Selling is Dead Marc Miller,Jason Sinkovitz,2012-06-29 A manifesto for reinventing the sales function Selling Is Dead argues that selling teams and growth-motivated organizations must change to remain competitive. It presents a new selling framework based on research that indicates that buyer behavior can be modeled and that large sales and small sales are fundamentally different. This new framework provides salespeople with a practical structure for giving buyers significantly more value for their dollar-value well beyond the products and services being sold. Rather than focusing on one selling model, regardless of the type of sale, this book offers four different types of large sales and presents specific strategies for succeeding at each. Many sales organizations are systematically mismanaging their selling opportunities and failing to optimize their markets. Through effective selling models, illustrative case studies and examples, and real-world anecdotes, Selling Is Dead brings strategy and efficiency to sales-and shows every sales-based business how to reap the rewards.

Research Handbook on the Law of Virtual and Augmented Reality Woodrow Barfield,Marc Jonathan Blitz,2018-12-28 Virtual and augmented reality raise significant questions for law and policy. When should virtual world activities or augmented reality images count as protected First Amendment 'speech', and when are they instead a nuisance or trespass? When does copying them infringe intellectual property laws? When should a person (or computer) face legal consequences for allegedly harmful virtual acts? The Research Handbook on the Law of Virtual and Augmented Reality addresses these questions and others, drawing upon free speech doctrine, criminal law, issues of data protection and privacy, legal rights for increasingly intelligent avatars, and issues of jurisdiction within virtual and augmented reality worlds.
