Interventionism, Information Warfare, and the Military-Academic Complex Maximilian C. Forte,2011

This volume focuses on humanitarian interventionism, invasion, occupation, information warfare, propaganda operations, and the military-academic complex. The case studies range from Canadian universities, to WikiLeaks, Iraq, Iran, and Libya. We examine topics such as the role of myth in justifying NATO's war against Libya; the attack on civilian infrastructure in Iraq; WikiLeaks and what it tells us about torture in Iraq; relations between the U.S. and Iran, and the role of propaganda; the depth of militarization of university research in Canada; the successes of WikiLeaks in making an impact on world affairs; and the (im)possibility of humanitarian intervention under imperialist conditions. Contributors include Laura Beach, Sabrina Guerrieri, Jessica Cobran, Natalie Jansezia, Corey Seaton, MacLean Hawley, and the volume editor, Maximilian Forte. The volume emerged from the second seminar in the New Imperialism series at Concordia University.

Information and Communication Technology for Competitive Intelligence Dirk Jaap Vriens, 2004-01-01
In today's complex and dynamic world the need to be informed about what is going on in the environment of the organization is increasing rapidly. To this end, organizations implement a process called competitive intelligence. Competitive intelligence (CI) is about gathering and analyzing environmental information for strategic purposes. However, the noncritical implementation of these tools may lead to an information overload or to environmental myopia. To select the right ICT tools for CI, an organization needs to understand the role of ICT in the CI-process. Information and Communication Technology for Competitive Intelligence addresses this need. It assesses the role and possibilities of ICT in the intelligence activities from different perspectives.

Gulf War and Health: Health Effects of Serving in the Gulf War, Update 2009,2010-06-25 For the United States, the 1991 Persian Gulf War was a brief and successful military operation with few injuries and deaths. However, soon after returning from duty, a large number of veterans began reporting health problems they believed were associated with their service in the Gulf. At the request of Congress, the IOM is conducting an ongoing review of the evidence to determine veterans' long-term health problems and what might be causing those problems. The fourth volume in the series, released in 2006, summarizes the long-term health problems seen in Gulf War veterans. In 2008, the IOM began an update to look at existing health problems and identify possible new ones, considering evidence collected since the initial summary. In this report, the IOM determines that Gulf War service causes post-traumatic stress disorder (PTSD) and that service is associated with multisymptom illness; gastrointestinal disorders such as irritable bowel syndrome; alcohol and other substance abuse; and anxiety disorders and other psychiatric disorders. To ensure that our veterans receive the best possible care, now and in the future, the government should continue to monitor their health and conduct research to identify the best treatments to assist Gulf War veterans still suffering from persistent, unexplained illnesses.

The Viruses Heinz Fraenkel-Conrat,2012-12-06 During the past two decades, virus taxonomy has advanced to the point where most viruses can be classified as belonging to families, genera, or groups of related viruses. Virus classification is primarily based on chemical and physical similarities, such as the size and shape of the virion, the nature of the genomic nucleic acid, the number and function of component proteins, the presence of lipids and of additional structural features, such as envelopes, and serological

interrelationships. The families, genera, or groups of viruses that have been defined on the basis of such criteria by the International Committee on Taxonomy of Viruses (ICTV) will be described in some detail in this catalogue and illustrated by electron micrographs. In my present attempt to list most if not all well established and studied viruses in alphabetical order, I have largely confined myself to identifying them only in such taxonomic terms, generally without quoting specific data reported for individual viruses. If the latter data do not at times agree closely with those given for the taxon or group, it is difficult to decide to what extent this is attributable to misclassification due to insufficient data and errors in the analytical procedures and descriptions, or to what extent this is an expression of Nature's freedom of choice and abhorrence of restrictive classifications.

