Managing Technology for Business Value Stephen McLaughlin, 2020-05-07 This book will appeal primarily to postgraduate business studies students who seek to better understand how to use technology to improve organizational performance.

It provides insights into how technology can both positively and negatively influence the way we create, share, and act upon information and knowledge. Taking as a starting point the premise that we now live and operate in a knowledge intensive, information-driven world, where data is arguably the most valuable resource any organization possesses, it argues that we cannot see technology simply as a commodity or a cost to the business. Therefore, every organizational decision-maker must be more aware of the impact technology can have on the knowledge practices and habits of employees, building and sustaining collaborative relationships, and the ability to realise strategic goals in a dynamic and highly competitive environment.

Women Entrepreneurs Mauro F. Guillén, 2013-06-19
Women Entrepreneurs offers a collection of almost two dozen cases that explore the process by which women become entrepreneurs, as well as the opportunities and challenges they face in growing their businesses. With a particular focus on the intersection between entrepreneurship and economic development, the cases are drawn from across a range of industries and countries. They offer insights into a number of issues women entrepreneurs face, such as launching a business, diversification and internationalization, as well as covering a number of business functions, including finance, marketing and human resource management. Each case is presented with a summary highlighting the themes it covers, and ends with a set of questions to guide classroom discussion. The book also includes a summary of existing

literature on entrepreneurship to help contextualize the cases. This casebook would be the ideal companion in an entrepreneurship class, particularly for students with an interest in female entrepreneurship or economic development. With data from a Goldman Sachs/Lauder Institute study.
