Expelling Public Schools John Arena,2023-06-20 Exploring the role of identitarian politics in the privatization of Newark’s public school system In Expelling Public Schools, John Arena explores the more than two-decade struggle to privatize public schools in Newark, New Jersey—a conflict that is raging in cities across the country—from the vantage point of elites advancing the pro-privatization agenda and their grassroots challengers. Analyzing the unsuccessful effort of Cory Booker—Newark’s leading pro-privatization activist and mayor—to generate popular support for the agenda, and Booker’s rival and ultimate successor Ras Baraka’s eventual galvanization of the charter movement, Arena argues that Baraka’s black radical politics cloaked a revanchist agenda of privatization. Expelling Public Schools reveals the political rise of Booker and Baraka, their one-time rivalry and subsequent alliance, and what this particular case study illuminates about contemporary post-civil rights Black politics. Ultimately, Expelling Public Schools is a critique of Black urban regime politics and the way in which antiracist messaging obscures real class divisions, interests, and ideological diversity.

Robotics, AI, and Humanity Joachim von Braun,Margaret S. Archer,Gregory M. Reichberg,Marcelo Sánchez Sorondo,2021-02-12 This open access book examines recent advances in how artificial intelligence (AI) and robotics have elicited widespread debate over their benefits and drawbacks for humanity. The emergent technologies have for instance implications within medicine and health care, employment, transport, manufacturing, agriculture, and armed conflict. While there has been considerable attention devoted to robotics/AI applications in each of these domains, a fuller picture of their connections and the possible consequences for our shared humanity seems needed. This volume covers multidisciplinary research, examines current research frontiers in AI/robotics and likely impacts on societal well-being, human – robot relationships, as well as the opportunities and risks for sustainable development and peace. The attendant ethical and religious dimensions of these technologies are addressed and implications for regulatory policies on the use and future development of AI/robotics technologies are elaborated.
