Management Information Systems for Microfinance Arvind Ashta, 2015-10-19 Microfinance is a double bottom line sector which is growing fast, making money and doing well in a variety of socially interesting ways. The growth of its institutions requires good strategies, good control systems and informed decision-making, all of which require an appropriate Management Information System (MIS). While a good MIS is needed in any sector, the management of a double bottom line requires systems which yield information on economic, financial and social metrics. The essays in this book explore the metrics required for success in this field. Communicating on these metrics may provide competitive advantage in fund-raising. Reaching out to the bottom of the pyramid requires low-cost catalytic innovations, disrupting the existing way of doing things. These necessitate not only social innovations, but also technological innovations to reduce costs drastically. The book presents various alternative ways of distributing software for microfinance, including case studies on open-source and cloud-based software, indicating how software providers are seeking to create competitive advantage. It offers a detailed analysis of the problems that are often faced and innovative techniques for implementing MIS in microfinance. This volume represents essential reading for anyone interested in learning about not only microfinance and MIS, but also social innovations and competitive advantage strategies. The contributors to the book are executives, consultants and academics who have considerable research experience in working and researching in these areas. Their work has been reviewed and developed by comments from both academics and practitioners to yield a book which is

useful to students, academics and practitioners alike.

BollySwar: 2001 - 2010 Param Arunachalam, BollySwar is a decade-wise compendium of information about the music of Hindi films. Volume 8 chronicles the Hindi film music of the decade between 2001 and 2010. This volume catalogues more than 1000 films and 8000 songs, involving more than 2000 music directors, lyricists and singers. An overview of the decade highlights the key artists of the decade - music directors, lyricists and singers - and discusses the emerging trends in Hindi film music. A yearly review provides listings of the year's top artists and songs and describes the key milestones of the year in Hindi

film music. The bulk of the book provides the song listing of every Hindi film album released in the decade. Basic information about each film's cast and crew is provided and detailed music credits are provided. Where available, music credits go beyond information regarding music directors, lyricists and singers, and include the names of session musicians, assistants, programmers, arrangers, mixers, recordists, etc. Where applicable, music related awards are listed. Interesting trivia is listed for most films, more than 1500 in all. This includes information about artist debuts, plagiarised or sampled songs, controversies and stories behind the making of the film and its music. This book is primarily meant as a quick reference for people looking for information related to a Hindi film or a song, but readers can also browse through the book to get an overview of the events that shaped Bollywood music in the decade. Given that Hindi films are a reflection of the Indian society, the reader can also glean insights about the country's socio-political and cultural environment from the book.

What I Learned About Investing from Darwin Pulak Prasad, 2023-05-23 The investment profession is in a state of crisis. The vast majority of equity fund managers are unable to beat the market over the long term, which has led to massive outflows from active funds to passive funds. Where should investors turn in search of a new approach? Pulak Prasad offers a philosophy of patient long-term investing based on an unexpected source: evolutionary biology. He draws key lessons from core Darwinian concepts, mixing vivid examples from the natural world with compelling stories of good and bad investing decisions—including his own. How can bumblebees' survival strategies help us accept that we might miss out on Tesla? What does an experiment in breeding tame foxes reveal about the traits of successful

businesses? Why might a small frog's mimicry of the croak of a larger rival shed light on the signs of corporate dishonesty? Informed by successful evolutionary strategies, Prasad outlines his counterintuitive principles for long-term gain. He provides three mantras of investing: Avoid big risks; buy high quality at a fair price; and don't be lazy—be very lazy. Prasad makes a persuasive case for a strategy that rules out the vast majority of investment opportunities and advocates permanently owning high-quality businesses. Combining punchy prose and practical insight, *What I Learned About Investing from Darwin* reveals why evolutionary biology can help fund managers become better at their craft.

Threatening Dystopias Kasia Paprocki, 2021-12-15 Bangladesh is currently ranked as one of the most climate vulnerable countries in the world. In *Threatening Dystopias*, Kasia Paprocki investigates the politics of climate change adaptation throughout the South Asian nation. Drawing on ethnographic and archival fieldwork, she engages with developers, policy makers, scientists, farmers, and rural migrants to show how Bangladeshi and global elites ignore the history of landscape transformation and its attendant political conflicts. Paprocki looks at how groups craft economic narratives and strategies that redistribute power and resources away from peasant communities. Although these groups claim that increased production of export commodities will reframe the threat of climate change into an opportunity for economic development and growth, the reality is not so simple. For the country's rural poor, these promises ring hollow. As development dispossesses the poor from agrarian livelihoods, outmigration from peasant communities leads to precarious existences in urban centers. And a vision of development in which urbanization and export-led growth are both desirable and inevitable is not one the land and its people can

sustain. *Threatening Dystopias* shows how a powerful rural movement, although hampered by an all-consuming climate emergency, is seeking climate justice in Bangladesh.

