TransMath Peregrina Quintela,Ana Belén Fernández,Adela Martínez,Guadalupe Parente,María Teresa Sánchez,2012-10-08 The book TransMath - Innovative Solutions from Mathematical Technology has been conceived as a tool for the dissemination of scientific knowledge. This publication is addressed to those companies with innovation needs that could be met through mathematical technology. The book maps both existing and possible interactions and connections that enable technology transfer between Spanish mathematical research and industrial and business sectors. Businesses can determine the level of implementation and demand for such technology within their sector and understand the benefits and innovations achieved in other companies and industries with the application of mathematical techniques. The information is classified into eleven sectors of economic activity: Biomedicine & Health; Construction; Economics & Finance; Energy & Environment; Food; ICT; Logistics & Transport; Management & Tourism; Metal & Machinery; Public Administration; and Technical Services.

Fábricas de Software: Experiencias, Tecnologías y Organización. 2ª Ed. Mario G. Piattini Velthuis,2012-03-28 La fabricación de software es uno de los sectores de mayor crecimiento en los últimos años y representa, cada vez más, una de las principales actividades económicas tanto en los países desarrollados como para los países en vías de desarrollo. Y es que, en efecto, el software se halla presente en la actualidad en la mayor parte de los sistemas que resultan vitales para el funcionamiento y progreso de las sociedades modernas. El concepto de fábrica de software cumple ya más de cuarenta años, desde que en 1968 Bemer lo mencionara por primera vez y afirmara que:

“parece que tenemos pocos entornos específicos (instalaciones de fábrica) para la producción económica de programas...”. Un año después, se crearía la primera fábrica de software: Hitachi Software Works. Desde entonces, el término fábrica de software denota llevar a cabo el desarrollo y mantenimiento de software de forma comparable a la producción de otros productos industriales; eso si, salvando las peculiaridades del propio software. A pesar de ello, industrializar la fabricación de software ha demostrado que sirve para reducir los costes y el ciclo de vida de los productos, mejorando la calidad del software. En la última década se han publicado diversos estudios y estándares en los que se exponen los principios que se deben seguir para la fabricación de software, como modelos de mejora (CMMI, SPICE), desarrollo dirigido por modelos (MDA), líneas de producto (SPL), servicios Web, el desarrollo global de software, etc.; que complementan otras cuestiones más conocidas pero por ello no menos importantes en el desarrollo de software como: la gestión de requisitos, las pruebas, la gestión de la configuración, etc. Todo ello además debe venir complementado por aspectos organizativos y de gestión que resultan clave para el éxito de la fabricación de software. La presente obra reúne las contribuciones de los mayores especialistas en aspectos relacionados con la fabricación de software, por lo que se ofrece una visión amplia sobre diferentes factores que se deben tener en consideración para la puesta en marcha y la gestión de una fábrica de software. Además, incluye la experiencia práctica de 13 fábricas de software, grandes y pequeñas, de España, Argentina, México y Venezuela. Frente a la primera edición, en esta segunda se han revisado y modificado todos los capítulos de acuerdo a los cambios que se han producido a lo largo de los tres últimos años en la “evolutiva” Industria del Software. Además, se ha contado con la colaboración de nuevas empresas en el apartado de experiencias y la aportación del Instituto Nacional de Tecnologías de la Información (INTECO) con su visión sobre las factorías de software en España. El libro va dirigido a directores generales (CEO, Chief Executive Officers) de organizaciones, directores de informática (CIO, Chief Information Officers) y directores de desarrollo de sistemas de información de las mismas, personal informático en general (jefes de proyecto, analistas, consultores, etc.) que esté trabajando en el área de desarrollo y mantenimiento de software, así como responsables de calidad de sistemas de información y mejora de procesos software.

The Biology of Island Floras David Bramwell, Juli Caujapé-Castells, 2011-07-21 Oceanic islands offer biologists unparalleled opportunities to study evolutionary processes and ecological phenomena. However, human activity threatens to alter or destroy many of these fragile ecosystems, with recent estimates suggesting that nearly half of the world's insular endemics are threatened with extinction. Bringing together researchers from around the world, this book illustrates how modern research methods and new concepts have challenged accepted theories and changed our understanding of island flora. Particular attention is given to the impact of molecular studies and the insights that they provide into topics such as colonisation, radiation, diversification and hybridisation. Examples are drawn from around the world, including the Hawaiian archipelago, Galapagos Islands, Madagascar and the Macronesian region. Conservation issues are also highlighted, with coverage of alien species and the role of ex situ conservation providing valuable information that will aid the formulation of management strategies and genetic rescue programmes.

