Every Nation for Itself Ian Bremmer, 2012-05-03 Following the acclaim for *The End of the Free Market*, Ian Bremmer is back with *Every Nation for Itself*, where he addresses the next big issue for the shifting world economy. 'Smart and snappy ... provides the most cogent prediction of how the politics of a post-America world will play out' *New Statesman* What happens when nobody's running the world? The United States is in financial crisis and can't hold onto the reins of the G-20. But China has no interest in international leadership, Europe is trying to save the euro, and emerging powers like Brazil and India are focused on domestic development. No government has the time, resources or political capital needed to take an international lead. The world power structure is about to have a vacancy...at the top. Welcome to the G-Zero world, in which no single country has the power to shape a truly global agenda. That means we are about to see 20 years of conflict over economics, finance and climate change. Bestselling author and strategist Ian Bremmer reveals how world powers are rapidly turning into gated communities, locked in competition. Who will prevail? 'A prodigy in the US global commentariat. Mr Bremmer's rehearsal of the consequences should make us all wise up' *Financial Times* 'An author who is always full of insights' *George Osborne* Ian Bremmer is the president of the world's leading global political risk research and consulting firm, Eurasia Group. He has written for the *Wall Street Journal*, *Washington Post*, *Newsweek*, and *Harvard Business Review*. His six books include *The J Curve* and *The End Of The Free Market*.

Every Nation for Itself Ian Bremmer, 2012-05-01 G-Zero – \JEE-ZEER-oh\ —n A world order in which no single country or durable alliance of countries can meet the challenges of global leadership. What happens when the G20 doesn't work and the G7 is history. If the worst threatened—a rogue nuclear state with a horrible surprise, a global health crisis, the collapse of financial institutions from New York to Shanghai and Mumbai—where would the world look for leadership? The United States, with its paralyzed politics and battered balance sheet? A European Union reeling from self-inflicted wounds? China's "people's democracy"? Perhaps Brazil, Turkey, or India, the geopolitical Rookies of the Year? Or some grand coalition of survivors, the last nations standing after half a decade of recession-induced turmoil? How about none of the above? For the first time in seven decades, there is no single power or alliance of powers ready to take on the challenges of global leadership. A generation ago, the United States, Europe, and Japan were the world's powerhouses, the free-market democracies that propelled the global economy forward. Today, they struggle just to find their footing. Acclaimed geopolitical analyst Ian Bremmer argues that the world is facing a leadership vacuum. The diverse political and economic values of the G20 have produced global gridlock. Now that so many challenges transcend borders—from the stability of the global economy and climate change to cyber-attacks, terrorism, and the security of food and water—the need for international cooperation has never been greater. A lack of global leadership will provoke uncertainty, volatility, competition, and, in some cases, open conflict. Bremmer explains the risk that the world will become a series of gated communities as power is regionalized instead of globalized. In the generation to come, negotiations on economic and trade issues are likely to be just as fraught as recent debates over nuclear nonproliferation and climate change. Disaster, thankfully, is never assured, and Bremmer details where the levers of power can still be found and how to exercise them for the common good. That's important, because the one certainty of weakened nations and enfeebled institutions is that someone will try to take advantage of them. *Every Nation for Itself* offers essential insights for anyone attempting to navigate the new global playing field.

The J Curve Ian Bremmer, 2006-09-15 Locate nations on the J Curve -- left for authoritarian, right for democratic. Then figure out how to force those on the left to open their societies, rather than encouraging them to shut them tighter by further isolating them. The West's isolation of Kim Jong-il's North Korea gives him the cover he needs to extend his brutal regime (the mistake the U.S. made for a long time with Saddam Hussein and Castro); in Saudi Arabia, western governments should encourage manageable change before the country breaks apart; they should help strengthen China's economy so it can further liberalize; they must encourage Israel to decide what kind of country it will be. Filled with imaginative and surprising examples of how to correct outworn political ideas, *The J Curve* points the way for western governments to lead the way to a realistic political balance and a healthier economic future.

The Power of Crisis Ian Bremmer,2022-05-17 Renowned political scientist Ian Bremmer draws lessons from global challenges of the past 100 years—including the pandemic—to show how we can respond to three great crises unfolding over the next decade. In this revelatory, unnerving, and ultimately hopeful book, Bremmer details how domestic and international conflicts leave us unprepared for a trio of looming crises—global health emergencies, transformative climate change, and the AI revolution. Today, Americans cannot reach consensus on any significant political issue, and US and Chinese leaders behave as if they’re locked in a new Cold War. We are squandering opportunities to meet the challenges that will soon confront us all. In coming years, humanity will face viruses deadlier and more infectious than Covid. Intensifying climate change will put tens of millions of refugees in flight and require us to reimagine how we live our daily lives. Most dangerous of all, new technologies will reshape the geopolitical order, disrupting our livelihoods and destabilizing our societies faster than we can grasp and address their implications. The good news? Some farsighted political leaders, business decision-makers, and individual citizens are already collaborating to tackle all these crises. The question that should keep us awake is whether they will work well and quickly enough to limit the fallout—and, most importantly, whether we can use these crises to innovate our way toward a better world. Drawing on strategies both time-honored and cutting-edge, from the Marshall Plan to the Green New Deal, *The Power of Crisis* provides a roadmap for surviving—even thriving in—the 21st century. Bremmer shows governments, corporations, and every concerned citizen how we can use these coming crises to create the worldwide prosperity and opportunity that 20th-century globalism promised but failed to deliver.