Journalism Research That Matters Valérie Bélair-Gagnon, Nikki Usher, 2021-06-01 It is now well-established that the long-time economic model on which the news industry has relied is no longer sustainable. Facebook, Google, and declining levels of popular trust in the media have been major contributors to this situation. Simultaneously, the closure of local media outlets across the country has left many areas without access to regional news, compounded the distance between media and publics, and further eroded civic engagement. Despite the looming crisis in journalism, a research-practice gap plagues the news industry. This book argues that an underappreciated factor in the news crisis is a potentially symbiotic relationship between journalism studies and the industry that it researches. As this book contends, scholars must think about their work in a public context, and journalists, too, need to listen to media scholars and take the research that they do seriously. Including contributions from journalists and academics, *Journalism Research That Matters* offers journalists a guide on what they need to know and journalism scholars a call to action for what kind of research they can do to best help the news industry reckon with disruption. The book looks at new research developments surrounding audience behavior, social networks, and journalism business models; the challenges that scholars face in making their research available to the public and to journalists; the financial survival of quality news and information; and blind spots in the way that researchers and journalists do their work, especially around race, diversity, and inequality. A final section includes contributions from journalists about how researchers can better engage

on the ground with newsrooms and media professionals.

A Future for the News Jim A. Kuypers, 2023-11-15 Bringing together academics and news industry professionals, this daring book investigates and offers solutions to significant problems with the productive functioning of the mainstream news media. Each chapter offers a pathway for improvement for individual reporters, the institution more broadly, and the news consumer.

FROM SNAKE CHARMERS TO MOUSE CHARMERS: MODERN INDIA UNDER NARENDRA DAMODARDAS MODI Surendra Nathan Madhurakkandy, By the assassination of Rajiv Gandhi, the

grandson of Jawaharlal Nehru, the government by the direct descendant of the Nehru Dynasty under the Indian National Congress (INC) came to an end. His widow, an uneducated Italian Christian, continued the Dynasty Rule under a Congress-led hotchpotch coalition called UPA, which was voted out of power in early 2014. During the decade-long UPA government, the Indian economy was in a shambles, mired in massive corruption indulged in by all its Ministers - each one vying with one another in looting the National Exchequer. In retrospect, looking back over the Dynasty Rule of nearly seven decades since independence under the INC Party, India could gain the status of only 10th place in the world economic progress rating, although the neighboring China under the Chinese Communist Party (CCP) could become 2nd most powerful nation in the world despite the fact that INC was established four decades prior to the establishment of CCP. Then the year 2014 heralded. In a spectacular festival of democracy, the world's largest political party, Bharatiya Janata Party (BJP), won the election with absolute majority, and its Prime Ministerial candidate, Narendra Modi, became the 14th P.M. of India on 26th May 2014. Since then the country witnessed remarkable growth and progress, aided by his corruption-free government, attaining the status of fifth largest economy in the world. It is during the inexorable passage of time since the Modi-Era began in 2014 that the essays included in this book were all penned by the Author, touching upon various aspects of the turn of events and of the friends and foes of Modi. By paraphrasing the sayings of Swami Vivekananda: friends and foes are all instruments in the hands of PM Modi to help India work out its own karma and lead the nation to greater heights in the years to come.

Ignis Fatuus: The Delusions Created In You and For You by the Investment Sector Nidadavolu Ashok

Kumar,2024-02-01 Almost all investors who have taken professional advice to invest their hard-earned money have, at one time or another, faced fraud, deception and mis-selling from those selling mutual funds, ULIPs and shares. Some these investors have lost all their wealth and many of them committed suicide since they could not withstand the financial loss. Investors believe, by and large, that the fraud is perpetuated mostly by the agents who sell them the investments. The agents are only a small proportion of the persons cheating investors. The main actors are behind the scenes. The Book offers insights on how investors are cheated by academicians, the media, the asset management companies, the fund managers and other experts. These experts create a world of delusions (called ignis fatuus in Latin) to feed the investors' desire to earn money quickly. The Book describes the environment that has been created in the financial sector and how that environment facilitates fraud and deception. The 10 most-common statements that experts make which create the world of ignis fatuus (delusions) for investors are examined. Evidence is provided to show why all the statements that promise investors high returns amount to a misrepresentation or fraud.
