**Photography and Italy** Maria Antonella Pelizzari,2010-11-15 In this beautifully illustrated book Maria Antonella Pelizzari traces the history of photography in Italy from its beginnings to the present as she guides us through the history of Italy and its ancient sites and Renaissance landmarks. Pelizzari specifically considers the role of photography in the formation of Italian national identity during

times of political struggle, such as the lead up to Unification in 1860, and later in the nationalist wars of Mussolini's regime. While many Italians and foreigners— such as Fratelli Alinari or Carlo Ponti, John Ruskin or Kit Talbot—focused their lenses on architectural masterpieces, others documented the changing times and political heroes, creating icons of figures such as Garibaldi and the brigands. Pelizzari's exploration of Italian visual traditions also includes the photographic collages of Bruno Munari, the neorealist work of photographers such as Franco Pinna, the bold stylized compositions of Mario Giacomelli, and the controversial images created by Oliviero Toscani for Benetton advertising in the 1980s. Featuring unpublished works and a rare selection of over one hundred images, this book will appeal to art collectors and students of art history and Italian culture.

*Neorealist Architecture* David Escudero, 2022-10-31 \*\*\*Winner of the American Association for Italian Studies Book Prize 2022\*\*\* After World War II, a wave of Italian films emerged that depicted the life and hardships of characters left helpless after the conflict, bringing to the screen the struggles of a time of existential angst and uncertainty. This form of filmmaking was associated with a broader artistic phenomenon known as 'neorealism' and is now considered a pivotal point in the history of Italian cinema. But neorealism was not limited to film any more than it was to literature. It spread to other areas of artistic production, including architecture. What was, then, neorealist architecture? This book explores the links between architecture, filmmaking and the built environment in dopoguerra Italy (194X-195X) seeking to ascertain whether, and how, neorealism manifested itself in architecture. Terms such as 'neorealist architecture' or 'architectural neorealism' were hinted at in these years and recalled by historians of architecture in the following decades. Therefore, the concept was adopted ad hoc and popularized post hoc, in the absence of any declarations prior to 1955 that proclaimed what neorealism in architecture was or wanted to be. However, while the concept has been internalized by Italian architectural history, transfers between neorealism—as an aesthetic and ethic—and architecture—as one potential medium of its embodiment or expression—are still not fully understood. Therefore, its main goal is to provide an in-depth discussion of the concept 'neorealist architecture', the working assumption being that the connection between both terms is not meaningless. The book is beautifully illustrated with over 100 black and white archival images and is the first book to be published on neorealism in architecture. It will appeal to scholars, professionals, and students interested in history and theory of architecture, Italian studies, art history, and cultural studies.

**Italian Neorealist Cinema** Christopher Wagstaff, 2007-01-01 The end of the Second World War saw the emergence in Italy of the neorealism movement, which produced a number of films characterized by stories set among the poor and working class, often shot on location using non-professional actors. In this study Christopher Wagstaff provides an in-depth analysis of neorealist film, focusing on three films that have had a major impact on filmmakers and audiences around the world: Roberto Rossellini's *Roma città aperta* and *Paisà* and Vittorio De Sica's *Ladri di biciclette*. Indeed, these films are still, more than half a century after they were made, among the most highly regarded works in the history of cinema. In this insightful and carefully researched work, Wagstaff suggests that the importance of these films is largely due to the aesthetic and rhetorical qualities of their assembled sounds and images rather than, as commonly thought, their particular representations of historical reality. The author begins by situating neorealist cinema in its historical, industrial, commercial, and cultural context. He goes on to provide a theoretical discussion of realism and the merits of neorealist films, individually and collectively, as aesthetic artefacts. He follows with a detailed analysis of the three films, focusing on technical and production aspects as well as on the significance of the films as cinematic works of art. While providing a wealth of

information and analysis previously unavailable to an English-speaking audience, Italian Neorealist Cinema offers a radically new perspective on neorealist cinema and the Italian art cinema that followed it.

*Italian Neorealist Photography* Antonella Russo, 2021-12-30 This book offers an analysis of the socio-historical conditions of the rise of postwar Italian photography, considers its practices, and outlines its destiny. Antonella Russo provides an incisive examination of Neorealist photography, delineates its periodization, traces its instances and its progressive popularization and subsequent co-optation that occurred with the advent of the industrialization of photographic magazines. This volume examines the ethno(photo)graphic missions of Ernesto De Martino in the deep South of Italy, the key role played by the Neorealist writer and painter Carlo Levi as ambassador of international photography, and the journeys of David Seymour, Henry Cartier Bresson, and Paul Strand in Neorealist Italy. The text includes an account the formation and proliferation of Italian photographic associations and their role in institutionalizing and promoting Italian photography, their link to British and other European photographic societies, and the subsequent decline of Neorealism. It also considers the inception of non-objective photography that thrived soon after the war, in concurrence with the circulation of Neorealism, thus debunking the myth identifying all Italian postwar photography with the Neorealist image. This book will be particularly useful for scholars and students in the history and theory of photography, and Italian history.

Therefore the thematic focus of the essays in this volume is the history of music in Italy, covering the whole period from the 16th to the 21st centuries.
