A Rustle in the Grass Robin Hawdon, 2014-12-08 'A peculiarly fascinating story.' The Guardian's Polly Toynbee Above ground the countryside stretches quietly, majestically beneath the changing skies. Peaceful and untroubled, far from the wars and woes of man, nature moves through her timeless cycles. But look closer. For in the secret world beneath the grasses lies an empire in turmoil. A revered leader had died and, as the enemy prepares its armies for war, rebellion is whispered through the undergrowth. There in the kingdom of the ants the old order crumbles and the new prepares for its explosive birth. No single insect, from magnificent war leader to defiant rebel, from wise elder statesman to upstart contender, from beloved Queen to emerging young champion, is impervious to the revolutionary changes within the hierarchy, or the gathering threat from a terrible foe. Man may be ignorant of the cataclysmic battles unfolding beneath his vision, but he should take note. His struggles are not so very different....

New Literacies around the Globe Cathy Burnett, Julia Davies, Guy Merchant, Jennifer Rowsell, 2014-07-11 The increasing popularity of digitally-mediated communication is prompting us to radically rethink literacy and its role in education; at the same time, national policies have promulgated a view of literacy focused on the skills and classroom routines associated with print, bolstered by regimes of accountability and assessments. As a result, teachers are caught between two competing discourses: one upholding a traditional conception of literacy re-iterated by politicians and policy-makers, and the other encouraging a more radical take on 21st century literacies driven by leading edge thinkers and researchers. There is a pressing need for a book which engages researchers in international dialogue around new literacies, their implications for policy and practice, and how they might articulate across national boundaries. Drawing on cutting edge research from the USA, Canada, UK, Australia and South Africa, this book is a

pedagogical and policy-driven call for change. It explores studies of literacy practices in varied contexts through a refreshingly dialogic style, interspersed with commentaries which comment on the significance of the work described for education. The book concludes on the 'conversation' developed to identify key recommendations for policy-makers through a Charter for Literacy Education. .

Game-Based Learning and the Power of Play Pauline Rooney,Nicola Whitton,2016-08-17 In recent years, there has been growing interest in the use of games to enhance learning across multiple educational levels, and extensive research has shown that games have considerable potential for enhancing learning, motivation and skills development. However, despite a growing acknowledgement of this potential, challenges remain and the use of games in formal education contexts remains far from mainstream. While some studies identify design and development issues as a key barrier – including associated costs – others highlight organisational and infrastructural difficulties involved in implementing games in the classroom. More recently, increasing recognition of these difficulties has led many to explore how gaming elements (rather than fully fledged games) can be used to engage and enhance student learning – a practice now widely referred to as “gamification”. This edited collection of chapters explores the application, potential and challenges of game-based learning and gamification across multiple disciplines and sectors, including psychology, education, business, history, languages and the creative arts. With contributions exploring the use of games across the full educational spectrum – from early childhood education, through to the corporate sector – it provides comprehensive insights into the potential of games and play for facilitating learning and engagement at every life stage.

Early Mathematical Explorations Nicola Yelland,Deborah Butler,Carmel Diezmann,2014-01-20 This book presents teachers with a sound theoretical framework for encouraging children to explore mathematical concepts and become numerate in the 21st century. It shows that mathematical learning can occur in a variety of ways, including when children explore ideas through play, problem solving and problem posing, engage in a rich variety of multimodal learning experiences, pursue self-directed activities and cooperate with others, and make connections between ideas and experiences in their everyday worlds. - Back cover
