WORLD AHEAD 2024 FUTURE PUBLISHING.,2023

The Future Reinvented Rohit Talwar,Steve Wells ,Alexandra Whittington ,April Koury,Maria Romero,2017-12-07 The second book in the Fast Future series, The Future Reinvented, explores how our notions of the future are themselves being reinvented. The authors challenge us to reimagine how life, society, key industries, and the conduct of business could be transformed by a combination of radical technological, scientific, social, and economic developments shaping the decade ahead. The Future Reinvented offers unique snapshots of different aspects of a future in which the very tenets of reality are undergoing deep and vital transformations. The book is organized into three sections covering transformations in life and society, industries, and business, and presents holistic future scenarios that encourage strategic thinking about what lies beyond the hype.

A Very Human Future Rohit Talwar,Steve Wells,Alexandra Whittington,Helena Calle ,2018-10-15 A Very Human Future is written from the premise that the pace of penetration and scale of disruption of new technologies requires us to adopt a new all-encompassing protective logic for society moving forward. Enriching Humanity in a Digitized World means placing humanity at the center of the agenda so that we avoid dehumanizing ourselves and future generations. As society enters the fourth industrial revolution, a major question arises—can we harness intense technological bursts of possibility to bring about a better world? A Very Human Future illustrates how the evolution of society, cities, people, businesses, industries, nations, and governments are being unexpectedly entangled by exponential technological disruption. This is not a book about technology but an exploration of how we make it serve humanity's highest needs and ambitions. Each chapter looks at how new ideas enabled by emerging technologies are straining the old social fabric, and proposes radical future scenarios, strategies, and actions to safeguard humanity from harm and enhance opportunity for all. This book is a manifesto for a future that is better than the past. A Very Human Future rejects an outlook where human beings live a mundane existence while technologies burst with possibility. Rather, we use this book to endorse a proactive approach to the future where technology is designed to benefit humanity purposefully and intentionally. To advocate for A Very Human Future we ask, for example, how do we use technology to overcome gender bias or to impart a meaningful education to new generations? Can artificial intelligence tools make government more trustworthy and help us deal with the impacts of automation replacing humans? What rights should people have when residing in smart cities? The scale of the new technologies requires a protective logic for moving forward, keeping humanity at the centre so that we avoid dehumanizing ourselves and future generations. A Very Human Future is not one, but many: positive stories and visions of the future can be powerful beacons for social adaptation. We argue that the time to control the narrative of the future and stake a claim for humanity is now. A Very Human Future uses knowledge as power, describing surprising ways new thinking and disruptive technology can impact society. This book explains that protecting what's human is the key to retaining our dominance over future technological progress.

Revolutions from Grub Street Howard Cox,Simon Mowatt,2014-03 Based on extensive new research, the book provides a unique overview of one of Britain's most successful creative industries, consumer magazines, from its seventeenth-century origins into the digital age. It charts the revolutions that took place in both technology and industrial organization, and the response to these changes.

Beyond Genuine Stupidity Rohit Talwar,Steve Wells ,Alexandra Whittington ,April Koury,Maria Romero,2017-11-23 The first book in the Fast Future series, Beyond Genuine Stupidity: Ensuring AI Serves Humanity, explores critical emerging issues arising from the rapid pace of development in artificial intelligence (AI). The authors argue for a forward-looking and conscious approach to the development and deployment of AI to ensure that it genuinely serves humanity's best interest. Through a series of articles, they present a compelling case to get beyond the genuine stupidity of narrow, short-term and alarmist thinking and look at AI from a long-term holistic perspective. The reality is that AI will impact current sectors and jobs—and hopefully enable new ones. A smart approach requires us to think about and experiment with strategies for adopting and absorbing the impacts of AI—encompassing education systems, reskilling the workforce, unemployment and guaranteed basic incomes, robot taxes, job creation, encouraging new ventures, research and development to enable tomorrow's industries, and dealing with the mental health impacts. The book explores the potential impacts on sectors ranging from healthcare and automotive to legal and education. The implications for business itself are also examined from leadership and HR to sales and business ethics.

Chinese Art Objects, Collecting, and Interior Design in Twentieth-Century Britain Helen Glaister,2022-08-26 This book explores the relationship between collecting Chinese ceramics, interior design and display in Britain through the eyes of collectors, designers and tastemakers during the years leading to, during and following the Second World War. The Ionides Collection of European style Chinese export porcelain forms the nucleus of this study – defined by its design hybridity – offering insights into the agency of Chinese porcelain in diverse contexts, from seventeenth-century Batavia to twentieth-century Britain, raising questions about notions of Chineseness, Britishness, and identity politics across time and space. Through the biographies of the collectors, this book highlights the role of collecting Chinese art objects, particularly porcelain, in the construction of individual and group identities. Social networks linking the Ionides to agents and dealers, auctioneers, and museum specialists bring into focus the dynamics of collecting during this period, the taste of the Ionides and their self-fashioning as collectors. The book will be of interest to scholars working in the fields of art history, history of collections, interior design, Chinese studies, and material culture studies.
