**Speaker Nancy Pelosi and the New American Politics** Ronald M. Peters, Jr.,Cindy Simon Rosenthal,2010-04-16 When the Democrats retook control of the U.S. House of Representatives in January 2007 after twelve years in the wilderness, Nancy Pelosi became the first woman speaker in American history. In Speaker Nancy Pelosi and the New American Politics, Ron Peters, one of America's leading scholars of Congress, and Cindy Simon Rosenthal, one of

America's leading scholars on women and political leadership, provide a comprehensive account of how Pelosi became speaker and what this tells us about Congress in the twenty-first century. They consider the key issues that Pelosi's rise presents for American politics, highlight the core themes that have shaped, and continue to shape, her remarkable career, and discuss the challenges that women face in the male-dominated world of American politics, particularly at its highest levels. The authors also shed light on Pelosi's political background: first as the scion of a powerful Baltimore political family whose power base lay in East Coast urban ethnic politics, and later as a successful politician in what is probably the most liberal city in the country, San Francisco. Peters and Rosenthal trace how she built her base within the House Democratic Caucus and ultimately consolidated enough power to win the Speakership. They show how twelve years out of power allowed her to fashion a new image for House Democrats, and they conclude with an analysis of her institutional leadership style. The only full-length portrait of Nancy Pelosi in print, this superb volume offers a vivid and insightful analysis of one of America's most remarkable politicians.

Put Y'all Back in Chains Horace Cooper,2023-07-04 Put Y'all Back in Chains outlines how the policies of President Joe Biden harm Black communities and limit opportunities for their success. "Whether you agree or disagree, Horace Cooper's latest book tackles the question of how Joe Biden's policies affect Americans, especially those in minority and underserved communities. His research shows that the injuries are calamitous. Instead of a rising tide lifting all boats, the Biden policies are having a reverse effect, one that devastates bank accounts, crushes entrepreneurship, and steals the promise of the American Dream. Horace painstakingly combs through the harsh results of these efforts, especially on lower income and working class people, who are hit hardest by the woke-policies of Joe Biden. If you want to see the real story the media isn't telling, this book is a must read!" –Sean Hannity, Fox News Host A thorough examination of the ways that the policies of President Joe Biden are antithetical to the aspirations and dreams of Blacks, Put Y'all Back in Chains uncovers the reasons that the policies of the Biden Administration hurt Black communities in particular. And this is no accident. Progressive policymakers relished Biden's COVID-19 pandemic restrictions, his experiments with higher unemployment benefits and related regulatory programs, and especially his push for the green agenda. Consequently, working-class people, especially Black men, were hardest hit when it comes to finding employment as well as maintaining their financial lifestyle. Tragically, the Biden Agenda hurt the entire Black community, affecting educational attainment, wealth creation, and homeownership. These dramatic downward changes were particularly hard to absorb for Black households, especially those that made tremendous gains during the Trump Administration. It is increasingly clear that President Joe Biden's priorities place Blacks at the back of the political bus. In this thoroughly researched book, Horace Cooper outlines how the minority group most likely to support Biden—Blacks—are systematically impaired by this White House and why the Black community needs to turn away from the Biden Administration and toward a brighter future.

**Transforming Energy** Anthony Patt,2015-07-16 Climate change will be an ecological and humanitarian catastrophe unless we move quickly to eliminate greenhouse gas emissions. Policy experts advise us that we need to make major changes to our lifestyles, and our governments need to agree globally binding treaties and implement market instruments like carbon taxes. This advice is a mistake: it treats technological innovation as being at the periphery of the climate policy challenge, whereas it needs to be at its core; we will phase out emissions when and only when the technologies to replace fossil fuels are good enough, and policies need - quickly - to support these new technologies directly. Anyone with an interest in climate change and energy policy will find this book forward-thinking and invaluable. Professional policy-makers, climate and energy policy researchers, and students of energy and public policy, economics, political science, environmental studies, and geography will find this book especially stimulating.
