The Software Architect Elevator Gregor Hohpe, 2020-04-08 As the digital economy changes the rules of the game for enterprises, the role of software and IT architects is also transforming.

Rather than focus on technical decisions alone, architects and senior technologists need to combine organizational and technical knowledge to effect change in their company's structure and processes. To accomplish that, they need to connect the IT engine room to the penthouse, where the business strategy is defined. In this guide, author Gregor Hohpe shares real-world advice and hard-learned lessons from actual IT transformations. His anecdotes help architects, senior developers, and other IT professionals prepare for a more complex but rewarding role in the enterprise. This book is ideal for: Software architects and senior developers looking to shape the company's technology direction or assist in an organizational transformation Enterprise architects and senior technologists searching for practical advice on how to navigate technical and organizational topics CTOs and senior technical architects who are devising an IT strategy that impacts the way the organization works IT managers who want to learn what's worked and what hasn't in large-scale transformation

Not Free, Not for All Cheryl Knott, 2017-02-14 Americans tend to imagine their public libraries as time-honored advocates of equitable access to information for all. Through much of the twentieth century, however, many black Americans were denied access to public libraries or allowed admittance only to separate and smaller buildings and collections. While scholars have examined and continue to uncover the history of school segregation, there has been much less research published on the segregation of public libraries in the Jim Crow South. In fact, much of the writing on public library history has failed to note these racial exclusions. In *Not Free, Not for All*, Cheryl Knott traces the establishment, growth, and eventual demise of separate public libraries for African Americans in the South, disrupting the popular image of the American public library as historically welcoming readers from all walks of life. Using institutional records, contemporaneous newspaper and magazine articles, and other primary sources together with scholarly work in the fields of print

culture and civil rights history, Knott reconstructs a complex story involving both animosity and cooperation among whites and blacks who valued what libraries had to offer. African American library advocates, staff, and users emerge as the creators of their own separate collections and services with both symbolic and material importance, even as they worked toward dismantling those very institutions during the era of desegregation.

Connected Strategy Nicolaj Siggelkow,Christian Terwiesch,2019-04-30 Business Models for Transforming Customer Relationships What if there were a way to turn occasional, sporadic transactions with customers into long-term, continuous relationships--while simultaneously driving dramatic improvements in operational efficiency? What if you could break your existing trade-offs between superior customer experience and low cost? This is the promise of a connected strategy. New forms of connectivity--involving frequent, low-friction, customized interactions--mean that companies can now anticipate customer needs as they arise, or even before. Simultaneously, enabled by these technologies, companies can create new business models that deliver more value to customers. Connected strategies are win-win: Customers get a dramatically improved experience, while companies boost operational efficiency. In this book, strategy and operations experts Nicolaj Siggelkow and Christian Terwiesch reveal the emergence of connected strategies as a new source of competitive advantage. With in-depth examples from companies operating in industries such as healthcare, financial services, mobility, retail, entertainment, nonprofit, and education, Connected Strategy identifies the four pathways--respond-to-desire, curated offering, coach behavior, and automatic execution--for turning episodic interactions into continuous relationships. The authors

show how each pathway creates a competitive advantage, then guide you through the critical decisions for creating and implementing your own connected strategies. Whether you're trying to revitalize strategy in an established company or disrupt an industry as a startup, this book will help you: Reshape your connections with your customers Find new ways to connect with existing suppliers while also activating new sources of capacity Create the right revenue model Make the best technology choices to support your strategy Integrating rich examples, how-to advice, and practical tools in the form of workshop chapters throughout, this book is the ultimate resource for creating competitive advantage through connected relationships with your customers and redefined connections in your industry.

National Research Council,Division on Earth and Life Studies,Institute for Laboratory Animal Research,Committee on Guidelines for the Use of Animals in Neuroscience and Behavioral Research,2003-08-22 Expanding on the National Research Council's Guide for the Care and Use of Laboratory Animals, this book deals specifically with mammals in neuroscience and behavioral

research laboratories. It offers flexible guidelines for the care of these animals, and guidance on adapting these guidelines to various situations without hindering the research process. It treats on such important subjects as: The important role that the researcher and veterinarian play in developing animal protocols. Methods for assessing and ensuring an animal's well-being. General animal-care elements as they apply to neuroscience and behavioral research, and common animal welfare challenges this research can pose. The use of professional judgment and careful interpretation of regulations and guidelines to develop performance standards ensuring animal well-being and high-quality research. Guidelines for the Care and Use of Mammals in Neuroscience and Behavioral Research treats the development and evaluation of animal-use protocols as a decision-making process, not just a decision. Hydrocarbon Seals P. Møller-Pedersen,A.G. Koestler,1997-12-18 In January 1996 a total of 270 conference participants gathered for 3 days in Trondheim, Norway, to focus on and to discuss the complex topic of hydrocarbon seals particularly related to deformation zones and to caprocks. The conference was the first in Norway and one of the first in Europe to exclusively address this very important subject. The purpose of the conference was to present some of the most recent research results, to establish state-of-the-art with respect to understanding hydrocarbon seals and to discuss where to go from here to find some of the keys to successful future exploration and enhanced oil and gas recovery. Out of the presented papers and posters, 17 are compiled and published in this volume. These provide a good overview of and an introduction to the numerous aspects covered during the fruitful days in Trondheim.
