Case-Based Reasoning Research and Development Michael T. Cox, Peter Funk, Shahina Begum, 2018-10-08 This book constitutes the refereed proceedings of the 26th International Conference on Case-Based Reasoning Research and Development, ICCBR 2018, held in Stockholm, Sweden, in July 2018. The 39 full papers presented in this book were carefully reviewed and selected from 77 submissions. The theme of ICCBR-2017, The Future of CBR, was highlighted by several activities. These papers, which are included in the proceedings, address many themes related to the theory and application of case-based reasoning and its future direction. Topics included multiple papers on textual CBR and a number of cognitive and human oriented papers as well as hybrid research between CBR and machine learning.

Cross-platform UI Development with Xamarin.Forms Paul F. Johnson, 2015-08-26 Create a fully operating application and deploy it to major mobile platforms using Xamarin.Forms About This Book Create standard user interfaces on Windows Mobile, Android, and iOS and then make those interfaces look good with ease Design a full-blown application in very little time with just about the entire code being shared Learn how to access platform-specific features and still have the same core code with this handy guide Who This Book Is For This book is intended for mobile software developers who are fed up with having three different code sets for the same application. If you want to put your code on all mobile platforms with minimum fuss, and just want to develop but haven't got the time to be digging too far into a particular platform, this is the book for you. Basic knowledge of C# is assumed. What You Will Learn Create a responsive UI, modified to suit the target platform Understand the basics of designing an application, and the considerations needed for target platforms Construct a complete app using a single codebase Develop attractive user interfaces Bind information to the code behind to generate a reactive application Design an effective portable class library (PCL) Include a Windows Mobile application within your standard Xamarin.Forms application Extend your applications using the Xamarin.Forms Labs library In Detail Xamarin is an IDE used for the development of native iOS, Android, and Windows, and cross-platform mobile applications in C#. For the mobile developer, that means learning three different languages to create the same application. Even if you use the Xamarin toolchain, you still need to work with three different user interface construction sets. Xamarin is essentially a container in which developers can write any application in C# and use the Xamarin compiler to package and deploy on Android, iOS, or Windows platforms. To top this, Xamarin.Forms plays the role of a single codebase for mobile applications. This book will show you, with fully-coded examples, how to use both the Xamarin toolchain and the Xamarin.Forms library to code once for the three platforms. It goes from the concept and design of a mobile messenger application to its execution. You will be introduced to Messenger—the messaging app—which includes key features such as push notifications, UI, maps, databases, and web services. Next, you will learn to plan the UI using Xamarin.Forms for cross-mobile platform development, and move on to creating custom buttons, extending the UI, and connecting to social sites such as Facebook and Twitter. You will also learn about the limitations of PCL libraries and how they make coding easier. This will be followed by the creation of a SQLite database and a database manager, and the SQLite database's reflection within the database manager. You will then be taken through the use of hardware features with ample coverage of iOS, Android, and Windows Mobile. Finally, the book will conclude by introducing common strategies that allow you to create applications that “just work” without having to reinvent the wheel each time. Style and approach A fun and informal approach to creating a mobile application using the most up-to-date cross-platform approach. Each coding chapter includes fully working code examples available for download from the Packt Publishing website.

Popular Music and Parenting Shelley Brunt, Liz Giuffre, 2022-10-18 Popular Music and Parenting explores the culture of popular music as a shared experience between parents, carers and young children. Offering a critical overview of this topic from a popular music studies perspective, this book expands our assumptions about how young audiences and caregivers engage with music together. Using both case studies and wider analysis, the authors examine music listening and participation between children and parents in both domestic and public settings, ranging across children's music media, digital streaming, live concerts, formal and informal popular music education, music merchandising and song lyrics. Placing young children's musical engagement in the context of the music industry, changing media technologies, and popular culture, Popular Music and Parenting paints a richly interdisciplinary picture of the intersection of popular music with the parent-child relationship.

Marketing Graffiti Mike Saren, 2017-12-01 Radical and unique in its approach and presentation, Marketing Graffiti turns the traditional marketing introduction on its head by helping students to understand the part they already play as ‘consumers’ in the marketing process. Most marketing textbooks tackle the subject as a business function - i.e. how to do marketing in companies and other organizations. Marketing Graffiti shows how marketing is not just a business function but a part of our culture, and one in which we are all active as part-time marketers. By rejecting managerially-driven structures in this way, Saren's approach makes marketing immediate and instantly recognizable as a process and a phenomenon in which we are already complicit. It helps readers to become aware of what they already know. Critically examining a wide range of products, businesses, technologies, information, services, ads, packaging and branding, Saren utilizes everyday images and phenomena to draw out the conceptual foundations of marketing from a social science and cultural studies perspective as something that we all experience in everyday life. This new edition of the first critical marketing textbook discusses the role new technologies (such as social media) play in marketing culture and how this can potentially place more power in the clicks of the consumer. It includes new, updated or expanded sections on market exclusion, the role of the

consumer in innovation, space and place, pricing, consumer communities, collaborative consumption and social media marketing. Leading experts in these fields of research and marketing practice also contribute additional sections on these topics. This essential marketing guide is supported by a range of teaching support materials including the latest journal and online references, guides to further reading, teaching slides and test bank questions

TephroArchaeology in the North Pacific Gina L. Barnes, Tsutomu Soda, 2019-03-31 'TephroArchaeology' (from the Japanese, kasanbai kōkogaku - lit. volcanic ash archaeology), refers to a sub-discipline of archaeology developed in Japan in the last few decades. This book brings into the English-speaking world tephroarchaeological investigations by archaeologists in Japan whose results are usually only accessible in Japanese.

Sun Protection in Man P.U. Giacomoni, 2001-07-31 Sun Protection in Man looks at the beneficial and harmful effects of solar radiation. The physiological consequences of sun exposure have been systematically studied starting at the end of the nineteenth century and we now have accumulated knowledge about how Caucasian and Asian skins reacts to solar radiation. The chemical effects of solar ultraviolet radiation have been analyzed with particular emphasis during the second half of the twentieth century. Research on micro-organisms has allowed us to understand the mechanisms of UV-induced mutagenesis and photosensitization. Studies with laboratory rodents have opened the path to the understanding of UV-induced immune-depression, carcinogenesis, photo-damage and photo-aging. The results of these studies have enabled other scientists to investigate the same phenomena in human organs such as the skin and the eye. UV radiation damages hair, as well. The present knowledge in these fields is summarized in some of the chapters of this monograph. Mass phenomenon in Europe with the generalization of summer vacations which were a consequence of social reforms introducing the concept of paid vacations. This created a need for protection and opened a market for sunscreens. This monograph is concerned with sun protection as a whole and is not just another book on sunscreens. Nonetheless, in these days of general concern, it is important to learn about the efficiency of sunscreens. Several authors discuss how to reduce the number of impinging photons and explain why sunscreens seem to offer less protection than expected. Guidelines are given on how to use sunscreens in everyday life, which are expressed rigorously though clearly, for access to the common reader. Our knowledge on the relationship between sun and humans is at the early stages of development. Industrial and commercial activities are concerned by the development of this knowledge, and rules have been and will be promulgated to guarantee efficacy and safety of sun-products. It is hoped that this monograph will be of interest to the scholar, the layman and the legislator.
