Disturbing Development in the Jim Crow South Mona Domosh,2023-03-01 Disturbing Development in the Jim Crow South documents how Black employees of the cooperative extension service of the USDA practiced rural improvement in ways that sustained southern Black farmers' lives and livelihoods in the early decades of the twentieth century, resisting the white supremacy that characterized the Jim Crow South. Mona Domosh

details the various mechanisms—the transformation of home demonstration projects, the development of a movable school, and the establishment of Black landowning communities—through which these employees were able to alter USDA's mandates and redirect its funds. These tweakings and translations of USDA directives enabled these employees to support poor Black farmers by promoting food production, health care, and land and home ownership, thus disturbing a system of plantation agriculture that relied on the devaluing of Black lives. Through the documentation of these efforts, Domosh uncovers an important and previously unknown episode in the long history of international development that highlights the roots of liberal development schemes in the anti-Black racism that constituted plantation agriculture and illustrates how racist systems can be quietly and subtly resisted by everyday people working within the confines of white supremacy.

Becoming a Mighty Voice Daniel Cornfield,1990-03-06 American labor unions resemble private representative democracies, complete with formally constituted conventions and officer election procedures. Like other democratic institutions, unions have repeatedly experienced highly charged conflicts over the integration of ethnic minorities and women into leadership positions. In Becoming a Mighty Voice, Daniel B. Cornfield traces the 55-year history of the United Furniture Workers of America (UFWA), describing the emergence of new social groups into union leadership and the conditions that encouraged or inhibited those changes. This vivid case history explores leadership change during eras of union growth, stability, and decline, not simply during isolated episodes of factionalism. Cornfield demonstrates that despite the strong forces perpetuating existing union hierarchies, leadership turnover is just as likely as leadership stagnation. He also shows that factors external to the union may influence leadership change; periods of turnover in the UFWA leadership reflected employer efforts to find cheap, non-union labor, as well as union efforts to unionize workers. When unions are threatened by intensified conflict with employers and when entrenched high status groups within the union are obliged to recruit members of lower socioeconomic status, then new social groups are likely to be integrated into union leadership. Becoming a Mighty Voice develops a theory of leadership change that will be of interest to many engaged in the labor, civil rights, and women's movements as well as to sociologists or historians of work, gender, and race, and to students of political and organizational behavior.

The Century of the Child Theresa Richardson,1989-08-03 In this book, Richardson crosses disciplinary boundaries to examine mental hygiene issues of contemporary concern in both the United States and Canada. The work juxtaposes a social history of

the child in the twentieth century to shifts in private and public power as influenced by the mental hygiene movements in both countries. The author shows how the historical record sheds light on current policy concerned with mentally, emotionally, and educationally handicapped children. As a sociology of mental illness, the book examines the relationship between mental hygiene as a form of knowledge and the social institutions that fostered the use of psychiatric perspectives concerning child and family life. Significant topics covered in this regard include the history of early childhood and parent education, the origins of child psychiatry in treating juvenile delinquency, and the evolution of contemporary concepts of normal development.

A Clashing of the Soul Leroy Davis,1998 John Hope (1868-1936), the first African American president of Morehouse College and Atlanta University, was one of the most distinguished in the pantheon of early-twentieth-century black educators. Born of a mixed-race union in Augusta, Georgia, shortly after the Civil War, Hope had a lifelong commitment to black public and private education, adequate housing and health care, job opportunities, and civil rights that never wavered. Hope became to black college education what Booker T. Washington was to black industrial education. Leroy Davis examines the conflict inherent in Hope's attempt to balance his joint roles as college president and national leader. Along with his good friend W. E. B. Du Bois, Hope was at the forefront of the radical faction of black leaders in the early twentieth century, but he found himself taking more moderate stances in order to obtain philanthropic funds for black higher education. The story of Hope's life illuminates many complexities that vexed African American leaders in a free but segregated society.

Becoming John Dewey Thomas Dalton,2002-09-11 As one of America's public intellectuals, John Dewey was engaged in a lifelong struggle to understand the human mind and the nature of human inquiry. According to Thomas C. Dalton, the successful pursuit of this mission demanded that Dewey become more than just a philosopher; it compelled him to become thoroughly familiar with the theories and methods of physics, psychology, and neurosciences, as well as become engaged in educational and social reform. Tapping archival sources and Dewey's extensive

correspondence, Dalton reveals that Dewey had close personal and intellectual ties to scientists and scholars who helped form the mature expression of his thought. Dewey's relationships with F. M. Alexander, Henri Matisse, Niels Bohr, Myrtle McGraw, and Lawrence K. Frank, among others, show how Dewey dispersed pragmatism throughout American thought and culture.
