**Playing with Reality** Alex Humphreys,2022-08-17 What was it that got you through the Covid-19 pandemic? For some it was long walks; others turned to home baking. For millions it was video games, a booming industry which exploded in popularity over the pandemic years. Confined to our homes and with the lines of reality becoming blurred as everyday life shifted to screens, perhaps it was no wonder that so many of us were desperate to be transported to different worlds. In *Playing with Reality: Gaming in a Pandemic*, journalist and presenter Alex Humphreys, a passionate gamer herself, investigates this extraordinary boom in the gaming industry. Charting its rise, Alex interviews players and developers, sharing a glimpse of what was going on behind closed doors as studios closed and games were finished from home. *Playing with Reality* explores exactly what it was that made gaming a lifeline for so many, and what the future holds as we look to the metaverse. Alexandra brilliantly chronicles the boundless creativity of an industry persevering through unprecedented times. Aaryn Flynn

**Olympic Cities: 2012 and the Remaking of London** Iain MacRury,2017-03-02 Drawing upon historical, cultural, economic and socio-demographic perspectives, this book examines the role of a sporting mega-event in promoting urban regeneration and social renewal. Comparing cities that have or will be hosting the event, it explores the political economy of the games and the changing role

of the state in creating post-industrial metropolitan spaces. It evaluates the changing perceptions of the Olympic Games and the role of sport in the global media age in general and assesses the implication of 'mega-event' regeneration policies for local communities and their cultural, social and economic identities, with specific reference to east London and the Thames Gateway.

*The Game of Urban Regeneration* Francesca Weber-Newth,2019-07-31 Who wins and who loses in urban regeneration? What are the mechanisms at play? Francesca Weber-Newth looks at two neighbourhoods that are adjacent to large-scale regeneration schemes: the 2012 Olympic park in London and the Mediaspree waterside development in Berlin. By analysing how urban regeneration is experienced on the ground, her study counters the notion that Olympic-led regeneration is any different from other forms of neoliberal urban development. Adopting Pierre Bourdieu's view of the social world as made up of competitive ›games‹, an analysis of the two neighbourhoods reveals how the concepts of ›culture‹ and ›community‹ are strategically employed in the ›game‹ of urban regeneration - to the benefit of some and the detriment of others.

**Rockin' the Classics and Classicizin' the Rock:** Janell R. Duxbury,2001-02-05 Rock music of all varieties has been influenced by classical music and vice versa, both in the form of direct quotes and in the form of borrowings of style, composition, and

instrumentation. The average listener may be unaware of the many links between rock music and the classics. One might remember a few examples, such as Walter Murphy's chart-topping A Fifth of Beethoven or Eric Carmen's All by Myself, but pass them off as interesting anomalies. However, the influence of the classics on rock music is pervasive and grows from a long line of precedents. This second supplement to Janell R. Duxbury's original 1985 discography, *Rockin' the Classics and Classicizin' the Rock*, brings the earlier work and first supplement up-to-date with hundreds of new entries documenting recently released or newly discovered examples of the interconnection between these musical genres. Duxbury details nearly 700 new examples of recorded rock instrumentals and songs that borrow musical themes from the classics. Variations range from contemporary renditions of complete classical works to brief classical quotes or phrases subtly incorporated into rock compositions. Duxbury also gives additional examples of recorded orchestral versions of songs originally composed and/or written by rock artists. In these examples, the musical style varies from strict classical interpretations to pop-style orchestral renditions. The second supplement then expands Duxbury's original compilation of sound recordings and live performances of rock groups performing with established orchestras and choruses, selected samples of recorded rock music that simulate baroque or classical sound/structure, examples of the manifest influence of rock on classical music, and instances of rock artists and classical artists switching roles. Lastly, this discography updates the 1985 version and the first supplement with new information, expanded details, and minor corrections to the earlier works. An extended list of selected non-rock background examples is included in several new appendixes. The Preface is updated. A general index includes the names of classical composers, rock artists and groups, orchestras, choruses, orchestra conductors, sound recording producers, and song or instrumental titles. With its incomparable scope and content, this supplement, together with Duxbury's previous discography, and its first supplement will be appreciated by students, researchers, record collectors, trivia buffs, music industry employees, and fans of rock music and the classics.

