Innocent Erin Kinsley,2020-07-15 A MURDER TEARS A TOWN APART. BUT WHO IS THE KILLER? 'Brilliant, compelling, heart-wrenching writing.'

PETER JAMES 'Full of twists and turns...this is a gripping and compelling read you won't want to put down' HEAT The pretty market town of Sterndale is a close-knit and caring community; the perfect place for friends Izzy and Laura to raise their children. But their lives are suddenly shattered following a brutal murder at a summer wedding...and everyone is terrified knowing a killer lives amongst them. Suddenly, Izzy doesn't know who she can trust while Laura sees suspicion and paranoia spreading through the town. As the police search for answers - and relationships begin to unravel - the secrets lurking beneath the pristine surface of Sterndale come to light...and the shocking truth will finally be revealed. A gripping and moving thriller with the emotional drama of series like BROADCHURCH and LIAR this is the perfect read for fans of Cara Hunter, Heidi Perks and Claire Douglas. Praise for Erin Kinsley's first novel FOUND, a BBC RADIO 2 BOOK CLUB CHOICE: 'An unputdownable thriller.' ELLY GRIFFITHS 'Sensitive and moving...but with a core of pure tension' SUNDAY TIMES 'One of those rare finds - a page turner that is equally remarkable for the beauty of the writing. It will suck you in and take you on a journey' JO SPAIN 'Gripping...once started, impossible to put down!' MINETTE WALTERS

FIB Nanostructures Zhiming M. Wang,2014-01-04 FIB Nanostructures reviews a range of methods, including milling, etching, deposition, and implantation, applied to manipulate structures at the nanoscale. Focused Ion Beam (FIB) is an important tool for manipulating the structure of materials at the nanoscale, and substantially extends the range of possible applications of nanofabrication. FIB techniques are widely used in the semiconductor industry and in materials research for deposition and ablation, including the fabrication of nanostructures such as nanowires, nanotubes, nanoneedles, graphene sheets, quantum dots, etc. The main objective of this book is to create a platform for knowledge sharing and dissemination of the latest advances in novel areas of FIB for nanostructures and related materials and devices, and to provide a comprehensive introduction to the field and directions for further research. Chapters written by leading scientists throughout the world create a fundamental bridge between focused ion beam and nanotechnology that is intended to stimulate readers' interest in developing new types of nanostructures for application to semiconductor technology. These applications are increasingly important for the future development of materials science, energy technology, and electronic devices. The book can be recommended for physics, electrical engineering, and materials science departments as a reference on materials science and device design.

iOpener: Our Mysterious Universe Laura Langston,2015-06-01 This book covers everything you need to know about the universe, including information on our solar system, stars, galaxies, and the Big Bang. Diagrams, fun fact boxes, and photographs bring the subject to life, while a glossary, an index, and discussion questions aid in reading comprehension. Grade: 6 Subject: Earth Science Genre: Informational Text Comprehension Skill/Strategy: Summarize Diagnostic Reading Assessment (DRA): 60 Guided Reading Level: V Lexile Level: 790L DK's iOpeners equip K-6 students with the skills and strategies they need to access and comprehend nonfiction so that they are not only learning to read but reading to learn. The

combination of high-interest content and eye-popping photography of iOpeners brings science, math and social studies topics to life, raises student achievement in reading, and boosts standardized test scores.

Redesigning Ireland's Transport for Net Zero Towards Systems that Work for People and the Planet OECD,2022-10-05 Current mobility patterns in Ireland are incompatible with the country's target to halve emissions in the transport sector by 2030. While important, electrification and fuel efficiency improvements in vehicles are insufficient to meet Ireland's ambitious target: large behavioural change in the direction of sustainable modes and travel reductions are needed.

Annual Report of the City Engineer Providence (R.I.). Engineer Department,1908

Bayanihan and Belonging Alison R. Marshall,2018-02-05 Filipinos make up one of the largest immigrant groups in Canada and the majority continue to retain their Roman Catholic faith long after migrating. Drawing on archival and ethnographic research in Canada and the Philippines from 1880 to 2017, Bayanihan and Belonging aims to understand the role of religion within present-day Filipino Canadian communities. With a focus on Winnipeg, home to Canada's oldest and largest Filipino Canadian community, Alison R. Marshall showcases current church-based and domestic religious routines of migrant Filipinos. From St. Edward the Confessor Church, the principal site of worship for Filipino Catholics in Manitoba, to home chapels, and healing traditions, Marshall explores the day-to-day celebrations of bayanihan, or communal spirit. Drawing on experiences from Manitoba's Filipino population, Bayanihan and Belonging reveals that religious practise fulfills not only a need for spiritual guidance, but also for community.
