John J. MacAloon

This Great Symbol John J. MacAloon, 2013-09-13 This Great Symbol is the definitive study of the origins of the modern Olympic Games and of their founder, Pierre de Coubertin, whose ideological stamp the Olympics still bear. Behind this fascinating blend of biography and history lies an impressive framework of cultural, social, and psychological theories skilfully employed to interpret the creation and symbolism of the modern Olympic Games. Hailed as both a classic in sport history and as a paradigmatic study in the anthropology of the past, This Great Symbol helped launch the new collaboration between historians and cultural anthropologists that continues to mark the human sciences worldwide. For this 25th anniversary edition, Professor MacAloon adds a new preface evaluating subsequent scholarship on Coubertin and the Olympic origins and a highly personal afterword describing the impact of This Great Symbol on his own subsequent career as an Olympic anthropologist and cultural performance theory. This book was published as a special issue of the International Journal of the History of Sport.

The Legacies of Jean-Luc Godard Douglas Morrey, Christina Stojanova, Nicole Côté, 2014-06-18 The artistic impact of Jean-Luc Godard, whose career in cinema has spanned over fifty years and yielded a hundred or more discrete works in different media cannot be overestimated, not only on French and other world cinemas, but on fields as diverse as television, video art, gallery installation, philosophy, music, literature, and dance. The Legacies of Jean-Luc Godard marks an initial attempt to map the range and diversity of Godard's impact across these different fields. It contains reassessments of key films like *Vivre sa vie* and *Passion* as well as considerations of Godard's influence over directors like Christophe Honoré. Contributors look at Godard's relation to philosophy and influence over film philosophy through reference to Wittgenstein, Deleuze, and Cavell, and show how Godard's work in cinema interacts with other arts, such as

painting, music, and dance. They suggest that Godard's late work makes important contributions to debates in memory and Holocaust Studies. The volume will appeal to a non-specialist audience with its discussions of canonical films and treatment of themes popular within film studies programs such as cinema and ethics. But it will also attract academic specialists on Godard with its chapters on recent works, including *Dans le noir du temps* (2002) and *Voyage(s) en utopie* (2006), interventions in long-running academic debates (Godard, the Holocaust, and anti-Semitism), and treatment of rarely discussed areas of Godard's work (choreographed movement).

Jean-Luc Godard Jean-Luc Godard, 1998 Collected interviews with the French director of *Breathless* and *Hail Mary*

Leadership Team Alignment Frédéric Godart, Jacques Neatby, 2023-08-22 Debunking much of the received wisdom regarding the sources of leadership team dysfunctionality, *Leadership Team Alignment* presents a targeted strategy for building and managing a top executive team to gain competitive advantage. Frédéric Godart and Jacques Neatby bring a wealth of practical experience and in-depth knowledge, with over eight hundred hours of direct observation with more than fifty leadership teams across the globe and thousands of hours working with executives. With this book, they offer solutions to manage conflict and create environments that effectively address misalignments in organizations. Godart and Neatby take readers through the dual role of leadership team members, the challenges of power games, and the risks of siloed leaders. They give clear advice on how to improve aspects of any leadership team, based on its size and structure and the nature of the organization. While organizational challenges may be inevitable, this book provides leadership teams the tools to correctly diagnose leadership team misalignment, with evidence-based remedies and strategically oriented interventions to maximize organizational performance.

Play the Budapest Gambit Andrew Martin, The Budapest Gambit 1 d4 Nf6 2 c4 e5) is an aggressive, dynamic approach for meeting 1 d4 and is a great line for throwing opponents onto their own resources. It is certainly double-edged as Black moves the same piece twice early on and also sacrifices a pawn. This pawn is often quickly regained but one of the great advantages of the Budapest is that if White tries to hang on to the pawn (and many players do) Black can quickly whip up a ferocious attack. A great number of materialistic but unprepared White players have found themselves swiftly demolished by Black's tremendously active pieces. When White is more circumspect and allows Black to regain the pawn, play proceeds along more sedate strategic lines where Black enjoys free and easy development. Experienced chess author and coach Andrew Martin examines all key variations of the Budapest. There is an emphasis on typical middlegame structures and the important plans and manoeuvres are demonstrated in numerous instructive games. * Includes complete repertoires for Black with both 3...Ng4 and 3...Ne4 * Comprehensive coverage featuring several new ideas * Take your opponents out of their comfort zone!

