Vij, 2016-05-24 Learn While You Play With These Fun, Creative Activities & Games From two experienced educators and moms, 100 Fun & Easy Learning Games for Kids prepares your children to thrive in school and life the fun way by using guided play at home to teach important learning topics—reading, writing, math, science, art, music and global studies. Turn off the TV and beat boredom blues with these clever activities that are quick and easy to set up with common household materials. The huge variety of activities means you can choose from high-energy group games full of laughter and delight, or quiet activities that kids can complete on their own. All activities highlight the skill they teach, and some are marked with a symbol whether they are good for on-the-go learning or if they incorporate movement for kids to get their wiggles out. In Zip-Line Letters, children learn letter sounds as the letters zoom across the room. In Parachute Subtraction, place foam balls in a parachute, then kids shake the parachute and practice subtraction as they count how many balls fall off. Kids will have so much fun, they won't even realize they're gaining important skills! The activities are easy to adapt for all ages and skill levels. 100 Fun & Easy Learning Games for Kids is the solution for parents—as well as teachers, caregivers or relatives—to help kids realize how fun learning can be and develop what they'll need to do well wherever life takes them.

*Brain Games for Your Child* Robert Fisher, 2011-09-01 Every child needs love and physical care, but also play that stimulates their thinking and helps boost their brain power. By playing with parents, grandparents and carers children can build their social and creative skills and get the mental stimulus that develops their brains. In *Brain Games for Your Child* Robert Fisher draws on his thirty years of research into children's thinking and learning to provide over 200 games to help children to build their thinking, number, language and social skills. From music and art games, treasure hunts and card games, word games and number battles there are games that can be played by all the family that will create bonds and build memories and help boost your child's brain power. Included are old favourites as well as new games, but what is common to all the games is interaction with other people, rather than with electronic screens, where communicating and playing with others provides the basis for developing the full range of a child's abilities. *Brain Games for Your Child* provides games to create a happy learning environment, encouraging educational skills through games that are fun. It provides a wealth of games to play with children of all abilities during the all-important first 10 years of life. This is an essential guide for raising a happier, brighter and more sociable child.
