Going Chromebook Brian Schell,2019-05-03 In the first book, *Going Chromebook: Living in the Cloud*, we looked at Chromebooks and the various software options available for them, and we decided whether or not the cloud lifestyle was for you. If you've gotten this far, then the answer was a confident Yes! Now it's time to look into specific apps and how to use them. First up is Google's own word processing system, Google Docs. It was Google's first and most well-known cloud app. It's also the most mature and, arguably, the most powerful. If you need to do any writing, whether a simple shopping list or a full-length book, Google Docs is the tool to use. This book begins by introducing you to the differences between Google Docs and the competing online office suites. We'll also look into Google's free and paid tiers for Google Docs/G Suite, and which one works out best for your needs. Next, there's a short review chapter on how to manipulate, delete, copy, and do various file operations within the Google Drive file manager. After that, we'll go through every single command and menu, every toolbar, and all the hidden options. This is the bulk of the material, and no stone (or menu) is left unturned. This includes voice transcription, translation, citations and footnotes, embedding Google Sheets and Slides, and all the other special things Docs can do for you. Lastly, for the things that Google Docs still just can't do, we will look at some of the very best third-party add-ons for Docs, allowing you to do all sorts of wild tasks. You already know the benefits of working in the cloud-- Now it's time to learn how to get the most out of it!

**What Would Google Do?** Jeff Jarvis,2009-01-27 A bold and vital book that asks and answers the most urgent question of today: *What Would Google Do?* In a book that's one part prophecy, one part thought experiment, one part manifesto, and one part survival manual, internet impresario and blogging pioneer Jeff Jarvis reverse-engineers Google—the fastest-growing company in history—to discover forty clear and straightforward rules to manage and live by. At the same time, he illuminates the new worldview of the internet generation: how it challenges and destroys, but also opens up vast new opportunities. His findings are counterintuitive, imaginative, practical, and above all visionary, giving readers a glimpse of how everyone and everything—from corporations to governments, nations to individuals—must evolve in the Google era. Along the way, he looks under the hood of a car designed by its drivers, ponders a worldwide university where the students design their curriculum, envisions an airline fueled by a social network, imagines the open-source restaurant, and examines a series of industries and institutions that will soon benefit from this book's central question. The result is an astonishing, mind-opening book that, in the end, is not about Google. It's about you.
