**Concrete Semantics** Tobias Nipkow, Gerwin Klein, 2014-12-03 Part I of this book is a practical introduction to working with the Isabelle proof assistant. It teaches you how to write functional programs and inductive definitions and how to prove properties about them in Isabelle's structured proof language. Part II is an introduction to the semantics of imperative languages with an emphasis on applications like compilers and program analysers. The distinguishing feature is that all the mathematics has been formalised in Isabelle and much of it is executable. Part I focusses on the details of proofs in Isabelle; Part II can be read even without familiarity with Isabelle's proof language, all proofs are described in detail but informally. The book teaches the reader the art of precise logical reasoning and the practical use of a proof assistant as a surgical tool for formal proofs about computer science artefacts. In this sense it represents a formal approach to computer science, not just semantics. The Isabelle formalisation, including the proofs and accompanying slides, are freely available online, and the book is suitable for graduate students, advanced undergraduate students, and researchers in theoretical computer science and logic.

**The Dream Lover** Elizabeth Berg, 2016-03-22 NEW YORK TIMES BESTSELLER • NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY USA TODAY • Elizabeth Berg has written a lush historical novel based on the sensuous Parisian life of the nineteenth-century writer George Sand—which is perfect for readers of Nancy Horan and Elizabeth Gilbert. At the beginning of this

powerful novel, we meet Aurore Dupin as she is leaving her estranged husband, a loveless marriage, and her family's estate in the French countryside to start a new life in Paris. There, she gives herself a new name—George Sand—and pursues her dream of becoming a writer, embracing an unconventional and even scandalous lifestyle. Paris in the nineteenth century comes vividly alive, illuminated by the story of the loves, passions, and fierce struggles of a woman who defied the confines of society. Sand's many lovers and friends include Frédéric Chopin, Gustave Flaubert, Franz Liszt, Eugène Delacroix, Victor Hugo, Marie Dorval, and Alfred de Musset. As Sand welcomes fame and friendship, she fights to overcome heartbreak and prejudice, failure and loss. Though considered the most gifted genius of her time, she works to reconcile the pain of her childhood, of disturbing relationships with her mother and daughter, and of her intimacies with women and men. Will the life she longs for always be just out of reach—a dream? Brilliantly written in luminous prose, and with remarkable insights into the heart and mind of a literary force, *The Dream Lover* tells the unforgettable story of a courageous, irresistible woman. Praise for *The Dream Lover* “Exquisitely captivating . . . Sand’s story is so timely and modern in an era when gender and sexual roles are upended daily.”—USA Today “Fantastic . . . a provocative and dazzling portrait . . . Berg tells a terrific story, while simultaneously exploring sexuality, art, and the difficult personal choices women artists in particular made—then and now—in order to succeed. . . . The book, imagistic and perfectly paced, full of dialogue that clips along, is a reader’s dream.”—The Boston Globe “Absorbing . . . an armchair traveler’s delight . . . Berg rolls out the wonders of nineteenth-century Paris in cinematic bursts that capture its light, its street life, its people and sounds. . . . The result is an illuminating portrait of a magnificent woman whose story is enriched by the delicate brush strokes of Berg’s colorful imagination.”—Chicago Tribune “There is authority and confidence in the storytelling that

makes the pages fly.”—The New York Times “Berg weaves an enchanting novel about the real life of George Sand.”—Us Weekly “Lavishly described . . . Berg uses her own skill as a writer to graphically present the reader with a clear picture of a brilliant, yet flawed woman.”—Fredericksburg Free Lance-Star “[A] beautiful, imaginative re-creation . . . Berg’s years-long immersion in the writings of and about Sand has resulted in a remarkable channeling of Sand’s voice.”—Library Journal (starred review) “Berg offers vivid, sensual detail and a sensitive portrayal of the yearning and vulnerability behind Sand’s bold persona.”—Publishers Weekly “A thoroughly pleasant escape . . . [Sand is] intoxicating, beautiful, gifted, desirous, unconventional and heartbroken.”—Kirkus Reviews

**Foundations of Programming Languages** Kent D. Lee, 2015-01-19 This clearly written textbook introduces the reader to the three styles of programming, examining object-oriented/imperative, functional, and logic programming. The focus of the text moves from highly prescriptive languages to very descriptive languages, demonstrating the many and varied ways in which we can think about programming. Designed for interactive learning both inside and outside of the classroom, each programming paradigm is highlighted through the implementation of a non-trivial programming language, demonstrating when each language may be appropriate for a given problem. Features: includes review questions and solved practice exercises, with supplementary code and support files available from an associated website; provides the foundations for understanding how the syntax of a language is formally defined by a grammar; examines assembly language programming using CoCo; introduces C++, Standard ML, and Prolog; describes the development of a type inference system for the language Small.