**Mega-Events and Mega-Ambitions: South Korea's Rise and the Strategic Use of the Big Four Events** Yu-Min Joo, Yooil Bae, Eva Kassens-Noor, 2017-07-04 This book provides a holistic analysis of South Korea's strategic use of mega-events in its modern development. It examines the Summer Olympics (1988), the World Expo (1993), the FIFA World Cup (2002), and the Winter Olympics (2018) over the past 30 years of the country's rapid growth, and across varying stages of economic and political development. It explains how mega-events helped to secure South Korea's position on the international stage, boost nationalism, propel economic growth in export-oriented national companies, and build cities that accommodate – as well as represent – South Korea's progress. It thereby highlights the broader implications for today's global phenomenon of increasing reliance on mega-events as a catalyst for development, while the criticism that mega-events do more harm than good proliferates. The book is ideal for academics, policymakers, and those with an interest in mega-events and their role in the development of non-western countries.

**NL28 Olympic Fire** Marc Joubert, 2008 The Olympic Games, which will be held in Holland in 2028, constitute a mega-event on an almost unimaginable scale. Sport, the economy, city marketing, urban development and even regional and national development are fundamentally affected. Organizing the event can strengthen the identity of a country and put major spatial planning problems on the agenda--or even solve them. Based on studies from the Netherlands' foremost centers of urban studies, the Academy of Architecture

Rotterdam and the Berlage Institute, as well as the imaginative power of the world-famous Rotterdam based architecture firm MVRDV, NL28 Olympic Fire offers a parade of spectacular visions for how the Olympic Games can transform Holland. The book focuses on the country's spatial agenda by linking themes such as Climate Change, Water Management and Energy Production in surprising new ways with solutions for stadiums, infrastructure and accommodation for athletes.

Preparations for the London 2012 Olympic and Paralympic Games Great Britain: Parliament: House of Commons: Committee of Public Accounts, 2012-03-09 The Olympic Delivery Authority's management of its building programme has been exemplary but, due to significant increases in the cost of venue security, the likelihood of staying within the overall £9.3 billion Public Sector Funding Package is very finely balanced. The Funding Package does not cover the totality of the costs to the public purse of delivering the Games and their legacy, which are already heading for around £11 billion. Operational and financial risks have emerged in areas of the London Organising Committee of the Olympic and Paralympic Games' responsibility, and LOCOG itself now has almost no contingency left to meet further costs, even though it has done well in its revenue generation. The number of security guards required in and around the venues has more than doubled, and renegotiation of the contract for venue security does not appear to have secured any price advantage. With only 109,000 new people regularly participating in sport against an original target (which the new Government chose not to adopt) of 1 million by March 2013, the Department for Culture, Media and Sport has got poor value for money for the £450 million spent through sporting National Governing Bodies. It is unclear what the sporting participation legacy of the Games is intended to be. Responsibility for delivery of all legacy matters is shared across many different parts of Government, and this rings alarm bells about the effective integration of the various legacy plans and about clear accountability to the taxpayer.

**Vain Games of No Value?** Terry Morris, 2016-03-03 It should be unthinkable to write the social history of Britain from the late nineteenth century onwards without reference to association football. Yet by the time that the Football Association celebrated its centenary year in 1963, no serious academic analysis had been undertaken of the sport and of the various channels by which it had developed in different parts of the country. By the time that historians began to tackle that task, its complexity and diversity were such that it could only be undertaken in installments. Studies emerged that focused upon individual clubs and specific regions or

which were limited to narrow time scales. No work examined the long century from the 1860s to the 1970s in full. This book analyses the growth of British football in all its aspects—the developments of the football crowd, the status of the professional player, women's football, the difficult survival of amateurism, to mention but a few. It also highlights the factors that contributed to diverse developmental paths in different parts of the country. The author has used the widest range of source materials to achieve a broader overview of the game's history than has previously been attempted.
