Google Apps: The Missing Manual Nancy Conner, 2008-05-27 Among its many amazing applications, Google now has web-based alternatives to many of the applications in Microsoft Office. This comprehensive and easy-to-follow new book enables you to explore Google's new office applications in detail. Once you do, you'll be in good company -- more than 100,000 small businesses and some corporations are already looking to take advantage of these free Google offerings. Google Apps: The Missing Manual teaches you how to use three relatively new applications from Google: Docs and Spreadsheets, which provide many of the same core tools that you find in Word and Excel; and Google Calendar and Gmail, the applications that offer an alternative to Outlook. This book demonstrates how these applications together can ease your ability to collaborate with others, and allow you access to your documents, mail and appointments from any computer at any location. Of course, as remarkable as these applications are, Google's office suite is definitely a work-in-progress. Navigating what you can and can't do and -- more importantly -- understanding how to do it isn't always easy. And good luck finding enough help online. Google Apps: The Missing Manual is the one book you need to get the most out of this increasingly useful part of the Google empire. This book: Explains how to create, save and share each of Google's web-based office applications Offers separate sections for Docs and Spreadsheets, Google Calendar, and Gmail Demonstrates how to use these applications in conjunction with one another Gives you crystal-clear and jargon-free explanations that will satisfy users of all technical levels Many of you already use Gmail, but do you know its full potential? Do you know how you can increase its power by using Gmail with Docs and Spreadsheets and Google Calendar? You'll find out with Google Apps: The Missing Manual. You'll also come to understand why large corporations such as General Electric and Proctor & Gamble are taking a long, hard look at these applications.

Work Rules! Laszlo Bock, 2015-04-07 From the visionary head of Google's innovative People Operations comes a groundbreaking inquiry into the philosophy of work -- and a blueprint for attracting the most spectacular talent to your business and ensuring that they succeed. We spend more time working than doing anything else in life. It's not right that the experience of work should be so demotivating and dehumanizing. So says Laszlo Bock, former head of People Operations at the company that transformed how the world interacts with knowledge. This insight is the heart of Work Rules!, a compelling and surprisingly playful manifesto that offers lessons including: Take away managers' power over employees Learn from your best

employees-and your worst Hire only people who are smarter than you are, no matter how long it takes to find them Pay unfairly (it's more fair!) Don't trust your gut: Use data to predict and shape the future Default to open-be transparent and welcome feedback If you're comfortable with the amount of freedom you've given your employees, you haven't gone far enough. Drawing on the latest research in behavioral economics and a profound grasp of human psychology, *Work Rules!* also provides teaching examples from a range of industries-including lauded companies that happen to be hideous places to work and little-known companies that achieve spectacular results by valuing and listening to their employees. Bock takes us inside one of history's most explosively successful businesses to reveal why Google is consistently rated one of the best places to work in the world, distilling 15 years of intensive worker R&D into principles that are easy to put into action, whether you're a team of one or a team of thousands. *Work Rules!* shows how to strike a balance between creativity and structure, leading to success you can measure in quality of life as well as market share. Read it to build a better company from within rather than from above; read it to reawaken your joy in what you do.

The Search John Battelle,2005-09-08 What does the world want? According to John Battelle, a company that answers that question—in all its shades of meaning—can unlock the most intractable riddles of business and arguably of human culture itself. And for the past few years, that's exactly what Google has been doing. But *The Search* offers much more than the inside story of Google's triumph. It's a big-picture book about the past, present, and future of search technology and the enormous impact it's starting to have on marketing, media, pop culture, dating, job hunting, international law, civil liberties, and just about every other sphere of human interest.

I'm Feeling Lucky Douglas Edwards,2011-07-28 Comparing Google to an ordinary business is like comparing a rocket to a wheelbarrow. No

academic analysis or bystander's account can capture it. Now Douglas Edwards, Employee Number 59, takes readers inside the Googleplex for the closest look you can get without an ID card, giving readers a chance to fully experience the potent mix of camaraderie and competition that makes up the company that changed the world. Edwards, Google's first director of marketing and brand management, describes it as it happened. From the first, pioneering steps of Larry Page and Sergey Brin, the company's young, idiosyncratic partners to the evolution of the company's famously nonhierarchical structure (where every employee finds a problem to tackle or a feature to create and works independently), through the physical endurance feats of the company's engineers (both on and off the roller-hockey field) to its ethos to always hire someone smarter than yourself, *I'm Feeling Lucky* captures for the first time the unique, self-invented, culture of the world's most transformative corporation. Welcome to the Google Experience.

What Would Google Do? Jeff Jarvis, 2009-01-27 A bold and vital book that asks and answers the most urgent question of today: What Would Google Do? In a book that's one part prophecy, one part thought experiment, one part manifesto, and one part survival manual, internet impresario and blogging pioneer Jeff Jarvis reverse-engineers Google—the fastest-growing company in history—to discover forty clear and straightforward rules to manage and live by. At the same time, he illuminates the new worldview of the internet generation: how it challenges and destroys, but also opens up vast new opportunities. His findings are counterintuitive, imaginative, practical, and above all visionary, giving readers a glimpse of how everyone and everything—from corporations to governments, nations to individuals—must evolve in the Google era. Along the way, he looks under the hood of a car designed by its drivers, ponders a worldwide university where the students design their curriculum, envisions an airline fueled by a social network, imagines the open-source restaurant, and examines a series of industries and institutions that will soon benefit from this book's central question. The result is an astonishing, mind-opening book that, in the end, is not about Google. It's about you.

The Great Global Puzzle Challenge with Google Earth Clive Gifford, 2011-04-01 Discover the many wonders of the world in this amazing illustrated tour of some of the most interesting places on Earth. Each spread focuses on one destination, and the amazingly intricate artwork gives readers a visual flavour of the place, with masses to look at and discover the more you look. There are links from one place to the next - historical, geographical, natural history or just simple proximity - for example, there is an ancient Egyptian obelisk in NY's central park, with two sister obelisks in Paris and London. Find the one in the Central Park using Google(TM) Earth co-ordinates and it gives you the clue to where you will be going next. The pyramids at the Louvre in Paris will whisk you off to the temples of Ancient Egypt, then find a connection from the Colosseum of Ancient Rome to the hot plains of Tanzania that team with wildlife, from flocks of flamingos to herds of wildebeest to prides of lions. The crater is actually a collapsed volcano; this knowledge then helps speed you to Mount Fuji and Tokyo. . . and so on. In each location you have to find a souvenir to take with you. You will also need to solve a puzzle with the help of Google(TM) Earth to collect co-ordinates for your final secret location - again on Google(TM) Earth. For instance, the puzzle tells you to visit the Statue of Liberty on Google(TM) Earth and to count the number of points on its crown. This number is one of the co-ordinates you need to find your final destination at the end of the book.