Implementation and Application of Functional Languages Marco T. Morazán, Sven-Bodo Scholz, 2010-10-27 This book constitutes the thoroughly refereed post-proceedings of the 21st International Workshop on Implementation and Applications of Functional Languages, IFL 2000, held in South Orange, NJ, USA, in September 2009. The 13 revised full papers presented were carefully reviewed and were selected from numerous submissions. The IFL symposia bring together researchers and practitioners that are actively engaged in the implementation and the use of functional and function based programming languages. Every year IFL provides a venue for the presentation and discussion of new ideas and concepts, of work in progress, and of publication-ripe

results.

Applied Semantics Gilles Barthe, Peter Dybjer, Luis Pinto, João Saraiva, 2003-08-02 This book is based on material presented at the international summer school on Applied Semantics that took place in Caminha, Portugal, in September 2000. We aim to present some recent developments in programming language research, both in semantic theory and in implementation, in a series of graduate-level lectures. The school was sponsored by the ESPRIT Working Group 26142 on Applied Semantics (APPSEM), which operated between April 1998 and March 2002. The purpose of this working group was to bring together leading researchers, both in semantic theory and in implementation, with the specific aim of improving the communication between theoreticians and practitioners.

The activities of APPSEM were structured into nine interdisciplinary themes: A: Semantics for object-oriented programming B: Program structuring C: Integration of functional languages and proof assistants D: Verification methods E: Automatic program transformation F: Games, sequentiality, and abstract machines G: Types and type inference in programming H: Semantics-based optimization I: Domain theory and real number computation These themes were identified as promising for profitable interaction between semantic theory and practice, and were chosen to contribute to the following general topics: - description of existing programming language features; - design of new programming language features; - implementation and analysis of programming languages; - transformation and generation of programs; - verification of programs. The chapters in this volume give examples of recent developments covering a broad range of topics of interest to APPSEM.

**Twelve Years a Slave** Solomon Northup, 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his

freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

The book will be essential reading for postgraduate students and researchers interested in the area of second language acquisition, with a particular focus on vocabulary, as well as to those working in the broader fields of applied linguistics, TESOL and English studies.

*Black Power TV* Devorah Heitner, 2013-05-22 In *Black Power TV*, Devorah Heitner chronicles the emergence of Black public affairs television starting in 1968. She examines two local shows, New York's *Inside Bedford-Stuyvesant* and Boston's *Say Brother*, and the national programs *Soul!* and

Black Journal. These shows offered viewers radical and innovative programming: the introspections of a Black police officer in Harlem, African American high school students discussing visionary alternatives to the curriculum, and Miriam Makeba comparing race relations in the United States to apartheid in South Africa. While *Inside Bedford-Stuyvesant* and *Say Brother* originated from a desire to contain Black discontent during a period of urban uprisings and racial conflict, these shows were re-envisioned by their African American producers as venues for expressing Black critiques of mainstream discourse, disseminating Black culture, and modeling Black empowerment. At the national level, *Soul!* and *Black Journal* allowed for the imagining of a Black nation and a distinctly African American consciousness, and they played an influential role in the rise of the Black Arts Movement. *Black Power TV* reveals how regulatory, activist, and textual histories are interconnected and how Black public affairs television redefined African American representations in ways that continue to reverberate today.

*Utility, Probability, and Human Decision Making* Dirk Wendt, C.A. Vlek, 1975-12-31 Human decision making involves problems which are being studied with increasing interest and sophistication. They range from controversial political decisions via individual consumer decisions to such simple tasks as signal discriminations. Although it would seem that decisions have to do with choices among available actions of any kind, there is general agreement that decision making research should pertain to choice problems which cannot be solved without a predecisional stage of finding choice alternatives, weighing evidence, and judging values. The ultimate objective of scientific research on decision making is two-fold: (a) to develop a theoretically sound technology for

the optimal solution of decision problems, and (b) to formulate a descriptive theory of human decision making. The latter may, in turn, protect decision makers from being caught in the traps of their own limitations and biases. Recently, in decision making research the strong emphasis on well defined laboratory tasks is decreasing in favour of more realistic studies in various practical settings. This may well have been caused by a growing awareness of the fact that decision-behaviour is strongly determined by situational factors, which makes it necessary to look into processes of interaction between the decision maker and the relevant task environment. Almost inevitably there is a parallel shift of interest towards problems of utility measurement and the evaluation of consequences.
