*Model Driven Engineering Languages and Systems* Jon

Whittle, Tony Clark, Thomas Kühne, 2011-10-12 This book constitutes the refereed proceedings of the 14th International Conference on Model Driven Engineering Languages and Systems, MODELS 2011, held in Wellington, New Zealand, in October 2011. The papers address a wide range of topics in research (foundations track) and practice (applications track). For the first time a new category of research papers, vision papers, are included presenting outside the box thinking. The foundations track received 167 full paper submissions, of which 34 were selected for presentation. Out of these, 3 papers were vision papers. The application track received 27 submissions, of which 13 papers were selected for presentation. The papers are organized in topical sections on model transformation, model complexity, aspect oriented modeling, analysis and comprehension of models, domain specific modeling, models for embedded systems, model synchronization, model based resource management, analysis of class diagrams, verification and validation, refactoring models, modeling visions, logics and modeling, development methods, and model integration and collaboration.

Religious Education at Schools in Europe Martin Rothgangel, Geir Skeie, Martin Jäggle, 2014-05-14 The project Religious Education at Schools in Europe (REL-EDU), which is divided up into six volumes (Central Europe, Western Europe, Northern Europe, Southern Europe, South-Eastern Europe, Eastern Europe), aims to research the situation with regard to religious education in Europe. The third volume outlines the organisational form of religious education in the countries of Northern Europe (Denmark, Sweden, Finland, Norway, Estonia, Lithuania, Latvia, Iceland). This is done on the basis of

thirteen key issues, which allows specific points of comparison between different countries in Europe. Thereby the volume focusses the comparative approach and facilitates further research into specific aspects of the comparison.

**Holistic Religious Education - is it possible?** Sturla Sagberg,2015

This book discusses the possibility of a holistic approach to religious education, taking into account religious and cultural diversity, different aspects of secularisation and different academic disciplines that inform the subject. Issues discussed are the view of children as spiritual and religious subjects, identity formation, the concept of child theology, the relationship between faith and morality, the meaning of spirituality, the notion of wonder as an inroad to learning, religion as culture, and the meaning of holism. A point of departure is taken in a typology of attitudes to religion in public education, and the line of reason ends in a search for viable metaphors for holistic religious education. Sturla Sagberg (born 1951) is professor of religious education and ethics at Queen Maud University College of Early Childhood Education in Trondheim, Norway. He has a doctoral degree in theology, and has for many decades taught and done research related to teacher training as well as to church education. He has published several books in Norwegian, of which the latest translates into Religion, Values and Formation: Children and the big questions in life. Many of his articles in books and journals are written in English.

Panoram Manfred Kwiran,2011-11 Interdisciplinary Ethical an Religious Studies for Responsible Research

**Issues in Spiritual Formation in Early Lifespan Contexts** Martin

Ubani,Sari Murtonen,2023-10-17 This book focuses on the question of how different contexts are relevant in the shaping and expression of

individual spirituality spanning from early childhood to young adulthood. Past decades have witnessed a strong expansion of research on spirituality and spiritual education. This expansion has proved to have many advantages in understanding the experiences, values, identities and behaviours of individuals and communities. Such research has benefitted from different research disciplines and methods, from its openness toward different faith traditions and non-religious belief systems, and from the agility in adapting to diverse and evolving contexts. These aspects are essential in producing robust and timely international knowledge on children's spirituality and their education. This volume is one such ambitious endeavour. The chapters describe issues related to religious and spiritual development in different contexts of growth, such as school and church, and spanning from early childhood to young adulthood in Finland, UK, Turkey and Malta. In addition, the authors utilise diverse methods in their studies. Furthermore, the studies are based on conceptions of spirituality ranging from holistic spirituality and religiosity to world view based definitions. Finally, the chapters represent foundational research on spirituality, applied research on spirituality and contextualised research on spirituality – a typology suitable for assessing future studies on spirituality. *Issues in Spiritual Formation in Early Lifespan Contexts* will be a key resource for academics, researchers, and advanced students of Religion, Religious Education, Education, Educational Research, Developmental Psychology, Research Methods, and Sociology. The chapters included in this book were originally published as a special issue of *International Journal of Children's Spirituality*.

*Metoder för förarutbildning i Norden - del 2, 1996*

**Textbook of Real-Time Three Dimensional Echocardiography**

Luigi Badano,Roberto M. Lang,Jose Luis Zamorano,2010-12-07 This Textbook will give the reader a detailed understanding of the use of 3D echo covering a wide range of topics; from the evolution of RT3D echo to the role of RT3D echo in drug trials, including chapters on the Principles of Transthoracic and Transesophageal Real-time 3D echocardiography. Other books in this area are more varied, less specific.