The Plant Viruses R.G. Milne, 2013-11-09 The original aim of this book was to cover different aspects of the traditionally filamentous potex-, carla-, poty-, clostero-, and capilloviruses. The title *The Filamentous Plant Viruses* seemed the only suitable one, but it has led us to discuss also the quite different filamentous viruses of the rice stripe group—recently officially named the tenuivirus group—which otherwise, indeed, might not have been conveniently covered in any volume of this series. The question must be asked: What is there new that justifies the presentation of a book of this kind? An outline of the answer may be Among the traditional filamentous viruses, much progress has been made in elucidating the physical structure of potexvirus particles, and this work serves as an excellent model for discussion of and future experiments on the poty-, carla-, clostero-, and capilloviruses, which have comparable structures, although they are more difficult to manipulate. Work on the structure and strategy of the genomes of poty

viruses is, however, relatively advanced and at a very interesting stage. The helper component that assists the aphid transmission of potyviruses has also recently received considerable attention, although the more we know about that, the less seems clear about the aphid transmission of the carlaviruses and closteroviruses, which apparently neither possess nor require a helper component.

Applied Plant Virology D.G. Walkey, 2012-12-06 For the past twenty years I have worked as an applied plant virologist, attempting to identify and control virus diseases in field crops. During the last ten years it has been my privilege to present short courses in plant virology to final-year students studying plant pathology, micro biology and general botany. Throughout the period I have been lecturing, it has been possible to recommend several excellent 'library' books for further reading in plant virology, but there has been no publication covering applied plant virology that a student might consider purchasing. With teaching requirements in mind this book has been written to provide a concise introduction to applied plant virology based on the experiences I have gained working on virus diseases, both in an applied laboratory and in the field. The text concentrates on introducing the reader to aspects of plant virology that would be encountered every day by an applied virologist trying to identify viruses and develop control measures for virus diseases of crop plants. Although a brief introduction to virus structure and its terminology is given in the opening chapter of the book, no attempt is made to cover in detail the more fundamental aspects of virus structure, biochemistry and replication. Similarly, the symptoms caused by individual viruses are not described, although the various types of symptoms that plant viruses cause and which might be encountered by a student or research worker are described.

European Handbook of Plant Diseases I. M. Smith, J. Dunez, D. H. Phillips, R. A. Lelliott, S. A. Archer, 2009-07-15 An encyclopaedic treatment of plant diseases in Europe, this book is designed as a

standard reference volume for the general working plant pathologist and those taking advanced training in plant pathology. It provides a clear, informed and authoritative summary of each entry by an appropriate specialist, with a selection of key references for further reading. The handbook covers the economic diseases of crops and forest trees in Europe, treated by pathogen and classed as pathogens of major, moderate and minor importance. Approximately 1000 organisms are covered in total, including 600 fungi, 100 bacteria, and 300 viruses and similar organisms

Violence and Mental Health Jutta Lindert, Itzhak Levav, 2015-02-25 Violence is one of the most important challenges, not only for public health systems, but also for public mental health. Violence can have immediate as well as long-term and even transgenerational effects on the mental health of its victims. This book provides a comprehensive and wide-ranging assessment of the mental health legacy left by violence. It addresses the issues as they affect states, communities and families, in other words at macro-, meso- and microlevels, beginning by describing the impact of violence on neurobiology and mental health, as well as the spectrum of syndromes and disorders associated with different forms of violence. The work moves on to tackle violence at the international—and intranational—level before zeroing in on the nature of violence in communities such as villages or city districts. It also examines the results of violence in the family. Each type of violence has distinct effects on mental health and in each chapter specific groups are explored in depth to demonstrate the heterogeneity of violence as well as the diversity of its outcomes in the realm of public mental health. Finally, the book addresses the notion of ‘undoing violence’ by detailing case studies of effective interventions and prevention occurring in countries, communities and families.

These cases give us pause to reflect on the nature of resilience and dignity in the context of violence and mental health. All the chapters have been written by leading authors in the field and provide a state-of-the-art perspective. The authors, from different fields of expertise, facilitate interdisciplinary and international insights into the impact of violence on mental health.
