Diachronic Perspectives on Address Term Systems Irma Taavitsainen, Andreas H. Jucker, 2003-06-23 Address term systems and their diachronic developments are discussed in a wide range of European languages in this volume. Most chapters focus on pronominal systems, and in particular on the criteria that govern the choices between a more intimate and a more distant or polite pronoun, as for instance thou and you in Early Modern English, vos and vuestra merced in sixteenth century Spanish or du and Sie in Modern German. Several contributions deal with situations in which more than two terms can be used and several also note co-occurrence patterns of pronominal and nominal forms of address. The volume provides a multivariied picture of the evolutionary lines of address term systems and a representative range of current approaches from pragmatics and sociolinguistics to conversation analysis. It is thus a timely contribution to the rapidly expanding field of historical pragmatics.

The Art of Connection Michael J. Gelb, 2017-08-15 These days, it's often easier to avoid face-to-face contact in favor of technological shortcuts. But as Michael Gelb argues in this compelling, entertaining book, the meaningful

relationships that come from real interaction are the key to creating innovative ideas and solving our most intractable problems. In *The Art of Connection*, Gelb offers readers seven methods of developing this essential rapport in their professional and personal lives. Each chapter covers specific techniques and illustrates them with memorable stories, relevant scientific research, and hands-on exercises that allow readers to apply their new skills. Most important, Gelb reminds us that developing rapport with others is not just a business tool to enhance productivity but a valuable end in itself. He guides us to cultivate the skills we all need to deepen our relationships, broaden our humanity, and transform our lives.