China and the Group 20 Catrina Schläger,Dongxiao Chen,Alexander Rosenplänter,Haibing Zhang,2016-11-28 Since the great financial crisis in 2008, the Group 20 (G20) has played an increasingly important role in global economic governance as an emerging global macroeconomic coordination mechanism. China and the Group 20 provides experts' observations on the development of the G20, G20's influence on global economic governance and China's role in this emerging institution. The first part of the book analyses important policy issues facing the G20 and global economic governance including the G20's role in strengthening and promoting global macroeconomic coordination; reform of the international financial system; the stability and effectiveness of the international monetary system; the integration of international trade and investment regimes; the new agenda of international development and the complex relations among the major powers. The second part focuses on China's relations with the United States, the EU, and the other BRICS countries, and their implications to the G20's development. China, as the largest developing country and the second largest economy, has the responsibility to safeguard the general interests of developing countries on one hand, and to cooperate with the developed countries to create an equal and open economic environment on the other hand. The book chapters are contributed by experts from the main member countries of the G20.

Brave New Canada Derek H. Burney,Fen Osler Hampson,2014-08-01 Globalization and the shifting tectonic plates of the international system have led to an increasingly competitive world. If Canada hopes to gain advantage from the dramatic developments underway it will have to aggressively adapt its foreign and domestic policies and priorities under the clear direction of the federal government or accept being left behind. In *Brave New Canada*, Derek Burney and Fen Hampson identify the key trends that are reshaping the world's geopolitics and economics and discuss the challenges Canada confronts with the rise of China and other global centres of power. Their examination of a wide range of themes - including the place of pluralistic democratic values in diplomacy, economics, and trade, the ways that Canada should reset relations with its neighbour to the south, as well as how to manage new global security threats - paints a picture of how Canada can become bold, assertive, and confident and easily adjust to a new global landscape. Arguing that a successful foreign policy cannot be crafted by looking at the world in the rear-view mirror, *Brave New Canada* offers evidence-

based, provocative prescriptions for both the public and private sectors that should stimulate discussion and command widespread attention.

The G20 and International Relations Theory Steven Slaughter,2019 The future of the G20 is uncertain despite being developed to address the 2008 global financial crisis. This book considers the significance of the G20 by engaging various accounts of International Relations theory to examine the political drivers of this form of global governance. International Relations theory represents an array of perspectives that analyse the factors that drive the G20, how the G20 influences world politics and in what ways the G20 could or should be reformed in the future.

The Exponential Age Azeem Azhar,2021-09-07 A bold exploration and call-to-arms over the widening gap between AI, automation, and big data—and our ability to deal with its effects We are living in the first exponential age. High-tech innovations are created at dazzling speeds; technological forces we barely understand remake our homes and workplaces; centuries-old tenets of politics and economics are upturned by new technologies. It all points to a world that is getting faster at a dizzying pace. Azeem Azhar, renowned technology analyst and host of the Exponential View podcast, offers a revelatory new model for understanding how technology is evolving so fast, and why it fundamentally alters the world. He roots his analysis in the idea of an “exponential gap” in which technological developments rapidly outpace our society’s ability to catch up. Azhar shows that this divide explains many problems of our time—from political polarization to ballooning inequality to unchecked corporate power. With stunning clarity of vision, he delves into how the exponential gap is a near-inevitable consequence of the rise of AI, automation, and other exponential technologies, like renewable energy, 3D printing, and synthetic biology, which loom over the horizon. And he offers a set of policy solutions that can prevent the growing exponential gap from fragmenting, weakening, or even destroying our societies. The result is a wholly new way to think about technology, one that will transform our understanding of the economy, politics, and the future.

Proxy Wars from a Global Perspective Pawel Bernat,Cüneyt Gürer,Cyprian Aleksander Kozera,2023-11-02 Proxy warfare is a growing international phenomenon. Although states have used proxies in armed conflicts for centuries, evolving regional and global security architecture is now forcing states to radically change the way contemporary conflicts are fought. Based on ten case studies, this reassesses exactly how these changing global and systemic factors are shaping the ways in which states use non-state actors as proxies in their armed conflicts. Examining the use of proxy warfare worldwide, focusing on the last decade's conflicts, this volume brings together contributions from scholars of international relations and global security studies in order to explore cases of armed conflict of particular regional and global significance. These include recent developments in the conflict in Israel and Palestine, the Central African Republic, Libya, Mali, Central Asia, Syria, Ukraine, Nagorno-Karabakh, Brazil and Yemen. By drawing on both theory and practise, it offers a re-evaluation of contemporary understanding of outsourced warfare, with policy implications for how we understand and negotiate with states using proxy warfare in the future.
