Recent progress in strategies for preparation of metal-organic frameworks and their hybrids with different dimensions

Yichun Su,Guoqiang Yuan,Jinliang Hu,Wenhao Feng,Qingyu Zeng,Yangyi Liu,Huan Pang,2023-01-01 As a new kind of organic-inorganic hybrid porous material, metal-organic frameworks (MOFs) exhibit a wide application prospect in gas storage and separation, catalysis and sensing due to their characteristics of large specific surface area, high porosity and coordination unsaturation. As more and more types of MOFs were reported, the synthetic strategies of MOFs-based materials have become a hot research topic. According to the morphological dimension, MOFs can be roughly divided into one-dimensional, two-dimensional and three-dimensional structures. Herein, we summarize the synthetic methods and principles of MOFs from multi-dimensional perspectives, and explore the growth mechanism of MOFs with different morphologies based on dynamic and thermodynamic tuning. Finally, based on the above summaries, the challenges and opportunities of MOFs in the future are discussed.

China, the United Nations, and Human Rights Ann Kent,2013-08-31 Selected by Choice magazine as a Outstanding Academic Book for 2000 Nelson Mandela once said, Human rights have become the focal point of international relations. This has certainly become true in American relations with the People's Republic of China. Ann Kent's book documents China's compliance with the norms and rules of international treaties, and serves as a case study of the effectiveness of the international human rights regime, that network of international consensual agreements concerning acceptable treatment of individuals at the hands of nation-states. Since the early 1980s, and particularly since 1989, by means of vigorous monitoring and the strict maintenance of standards, United Nations human rights organizations have encouraged China to move away from its insistence on the principle of noninterference, to take part in resolutions critical of human rights conditions in other nations, and to accept the applicability to itself of human rights norms and UN procedures. Even though China has continued to suppress political dissidents at home, and appears at times resolutely defiant of outside pressure to reform, Ann Kent argues that it has gradually begun to implement some international human rights standards.

What about the Art? Cai Guo-Qiang,2017-06 Featuring 14 artists and one pair of artistic collaborators, What about the Art? Contemporary Art from China examines the contributions of Chinese artists to the international canon of contemporary art. Including works by Hu Xiangqian, Hu Zhijun, Xu Bing, Jenova Chen, Li Liao, Jennifer Wen Ma, Zhou Chunya, Yang Fudong, Liang Shaoji, Xu Zhen, Liu Xiaodong, Liu Wei, Wang Jianwei, Huang Yong Ping and Sun Yuan & Peng Yu, this volume explores each artist's unique formal language and methodology. Curated by New York-based, Chinese-born artist Cai Guo-Qiang to counter an over-simplified Western understanding of Chinese contemporary art as either solely market-driven or politically rebellious, What about the Art? aims to tell a different story. As Cai puts it: What I always thought was missing from exhibitions about Chinese contemporary art was the artist's individual creativity, and I wanted to single that out.

Coping with a Bad Global Image John Franklin Copper,Ta-ling Lee,1997 This book assesses the human rights condition in the People's Republic of China during 1993-94, focusing on how abuses have engendered difficulties for Beijing in international relations. It considers changes in the political and legal systems and Communist ideology (more correctly, its demise) in its appraisal. These, the authors contend, are causative factors of human rights abuses and need to be understood to put the human rights situation in its proper perspective. Such matters as crime, forced labor, and executions are examined in detail to delineate the worst kinds of human rights abuses as well as current trends. Dissidents, religious advocates, and intellectuals are also a focus of attention. Copublished with the East Asia Research Institute.
