⚑ Mad Professor Rudy Rucker,2009-06-17 At the untamed frontiers of intelligence, consciousness, matter, and reality lies Rudy Rucker's The Mad Professor, a collection of twelve mind-bending science fiction stories that probe the outer limits of possibility. Rucker, an accomplished computer scientist and mathematician with numerous science books and novels to his credit, brings his deep and varied knowledge of the mind, mathematics, and the ever-weird and wondrous workings of the physical universe to the stories collected here. In Chu and the Nants we read of a bizarre future following a Verge Singularity, in which hyperintelligent computers have taken over the solar system. Panpsychism Proved breaks down the boundaries between mind and matter, exploring the notion that every object has a mind. And Six Thought Experiments Concerning the Nature of Computation is an exhilarating collection of mini-stories taking us to the outrageous extremes of theoretical speculation. In The Mad Professor, Rucker deploys the full range of his writing talent and scientific knowledge to take us on a wild romp through the known, the unknown, and the awesomely peculiar.

⚑ The Hunt for Resident Evil 1.5 Richard Mandel,2019-01-10 Do you like tales of lost treasure? This is the story of a quest to find a lost treasure . . . only it wasn't your typical treasure. It wasn't a chest full of pirate gold and jewels or a cave full of riches from a long-forgotten kingdom. It wasn't some prized antique or rare collectible, or even a chance discovery made in someone's garage sale or a backroad flea market stall. The item in question was a lost video game. That's right, a lost video game, one that had almost been completed but was canceled only three months prior to its planned release date and, in the time that followed, would become something of a legend among video game fans. It was the original version of the video game that fans have come to know and love as Resident Evil 2. That original version was the treasure being sought. This is the story of the fourteen-year search by a group of dedicated fans from around the world to find a playable development build of that lost original game. This is the story of how a build was finally tracked down, incomplete and badly broken, and how those fans took it upon themselves to both finish the game and make it fully playable. This is also the story of how that effort went awry and how another group of fans had to take action in order to ensure that this original and unaltered development build, despite its incompleteness and many other flaws, finally saw the light of day. This is the story of the hunt for Resident Evil 1.5.

Life Is A Game Mev Dinc,2021-08-22 Life Is A Game tracks the fascinating life and successful career of legendary game developer Mev Dinc. The story begins in a mountainous Black Sea village; his father left him and his mother when Mev was only six months old, and with no home and thrown into poverty, they were left to survive the harsh winters alone. By the time he'd arrived in the UK in 1979, he had an English wife but couldn't speak a word of English. He then bought a ZX Spectrum in 1983 without any desire to use it. But through his resilience and ingrained will to overcome any obstacles, he learned to speak English, and taught himself programming and game development - all in two years! The rest, as they say, is history! This incredible story shows how Mev Dinc came from these humble beginnings and ended up becoming an award-winning developer, a member of BAFTA and the founding father of the Turkish Gaming Sector. This intriguing rags-to-riches tale will inspire as much as it entertains. Mev is a legend! - Jon Dean. A fantastic career - Steve Merrett I'm proud of Mev's achievements - Jon Hare. I both admire and hold Mev as a dear friend. - Charles Cecil A true Turkish Gaming Legend - Ulas Karademir