**New Perspectives on Religious and Spiritual Education** Theo van der Zee,Terence J. Lovat,2012 Society is a complex phenomenon, characterized by constant change, often entailing conflict. This is seen in our own times where philosophies and movements of individualism, pluralism and globalization intersect and often collide. Still, even in this fast-moving and highly materialist world, religion and spirituality remain crucial aspects of human and social living, and therefore must be among the many focusses of the modern school. Teachers of Religious and Spiritual Education (RSE) are therefore expected to support students' religious and spiritual understanding as well as their overall development. How can they best meet this challenge? This book is comprised of various interdisciplinary research findings drawn from international scholarship. The findings are of a different order from each other but all have in common an element of surprise, sufficient to impel reflection and re-thinking of many of the assumptions that normally underpin RSE. The book therefore constitutes a contribution to ongoing understanding of the role played by religious and spiritual education and of the proper interface between RSE and the modern school, contemporary curricula and the teacher of today. Contributions by Robert Crotty, Ola Erik Domaas, Michael Fricke, Liam Gearon, Adrian-Mario Gellel, Eija Hanhimaki, Laura Hirsto, Tapani Innanen, Terence Lovat, Klaas Macha, Emanuel

P. Magro, Adil Mamodaly, Fritz Oser, Ulrich Riegel, Inkeri Rissanen, Sturla Sagberg, Kirsi Tirri, Theo van der Zee, Karen Wenell

### **Religious Education at Schools in Europe** Martin

Rothgangel, Martin Jäggle, Geir Skeie, 2014 At a time when educational issues have increasingly come to determine the social and political discourse and major reforms of the education system are being discussed and implemented, and when migration has become a significant phenomenon, contributing to changes in the religious landscape of the European continent, it is highly appropriate to focus our attention on the concrete situation regarding religious education.--

### **International Directory of Psychologists, Exclusive of the U.S.A.**

Kurt Pawlik, 1985 Over 32,000 psychologists representing 51 countries throughout the world except the United States. Is not restricted to only better known professionals; includes information on all psychologists who were reported by psychology societies in the various countries, UNESCO sources, institutions, or contact persons. Geographical arrangement by countries. Entries give personal, educational, and career information as well as special areas of interest. Includes a list of abbreviations. Introduction for each country (before biographical entries) contains information on development and current status of psychology in that country.

### **Intraoperative Imaging** M. Necmettin Pamir, Volker Seifert, Talat

Kiris, 2010-10-20 Intraoperative imaging technologies have taken an ever-increasing role in the daily practice of neurosurgeons and the increasing attention and interest necessitated international interaction and collaboration. The Intraoperative Imaging Society was formed in 2007. This book brings together highlights from the second meeting of the Intraoperative Imaging Society, which took place in Istanbul-Turkey from June 14 to 17, 2009. Included within the contents of the

book is an overview of the emergence and development of the intraoperative imaging technology as well as a glimpse on where the technology is heading. This is followed by in detail coverage of intraoperative MRI technology and sections on intraoperative CT and ultrasonography. There are also sections on multimodality integration, intraoperative robotics and other intraoperative technologies. We believe that this book will provide an up-to date and comprehensive general overview of the current intraoperative imaging technology as well as detailed discussions on individual techniques and clinical results.

**Meningiomas, Part II** Michael W. McDermott,2020-06-23

Meningiomas, Volume 170, Part Two, discusses tumors that arise from the coverings of the brain and spinal cord. In this updated volume of the Handbook of Clinical Neurology, experts in the field - from basic scientists to skilled neurosurgeons, provide up-to-date synopses of each topic as it relates directly to this class of tumor. Surgical and radiation therapy, which remain the mainstays of treatment, are a major focus, but coverage also includes potential molecular avenues for the development of effective medical treatments. This book serves as a comprehensive review of the neurosurgical issues surrounding this extremely common brain tumor. Few procedures in surgery are

more immediately formidable than an attack upon a large tumor of this type, hence the greatest challenge of treatment is the need to complete tumor removal without creating new neurologic deficit. Provides current reviews of neurosurgical issues, such as endoscopic surgery, molecular biology of meningiomas, and the role of different radiation oncology treatment modalities and drug therapies Addresses multiple patient populations – children, elderly and those with multiple or radiation-induced tumor Offers a strong focus on anatomy and surgical approaches Edited work featuring leaders in neurosurgery and neuro-oncology around the globe – the broadest, most expert coverage available
