Engineering Solutions for Sustainability Jeffrey Fergus,Brajendra Mishra,Dayan Anderson,Emily Allyn Sarver,Neale Neelameggham,2016-12-01 With impending and burgeoning societal issues affecting both developed and emerging nations, the global engineering community has a responsibility and an opportunity to truly make a difference and contribute. The papers in this collection address what materials and resources are integral to meeting basic societal sustainability needs in critical areas of energy, transportation, housing, and recycling. Contributions focus on the engineering answers for cost-effective, sustainable pathways; the strategies for effective use of engineering solutions; and the role of the global engineering community. Authors share perspectives on the major engineering challenges that face our world today; identify, discuss, and prioritize engineering solution needs; and establish how these fit into developing global-demand pressures for materials and human resources.

Designing the Patient Room Sylvia Leydecker,2017-05-22 Interior architecture is the main factor in creating pleasant environments for in-patient healthcare. Whether in paediatric or geriatric wards, economic efficiency, patient well-being and staff satisfaction are increasingly the focus of treatment, healing and healthcare concepts around the world. Well-designed interior architecture concepts for patient rooms can benefit the patient's process of recovery and, through its atmosphere and functionality, improve the quality of the hospital experience. This book explores the design of the patient room as a core part of healthcare environments. It describes the different design components, such as material, colour, light and surface finish, and addresses the needs of hygiene and the specific challenges presented by demographic change and digitisation, as well as workflow issues and economic efficiency. Fourteen international case studies illustrate these design principles.
