*Screen Love* Tom Roach,2021-02-01 In work, play, education, and even healthcare, we are using social media during COVID-19 to approximate normal life before the pandemic. In *Screen Love*, Tom Roach urges us to do the opposite. Rather than highlight the ways that social media might help reproduce the pre-pandemic status quo, Roach explores how Grindr and other dating/hookup apps can help us envision a radically new normal: specifically, antinormative conceptions of selfhood and community. Although these media are steeped in neoliberal relational and communicative norms, they offer opportunities to reconceive subjectivity and ethics in ways that defy normative psychological and sexual paradigms. In the virtual cruise, Roach argues, we might experience a queer sociability in which participants are formally interchangeable avatar-objects. On Grindr and other m4m platforms, a model of selfhood championed in liberal-humanist traditions—an intelligent, altruistic, eloquent, and emotionally expressive self—is often a liability. By teasing out the queer ethical and political potential of an antisocial, virtual fungibility, Roach compels readers to think twice about media typically dismissed as sordid, superficial, and narcissistic. Written for students, professors, and nonacademics alike, *Screen Love* is an accessible, provocative, and at times subversively funny read.

**Nobody's Victim** Carrie Goldberg,2019-08-13 *Nobody's Victim* is an unflinching look at a hidden world most people don't know exists—one of stalking, blackmail, and sexual violence, online and off—and the incredible story of how one lawyer, determined to fight back, turned her own hell into a revolution. “We are all a moment away from having our life overtaken by somebody hell-bent on our destruction.” That grim reality—gleaned from personal experience and twenty years of trauma work—is a fundamental principle of Carrie Goldberg's cutting-edge victims' rights law firm. Riveting and an essential timely conversation-starter, *Nobody's Victim* invites readers to join Carrie on the front lines of the war against sexual violence and privacy violations as she fights for revenge porn and sextortion laws, uncovers major Title IX violations, and sues the hell out of tech companies, schools, and powerful sexual predators. Her battleground is the courtroom; her crusade is to transform clients from victims into warriors. In gripping detail, Carrie shares the diabolical ways her clients are attacked and how she, through her unique combination of advocacy, badass relentlessness, risk-taking, and client-empowerment, pursues justice for them all. There are stories about a woman whose ex-boyfriend made fake bomb threats in her name and caused a national panic; a fifteen-year-old girl who was sexually assaulted on school grounds and then suspended when she reported the attack; and a man whose ex-boyfriend used a dating app to send more than 1,200 men to ex's home and work for sex. With breathtaking honesty, Carrie also shares her own shattering story about why she began her work and the uphill battle of building a business. While her clients are a diverse group—from every gender, sexual orientation, age, class, race, religion, occupation, and background—the offenders are not. They are highly predictable. In this book, Carrie offers a taxonomy of the four types of offenders she encounters most often at her firm: assholes, psychos, perverts, and trolls. “If we recognize the patterns of these perpetrators,” she explains, “we know how to fight back.” Deeply personal yet achingly universal, *Nobody's Victim* is a bold and much-needed analysis of victim protection in the era of the Internet. This book is an urgent warning of a coming crisis, a predictor of imminent danger, and a weapon to take back control and protect ourselves—both online and off.

**The Privacy Fallacy** Ignacio Cofone,2023-11-30 Our privacy is besieged by tech companies. Companies can do this because our laws are built on outdated ideas that trap lawmakers, regulators, and courts into wrong assumptions about privacy, resulting in ineffective legal remedies to one of the most pressing concerns of our generation. Drawing on behavioral science, sociology, and economics, Ignacio Cofone challenges existing laws and reform proposals and dispels enduring misconceptions about data-driven interactions. This exploration offers readers a holistic view of why current laws and regulations fail to protect us against corporate digital harms, particularly those created by AI. Cofone then proposes a better response: meaningful accountability for the consequences of corporate data practices, which ultimately entails creating a new type of liability that recognizes the value of privacy.

**Tort Law in Focus** Geoffrey Rapp,2020-02-02 The purchase of this ebook edition does not entitle you to receive access to the Connected eBook with Study Center on CasebookConnect. You will need to purchase a new print book to get access to the full experience, including: lifetime access to the online ebook with highlight, annotation, and search capabilities; practice questions from your favorite study aids; an outline tool and other helpful resources. Tort doctrine is complex and nuanced on its own; a torts casebook that mystifies first year students will not help them develop the core skill of legal analysis. *Tort Law in Focus* presents concepts in a way that students can understand and apply. Rather than hide the ball, Geoffrey Rapp explains new terms clearly, and guides students in the specific techniques of applying tort law to practice-based problems. Along with concrete examples, *Tort Law in Focus* provides clear and thorough introductions to those areas of tort law (such as proximate cause under the dominant and new Restatement approaches; res ipsa; factual cause, including but-for cause and alternatives in special cases like indivisible injuries and alternative causes; the duty of owners and occupiers of land; and comparative negligence) that are especially challenging for first-year law students. Professors and Students Will Benefit From: Clear introductions and transitional text that frame key rules, concepts, and cases A wide selection of modern, high-interest cases that apply dominant legal rules, and which, where possible, interpret and apply the Restatement (Third) Summaries and discussion of canonical cases that convey the history and context of modern tort law Examples, flow charts and maps that illustrate concepts, rules, and the relationships among parties and interests Consistent use of problems that encourage students to implement “IRAC” (or equivalent) strategies for structuring their analysis Samples of documents commonly used in tort law practice, such as demand letters and complaints

**Trafficking Data** Aynne Kokas,2022-11 *Trafficking Data* argues that the movement of human data across borders for political and financial gain is disenfranchising consumers, eroding national autonomy, and destabilizing sovereignty. Focusing on the United States and China, it traces how US government

leadership failures, Silicon Valley's disruption fetish, and Wall Street's addiction to growth have yielded an unprecedented opportunity for Chinese firms to gather data in the United States and quietly send it back to China, and by extension, the Chinese government. Such data trafficking, as the book names this insidious phenomenon, is enabled by the competing governance models of the world's two largest economies: mass government data aggregation in China and impenetrable corporate data management policies in the United States. China is stepping up its data trafficking efforts through national regulations, soft power persuasion, and tech investment, extending the scope of state control over domestic and international data and tech infrastructure, and thereby expanding its global influence. The United States, by contrast, is retreating from participation in foreign alliances, international organizations, and the systemic regulation of the tech industry-practices with the potential to counter data trafficking. Confronting data trafficking as the defining international competition of the twenty-first century, this book ultimately advocates for an alternative future of data stabilization. To stem data trafficking and stabilize data flows, it shows, policymakers can synthesize tools from across the private sector, public sector, multi-national organizations, and consumers to protect users, secure national sovereignty, and establish valuable international standards--

*The Transformation of Consumer Law and Policy in Europe* Hans-W Micklitz,Christian Twigg-Flesner,2023-12-14 This book analyses the transformation of consumer law and policy in Europe from 4 perspectives: first, the temporal transformation, i.e., changes that can be tracked from the turn of the millennium; secondly, the substantive dimension, i.e., changes in the scope of the rights and remedies provided by consumer law, as well as the underpinning values; thirdly, the institutional dimension, i.e., changes in the role of national courts, national Parliaments, consumer agencies, and consumer organisations; and fourth, the procedural element, i.e., the shift from individual enforcement via courts to enforcement by public regulators, consumer associations, alternative dispute resolution, and the development of collective enforcement exercised by consumer agencies and/or consumer organisations. With contributions by leading consumer law scholars from across Europe, this book is a fascinating account of how consumer law has often been shaped by national as much as European interests.
