Evidence-Based Learning and Teaching Melissa Barnes, Maria Gindidis, Sivan Phillipson, 2018-05-08 Education has become a political, economic and social priority for Australia, with the success of schools (and teachers) being an integral part of the economic and social future of the country. As a result, quality assurance for learning and teaching has become increasingly debated among policy-makers and the broader public, with a call for more evidence, data and standards to ensure that schools and teachers are held accountable for students' learning outcomes. In response, this book provides a snapshot of the types of evidence and data relating to learning outcomes that are being collected in our classrooms within Australia. The chapters in this book seek to interrogate current views of learning and teaching, beyond what is measured in external assessments that only capture a limited view of student learning outcomes. The chapters explore a range of fundamental topics within education, including positive learning environments, student voice and assessment. They explore and articulate the vital knowledge and skills needed for current and future teachers. In addition, these chapters make clear links between teaching, learning and the theories that frame, shape and inform these learning and teaching processes. The research presented in this book provides practical and theoretical insights into learning and teaching in early years, primary, secondary and tertiary education.

Attachment Theory and Research Jeffry A. Simpson, W. Steven Rholes, 2015-02-20 This volume showcases the latest theoretical and empirical work from some of the top scholars in attachment. Topics include the effects of early experiences on adult relationships; new developments in neuroscience and genetics; attachment orientations and parenting; connections between attachment and psychopathology, as well as health outcomes; and the relationship of attachment theory and processes to clinical interventions.

Personality in Adulthood Paul T. Costa, Jr., Robert R. McCrae, 2013-10-18 Now in a revised and expanded second edition, this influential work argues for the enduring stability of personality across adult development. It also

offers a highly accessible introduction to the five-factor model of personality. Critically reviewing different theories of personality and adult development, the authors explain the logic behind the scientific assessment of personality, present a comprehensive model of trait structure, and examine patterns of trait stability and change after age 30, incorporating data from ongoing cross-sectional and longitudinal studies. The second edition has been updated throughout with the authors' new findings, ideas, and interpretations, and includes a new chapter on cross-cultural research. It culminates in an additional new chapter that presents a comprehensive theory of personality grounded in the five-factor model.

Life-Span Developmental Psychology Paul B. Baltes, K Warner Schaie, 2013-09-11 Life-Span Developmental Psychology: Personality and Socialization presents papers on personality and socialization. The book discusses the history, theory, and psychological approaches of developmental psychology, with focus on socialization and personality development through the life span; personality dimensions; and theories of socialization and sex-role development. The text also describes the life-span perspective of creativity and cognitive styles; continuities in childhood and adult moral development revisited; and issues of intergenerational relations as they affect both individual socialization and continuity of culture. The interactional analysis of family attachments; social-learning theory as a framework for the study of adult personality development; person-perception research; and the perception of life-span development are also considered. The book further tackles the potential usefulness of the life-span developmental perspective in education; the strategies for enhancing human development over the life span through educational intervention; and some ecological implications for the organization of human intervention throughout the life span. Developmental psychologists, sociologists, gerontologists, and people involved in the study of child development will find the book invaluable.

The Psychology of Later Life Manfred Diehl, Hans-Werner Wahl, 2020 Renowned experts in adult development and aging, Manfred Diehl and Hans-Werner Wahl synthesize decades of psychological research into a comprehensive volume that considers later life in the context of lifespan development, social and physical environmental factors, and historical-cultural influences. In so doing, they review important research on cognitive functioning, behavioral processes, personality and identity development, and overall well-being in middle to late adulthood. Diehl and Wahl's three-part framework helps readers better understand that the development process is influenced by multiple

factors and can take many different trajectories. Through this contextualized perspective, they examine the influence that previous life experiences, beginning in early childhood, can have on the aging process in older adults. This includes social relations, technological advances, societal perspectives on aging, and education. The authors also examine the challenges and opportunities of aging, using a strength-based approach to promote a diverse, nuanced understanding of successful, healthy aging. Chapters also conclude with dialogues from other experts in the field, offering multiple different perspectives on the research.
