**Developer's Workshop to COM and ATL 3.0** Andrew W. Troelsen, 2000-06-30 Microsoft's Component Object Model is one of the most important concepts in software development today. Developer's Workshop to COM and ATL 3.0 provides an in-depth treatment of COM and shows how to adopt a component framework, namely ATL, to help lessen the burden of repetitive code. Every chapter contains integrated lab assignments that give you numerous opportunities to build COM clients and servers using raw C++ and IDL, as well as the Active Template Library. The book is divided into five sections, each focusing on a particular aspect of COM and ATL development. The book begins with a review of object-oriented and interface-based programming techniques, then moves into the core aspects of COM, including a full examination of language independence and location transparency. The author illustrates the numerous CASE tools used during ATL development and discusses apartments, COM exceptions, object identity, and component housing, in addition to various advanced concepts such as COM categories and tear-off interfaces. The fourth section examines a number of "COM patterns" such as enumerators, collections, scriptable objects, and callback interfaces. The book closes with an investigation of using ATL as a windowing framework and wraps up with the development of a full-blown animated ActiveX control using ATL. Learn how to build Visual Basic, Java, C++, and web-based COM clients; use common VBA programming structures such as conditions, loops, arrays, and collections; master ATL's integrated CASE tools; dive into the details of object identity and the ATL COM map; build COM object models and leverage the ATL object map; develop full ActiveX controls with ATL.

**Engineering and Engineers** Michael Ciaran Duffy, 2002 This volume is devoted to the history of engineers from the 16th to the 20th century. It begins with two general papers, the first one by M. Duffy on the nature of engineering, the other by E. Knobloch on engineers of the Renaissance and their illustrated manuscripts. The other papers deal with the training of engineers, their methods, and role in the international technological transfers as well as the biography of some famous engineers.

**What's the Best Move?** Larry Evans, 1995-04 Through the use of instructive quizzes, Evans teaches players to initiate moves, try out new ideas based on the objectives they are seeking in a specific game, and evaluate their progress and ingenuity along the way.

**Building a StoryBrand** Donald Miller, 2017-10-10 More than half-a-million business leaders have discovered the power of the StoryBrand Framework, created by New York Times best-selling author and marketing expert Donald Miller. And they are making millions. If you use the wrong words to talk about your product, nobody will buy it. Marketers and business owners struggle to effectively connect with their customers, costing them and their companies millions in lost revenue. In a world filled with constant, on-demand distractions, it has become near-impossible for business owners to effectively cut through the noise to reach their customers, something Donald Miller knows first-hand. In this book, he shares the proven system he has created to help you engage and truly influence customers. The StoryBrand process is a proven solution to the struggle business leaders face when talking about their companies. Without a clear, distinct message, customers will not understand what you can do

for them and are unwilling to engage, causing you to lose potential sales, opportunities for customer engagement, and much more. In *Building a StoryBrand*, Donald Miller teaches marketers and business owners to use the seven universal elements of powerful stories to dramatically improve how they connect with customers and grow their businesses. His proven process has helped thousands of companies engage with their existing customers, giving them the ultimate competitive advantage. Building a StoryBrand does this by teaching you: The seven universal story points all humans respond to; The real reason customers make purchases; How to simplify a brand message so people understand it; and How to create the most effective messaging for websites, brochures, and social media. Whether you are the marketing director of a multibillion-dollar company, the owner of a small business, a politician running for office, or the lead singer of a rock band, Building a StoryBrand will forever transform the way you talk about who you are, what you do, and the unique value you bring to your customers.

**How to Open a Chess Game** Larry Evans, Paul Keres, Tigran Petrosian, 2009 This is one of the most interesting, most unusual and most instructive chess books ever written. It is the combined work of seven of the world's strongest grandmasters: Larry Evans, Paul Keres, Svetozar Gligoric, Vlastimil Hort, Bent Larsen, Tigran Petrosian and Lajos Portisch. What makes this book especially great and useful is that each of these seven grandmasters had vastly different styles. For example, Bent Larsen used wild, unorthodox attacking lines, whereas Petrosian, who was capable of attacking when he wanted to, preferred to sniff out his opponent's chances and wait for the opponent to attack unsoundly and fall upon his own sword.
