaia Mahmood Alassouli,2020-04-03 As videos are so much important today, I believe that everyone must have some knowledge on creating and editing videos for of common tasks required by his personal or business use. This book has mainly an objective to evaluate some text to speech converters, voice changers, video editors, cartoon animators and video recording and live streaming programs. As I am Arabic, I gave special importance to look for the best tools that can convert Arabic text to voice with good quality because of the lack of these tools. And I also gave special importance to look for the best tools that can change the voice tune as a lot of people don't like to make videos with their voice for special reasons. Then I gave quick guide on how to use the two important video editors, VSDC Free Video Editor and Camtasia Studio. Then I gave quick guide on how to use two websites that enable people to create cartoon animation videos in a simple way, <https://www.animaker.com/> website and <https://www.powtoon.com> website. Then I gave quick guide on how to use one of the best animator programs, which is Reallusion Cartoon Animator 4. I explained also how it is possible to make face mockup through Cartoon Animator 4Motion Live 2D Plugin. Then I introduced Adobe Character Animator as alternative program to make face mockup. Finally I explained about one of the video recording and live streaming programs, which is OBS Studio. I mentioned briefly how to setup OBS studio to create livestream video on Youtube and Facebook. At the end, I showed how to use Voki website to create customizable speaking avatars This work is divided to the following sections. 1. Some tools to reshape the Arabic letters so they can be converted to voice in other tools. 2. Some tools to convert English text to speech TTS. 3. Some tools to convert Arabic text to speech TTS. 4. Evaluation of some voice changers 5. Creating video of audio file with list of images (slideshow) using VSDC Free Video Editor.: 6. Screen capture using VSDC Free Video Editor. 7. Video capture using VSDC Free Video Editor. 8. Using <https://www.animaker.com/> website to create simple cartoon animation video. 9. Using <https://www.powtoon.com> website to create animation video. 10. Using Camtasia Studio Video Editor 11. Using Camtasia Studio Recorder 12. Using Reallusion Cartoon Animator 4: 13. Making Face Mockup on Cartoon Animator 4 through Motion Live 2D Plugin 14. Introduction to Adobe Character Animator 15. Setting OBS Studio for live stream: 16. Technology and Knowledge Flow Guglielmo Trentin,2011-08-05 This book outlines how network technology can support, foster and enhance the Knowledge Management, Sharing and Development (KMSD) processes in professional environments through the activation of both formal and informal knowledge flows. Understanding how ICT can be made available to such flows in the knowledge society is a factor that cannot be disregarded and is confirmed by the increasing interest of companies in new forms of software-mediated social interaction. The latter factor is in relation both to the possibility of accelerating internal communication and problem solving processes, and/or in relation to dynamics of endogenous knowledge growth of human resources. The book will focus specifically on knowledge flow (KF) processes occurring within networked communities of professionals (NCP) and the associated virtual community environments (VCE) that foster horizontal dynamics in the management, sharing and development of fresh knowledge. Along this line a further key issue will concern the analysis and evaluation techniques of the impact of Network Technology use on both community KF and NCP performance. The proposal of a taxonomy of Network Technology uses to support formal and informal knowledge flows Analyses how Web 2.0 and Web 3.0 technology is deeply modifying the dynamics connected to KF and KM Discusses dynamics underlying horizontal KF sharing processes within NCP
