Clinical Trials in Ovarian Cancer Christine S.

Walsh,2017-01-16 When a patient is diagnosed with a gynecological malignancy, she and her doctors must make urgent, high-risk decisions about her course of treatment. In selecting an appropriate plan of care, physicians must weigh the patient's individual needs, the tumor's specific characteristics, and the treatment's potential side effects. Because there is no one-size-fits-all treatment solution, a plethora of clinical trials have been performed on ovarian cancer patients, but clinicians may struggle to keep up with this ever-growing body of research. Collecting and synthesizing research findings from a wide array of medical journal articles and book chapters, *Clinical Trials in Ovarian Cancer* provides physicians with an invaluable resource. Gynecologic oncologist Christine S. Walsh systematically outlines each of the seminal Phase III trials that have shaped the treatment of ovarian cancers, detailing the rationale for the trial, the patient population studied, treatment delivery methods, efficacy, toxicity, and trial conclusions. She provides a clear overview of established treatments, as well as still-controversial experimental approaches. The first book to organize this cutting-edge research into an easy-to-use reference, *Clinical Trials in Ovarian Cancer* should help medical personnel at all levels provide their patients with the highest standard of care.

The Politics of West German Trade Unions Andrei

Markovits,2016-04-14 First published in 1986, this book assesses the politics of the West German trade unions in the context of their larger role as major actors in the polity. By focusing on the historical realities of the labour movement both before and after 1945, the study explains the extent to which organized labour solidified and challenged the dominant structures of politics and authority. It examines the metalworkers' union, the construction workers' union, the printers' union and the chemical workers' union and shows how the industrial reality of each organisation helped shape its political outlook and strategic thinking. This book will be of particular interest to students of trade unions, industrial relations and political economy in West Germany.

The Human Quality A. Peccei,2013-10-22 An autobiographical statement of the author's belief in the global approach to development and world problems. How can the human species survive the crisis of its own extraordinary techno-scientific success? In this truly unique book Aurelio Peccei shows us that the solution cannot be found in external factors. It must lie in re-establishing a sound cultural balance within man himself so that he becomes capable of living in harmony with the new human condition and changed world environment. Only by a cultural revolution which changes the human quality can we control and orient the material revolutions. Aurelio Peccei's distinguished career in industry, conservation, international affairs and as a counsellor on major world problems needs little introduction. He was a founder-member of the Club of Rome in 1968 and has been

a member of its Executive Committee ever since. Inevitably he draws upon his wisdom and experience to highlight the arguments in his book