Advances in Visual Computing George Bebis, Richard Boyle, Bahram Parvin, Darko Koracin, Baoxin Li, Fatih Porikli, Victor Zordan, James Klosowski, Sabine Coquillart, Xun Luo, Min Chen, David Gotz, 2013-10-15 The two volume sets LNCS 8033 and 8034 constitutes the refereed proceedings of the 9th International Symposium on Visual Computing, ISVC 2013, held in Rethymnon,

Crete, Greece, in July 2013. The 63 revised full papers and 35 poster papers presented together with 32 special track papers were carefully reviewed and selected from more than 220 submissions. The papers are organized in topical sections: Part I (LNCS 8033) comprises computational bioimaging; computer graphics; motion, tracking and recognition; segmentation; visualization; 3D mapping, modeling and surface reconstruction; feature extraction, matching and recognition; sparse methods for computer vision, graphics and medical imaging; face processing and recognition. Part II (LNCS 8034) comprises topics such as visualization; visual computing with multimodal data streams; visual computing in digital cultural heritage; intelligent environments: algorithms and applications; applications; virtual reality.

Seeing from Scratch Richard Dienst, 2020-06-07 Taking as his starting point fifteen characteristically penetrating epigrams by Jean-Luc Godard, Richard Dienst invites us to trace a new path through some of the fundamental questions of cinema. Godard has never stopped offering lessons about seeing and thinking, always insisting that we have to learn how to start over. By starting over from scratch, Godard challenges us to rethink our

ideas about embodied perception, material form and the politics of making images. Less a commentary on Godard's oeuvre than an outline of a Godardian pedagogy, *Seeing from Scratch* offers a theoretical exercise book for students, teachers and practitioners alike, pursuing unexpectedly far-reaching ways to think through images. Along the way we encounter, in this brief, accessible essay, ideal for classroom use, a wide range of thinkers whose ideas are put to use working through the intellectual and aesthetic questions and challenges Godard's epigrams suggest – not in the abstract, but as part of the book's practical approach to intellectual problem solving. In its conversational tone, return to fundamentals and practical pedagogical approach, *Seeing from Scratch* is an essay for the media age in the mould of John Berger's *Ways of Seeing* from the 1970s: a new way of discussing the theory and practice of images and the film image. A companion piece, *The Postcard Game*, presents a scene from an imaginary classroom, where a stack of postcards – like those found throughout Godard's work – provokes a spiralling series of questions about images, texts and the manifold pathways of the creative process.

God of Battles Jake Thornton, Martin Buck, 2012-08-29 *God of Battles* is a tabletop fantasy battle game in which players command armies of model soldiers to fight against each other across Aren's troubled lands. I've tried to produce a game that is easy to learn and quick and fun to play, but which offers many tactical options and rewards players' skill. If you are new to all this, I've included some hints and tips throughout the book to help get you started. Have a look at the Scenario section as there's a piece in there about playing your first game, which should point you in the right direction. If you have played tabletop

battle games before, you will find some new ideas and a few unusual concepts in this one. They are no more complicated than in other games, less so in fact, they're just different. Have a game or two with only the Main Force part of your armies to get the hang of it and see what you think. It's hard to judge any game from a quick skim through the rules. Let it come alive on the tabletop! Above all, with God of Battles I designed the type of tabletop battle rules that I always wanted to play, where a group of friends could have a fun and characterful game that tells a good story. I hope you get as many hours of enjoyment from it as I have!