Robotic Sailing 2017 Kjell Ivar Øvergård, 2018-02-23 Robotic Sailing 2017. This book contains the peer-reviewed papers presented at the 10th International Robotic Sailing Conference which was organized in conjunction with the 10th World Robotic Sailing Championship held in Horten, Norway the 4th-9th of September 2017. The seven papers cover topics of interest for autonomous robotic sailing which represents some of the most challenging research and development areas. The book is divided into two parts. The first part contains papers which focus on the design of sails and software for the assessment and predication of sailboat performance as well as software platforms and middleware for sailboat competition and research. The second part includes algorithms and strategies for navigation and collision avoidance on local, mid- and long range. The differences in approach in the included papers show that robotic sailing is still an emerging cross-disciplinary science. The multitude of suggestions to the specific problems of prediction and simulation of sailboats as well as the challenges of route planning, anti-grounding and collision avoidance are good indicators of science in its infancy. Hence, we may expect the future to hold great advances for robotic sailing.

Sociedad Digital en España 2020-2021 Fundación Telefónica, 2021-06-01 El año 2020 ha supuesto un antes y un después en el mundo en que vivimos. Por primera vez en tiempos recientes una pandemia global ha obligado a confinar a gran parte de la población mundial y a limitar el libre movimiento de las personas. Gracias a las tecnologías digitales, una parte nada desdeñable de la actividad económica pudo seguir funcionando en las redes y el teletrabajo se convirtió en norma para garantizar la continuidad. España ha superado la prueba de fuego que ha impuesto la crisis, lo que ha puesto en evidencia la robustez de sus infraestructuras de comunicaciones, que han sido capaces de soportar un súbito e inesperado aumento del tráfico en la red. La presente edición del informe Sociedad Digital en España se adentra en el análisis de los efectos de la COVID-19 sobre los hábitos tecnológicos

de las empresas y los ciudadanos españoles, y refleja, a la vez, el estado de desarrollo de las infraestructuras y los servicios de telecomunicaciones, así como el grado de avance en la innovación y el despliegue de las principales tecnologías de vanguardia. Como en años anteriores, este trabajo parte de tres fuentes de información: la procedente de los principales indicadores sobre el ecosistema digital, tanto nacionales como internacionales, otra que emana de las encuestas a clientes de las unidades de negocio de Telefónica y, finalmente, una visión territorial desde las comunidades autónomas. Sociedad Digital en España pretende reflejar el camino que está siguiendo nuestro país para convertirse en una sociedad en red, una transformación que se ha visto acelerada por la crisis sanitaria que presenta numerosos desafíos, el más importante de los cuales es conseguir que nadie se quede atrás, garantizando una transición inclusiva.

Psychological Interventions for Psychosis Juan Antonio Díaz-Garrido, Raquel Zúñiga, Horus Laffite, Eric Morris, 2023-05-27 This book shows how psychological and social interventions can help people with psychosis. It brings together both theoretical chapters that contribute to the reconceptualization of psychosis and clinical cases illustrating how contemporary psychotherapeutic intervention models can be applied in the treatment of this mental health condition, with reflections, strategies and practical guidelines demonstrating how these models can inform professional practice in mental healthcare. Chapters brought together in this volume aim to reflect a paradigm shift in psychosis care. They present person-centered models that lead to a way of seeing, understanding and treating psychosis that is very different from the traditional biomedical model. Current authors and approaches are revolutionizing an outdated model trapped in purely pharmacological actions and tautological explanations of a biological nature, where symptom control is the basic and fundamental form of approach, and in which psychotherapeutic actions take second place as subsidiary to the former. Approaches such as Acceptance and Commitment Therapy, Acceptance and Recovery Therapy by Levels, Open Dialogue, Compassion-Centered Therapy or the Hearing Voices movement, to name but a few of those presented in this book, represent a journey of self-knowledge and learning for those recovering from psychosis, and have an intense transformative potential for the therapeutic team. The fundamental principle that guides this book is to share models belonging to psychology that aim at personal development while respecting the needs, values and goals of each person, and that can be adopted by any professional or student of clinical psychology, psychiatry, nursing, social work or any other discipline searching for more humanistic approaches to treat psychosis.

Reconfigurable Computing: Architectures and Applications Koen Bertels, 2006-07-26 This book constitutes the thoroughly refereed post-proceedings of the Second International Workshop on Reconfigurable Computing, ARC 2006, held in Delft, The Netherlands, in March 2006. The 22 revised full papers and 35 revised short papers presented were thoroughly reviewed and selected from 95 submissions. The papers are organized in topical sections on applications, power, image processing, organization and architecture, networks and communication, security, and tools.

StarBriefs 2001 , 2012-12-06 This compilation probably looks like one of the craziest things a human being could

spend his or her time on. Yet nobody would wonder at someone taking a short walk every day - after twenty five years that person would have covered a surprisingly long distance. This is exactly the story behind this list, which appeared first as a few pages within the directory StarGuides (or whatever name it had at that time) and as a distinct sister publication since 1990. The idea behind this dictionary is to offer astronomers and related space scientists practical assistance in decoding the numerous abbreviations, acronyms, contractions and symbols which they might encounter in all aspects of the vast range of their professional activities, including traveling. Perhaps it is a bit paradoxical, but if scientists quickly grasp the meaning of an acronym solely in their own specific discipline, they will probably encounter more difficulties when dealing with adjacent fields. It is for this purpose that this dictionary might be most often used. Scientists might also refer to this compilation in order to avoid identifying a project by an acronym which already has too many meanings or confused definitions.
