The Samson Heuristic Danny Rittman and Brian Downing,2014-01-28 While running tests on a popular microprocessor, gifted chip designer Ethan Alon makes a puzzling discovery: an undocumented section with unknown functions. Ethan and his friend Rina Hardin crack the encryption and discover a clandestine network monitoring defense systems around the world, but especially focused on the Middle East. With the help of military analyst Barrett Parker, they discover the program is the work of scientists from Project Flower—an actual Israeli-Iranian missile program from the 1970s. These scientists came to mistrust politicians and generals and designed a system to prevent or at least limit wars. Their program is astounding, but it has a flaw—the Samson Heuristic. The flaw becomes apparent when intelligence operations come undone and overtax the system. American, Iranian, and Israeli militaries are on high alert, and war seems imminent. Ethan and Rina race to fix the Samson Heuristic while in a Tel Aviv command center—under the noses of generals who know nothing of Samson. Meanwhile, Barrett and like-minded analysts build opposition to war from inside bureaus in Washington and Jerusalem. The future of the Middle East lies in the balance.

On Paradise Drive David Brooks,2004-06-02 The author of the acclaimed bestseller *Bobos in Paradise*, which hilariously described the upscale American culture, takes a witty look at how being American shapes us, and how America's suburban civilization will shape the world's future. Take a look at Americans in their natural habitat. You see suburban guys at Home Depot doing that special manly, waddling walk that American men do in the presence of large amounts of lumber; super-efficient ubermoms who chair school auctions, organize the PTA, and weigh less than their children; workaholic corporate types boarding airplanes while talking on their cell phones in a sort of panic because they know that when the door closes they have to turn their precious phone off and it will be like somebody stepped on their trachea. Looking at all this, you might come to the conclusion that we Americans are not the most profound people on earth. Indeed, there are millions around the world who regard us as the great bimbos of the globe: hardworking and fun, but also materialistic and spiritually shallow. They've got a point. As you drive through the sprawling suburbs or eat in the suburban chain restaurants (which if they merged would be called Chili's Olive Garden Hard Rock Outback Cantina), questions do occur. Are we really as shallow as we look? Is there anything that unites us across the divides of politics, race, class, and geography? What does it mean to be American? Well, mentality matters, and sometimes mentality is all that matters. As diverse as we are, as complacent as we sometimes seem, Americans are united by a common mentality, which we have inherited from our ancestors and pass on, sometimes unreflectingly, to our kids. We are united by future-mindedness. We see the present from the vantage point of the future. We are tantalized, at every second of every day, by the awareness of grand possibilities ahead of us, by the bounty we can realize just over the next ridge. This mentality leads us to work feverishly hard, move more than any other people on earth, switch jobs, switch religions. It makes us anxious and optimistic, manic and discombobulating. Even in the superficiality of modern suburban life, there is some deeper impulse still throbbing in the heart of average Americans. That impulse is the subject of this book.

Information Sources in Engineering Roderick A. Macleod,Jim Corlett,2012-04-17 The current, thoroughly revised and updated edition of this approved title, evaluates information sources in the field of technology. It provides the reader not only with information of primary and secondary sources, but also analyses the details of information from all the important technical fields, including environmental technology, biotechnology, aviation and defence, nanotechnology, industrial design, material science, security and health care in the workplace, as well as aspects of the fields of chemistry, electro technology and mechanical engineering. The sources of information presented also contain publications available in printed and electronic form, such as books, journals, electronic magazines, technical reports, dissertations, scientific reports, articles from conferences, meetings and symposiums, patents and patent information, technical standards, products, electronic full text services, abstract and indexing services, bibliographies, reviews, internet sources, reference works and publications of professional associations. *Information Sources in Engineering* is aimed at librarians and information scientists in technical fields as well as non-professional information specialists, who have to provide information about technical issues. Furthermore, this title is of great value to students and people with technical professions.

How to Write Technical Reports Lutz Hering,Heike Hering,2010-10-14 Technical Reports are usually written according to general standards, corporate - sign standards of the current university or company, logical rules and practical - periences. These rules are not known well enough among engineers. There are many books that give general advice in writing. This book is specialised in how to write Technical Reports and addresses not only engineers, but also natural sci- th tists, computer scientists, etc. It is based on the 6 edition published in 2008 by st Vieweg in German and is now published as 1 edition by Springer in English. Both authors of the German edition have long experience in educating en- neers at the University of Applied Sciences Hannover. They have held many l- tures where students had to write reports and took notes about all positive and negative examples that occurred in design reports, lab work reports, and in theses. Prof. Dr. Lutz Hering has worked for VOLKSWAGEN and DAIMLER and then changed to the University of Applied

Sciences Hannover where he worked from 1974 until 2000. He held lectures on Technical Drawing, Construction and Design, CAD and Materials Science. Dr. Heike Hering worked nine years as a Technical Writer and was responsible for many CAD manuals in German and English. She is now employed at TÜV NORD Akademie, where she is responsible for E-Learning projects, technical documentation and software training and supervises students who are writing their theses.
