  Beginning Azure Cognitive Services Alicia Moniz,Matt Gordon,Ida Bergum,Mia Chang,Ginger Grant,2021-09-01 Get started with Azure Cognitive Services and its APIs that expose machine learning as a service. This book introduces the suite of Azure Cognitive Services and helps you take advantage of the proven machine learning algorithms that have been developed by experts and made available through Cognitive Services, easily integrating those algorithms into your own applications without having to develop the algorithms from scratch. The book also shows you how to use the algorithms provided by Cognitive Services to accelerate data analysis and development within your organization. Each chapter contains the information you need to implement artificial intelligence (AI) via Azure Cognitive Services in your personal and professional projects.   Implementing the Stakeholder based Goal-Question-Metric (GQM) Measurement Model for Software Projects Dr. Prashanth Harish Southekal,2014-06-25 Software projects today are often characterized by poor quality, schedule overruns and high costs. One of the approaches to address the poor success rate is to track the project progress with a stakeholder driven measurement model that is objective and validated - theoretically and empirically. In this backdrop, based on the Goal-Question-Metric (GQM) model this book proposes a generic and objective measurement model for a software project with eight key measures based on the value propositions of the stakeholders. The measurement model is validated (i) theoretically with measurement theory criteria and (ii) empirically with case studies and a global survey representing IT industry practitioners.

  c't Working with AI c't-Redaktion,2024-01-24 The special issue of c't KI-Praxis provides tests and practical instructions for working with chatbots. It explains why language models make mistakes and how they can be minimised. This not only helps when you send questions and orders to one of the chatbots offered online. If you do not want to or are not allowed to use the cloud services for data protection reasons, for example, you can also set up your own voice AI. The c't editorial team explains where to find a suitable voice model, how to host it locally and which service providers can host it. The fact that generative AI is becoming increasingly productive harbours both opportunities and risks. Suitable rules for the use of AI in schools, training and at work help to exploit opportunities and minimise risks.
