Establishment of "Drama" Orientation Zhang Yifan,2019-09-30 The "national drama" in China is a historical concept. Grown on longstanding Chinese culture and art, the traditional drama, mainly in the form of "opera", has been integrated with "drama" of an international background. From the perspective of modern "drama and opera", this book mainly studies the conditions and research of Chinese traditional drama in the 1920s and 1930s. Instead of analyzing from the viewpoint of literature appreciation or music theory, the author regards the drama as a comprehensive stage art. He attaches special importance to restoring historical scenes and therefore mainly introduces the drama journals and monographs published in that historical period, in order to help readers understand the original state of drama at that time through the records of the witnesses. In particular, this book delivers an insightful view about the evolution of the meaning of "national drama" and "drama". The book will help scholars and readers understand the meaning and the whole story of the "national drama" concept, and will certainly facilitate the construction of the discipline of Drama and Opera.

Drama Kings Joshua Goldstein,2007-02-13 In this colorful and detailed history, Joshua Goldstein describes the formation of the Peking opera in late Qing and its subsequent rise and re-creation as the epitome of the Chinese national culture in Republican era China. Providing a fascinating look into the lives of some of the opera's key actors, he explores their methods for earning a living; their status in an ever-changing society; the methods by which theaters functioned; the nature and content of performances; audience make-up; and the larger relationship between Peking opera and Chinese nationalism. Propelled by a synergy of the commercial and the political patronage from the Qing court in Beijing to modern theaters in Shanghai and Tianjin, Peking opera rose to national prominence. The genre's star actors, particularly male cross-dressing performers led by the exquisite Mei Lanfang

and the Four Great Female Impersonators became media celebrities, models of modern fashion and world travel. Ironically, as it became increasingly entrenched in modern commercial networks, Peking opera was increasingly framed in post-May fourth discourses as profoundly traditional. Drama Kings demonstrates that the process of reforming and marketing Peking opera as a national genre was integrally involved with process of colonial modernity, shifting gender roles, the rise of capitalist visual culture, and new technologies of public discipline that became increasingly prevalent in urban China in the Republican era.

Extraterritoriality in East Asia Ireland-Piper, Danielle,2021-07-31 Extraterritoriality in East Asia examines the approaches of China, Japan and South Korea to exercising legal authority over crimes committed outside their borders, known as 'extraterritorial jurisdiction'. It considers themes of justiciability and approaches to international law, as well as relevant examples of legislation and judicial decision-making, to offer a deeper understanding of the topic from the perspective of this legally, politically and economically significant region.

Computational Science - ICCS 2007 Yong Shi,Geert Dick van Albada,Jack Dongarra,Peter M.A. Sloot,2007-07-13 Part of a four-volume set, this book constitutes the refereed proceedings of the 7th International Conference on Computational Science, ICCS 2007, held in Beijing, China in May 2007. The papers cover a large volume of topics in computational science and related areas, from multiscale physics to wireless networks, and from graph theory to tools for program development.

Algorithms and Architectures for Parallel Processing Guojun Wang,Albert Zomaya,Gregorio Martinez,Kenli Li,2015-11-16 This four volume set LNCS 9528, 9529, 9530 and 9531 constitutes the refereed proceedings of the 15th International Conference on Algorithms and Architectures for Parallel Processing, ICA3PP 2015, held in Zhangjiajie, China, in November 2015. The 219 revised full papers presented together with 77 workshop papers in these four

volumes were carefully reviewed and selected from 807 submissions (602 full papers and 205 workshop papers). The first volume comprises the following topics: parallel and distributed architectures; distributed and network-based computing and internet of things and cyber-physical-social computing. The second volume comprises topics such as big data and its applications and parallel and distributed algorithms. The topics of the third volume are: applications of parallel and distributed computing and service dependability and security in distributed and parallel systems. The covered topics of the fourth volume are: software systems and programming models and performance modeling and evaluation.

Local Realities and Environmental Changes in the History of East Asia Ts'ui-Jung Liu,2015-09-16 Environmental history has evolved into a well-established historical subfield which has broadened the horizons of historical research, beyond human affairs, to include the study of human interactions with natural and man-made environments. This broadened scope has attracted scholars from many different fields; a development which is reflected by this volume as it highlights the recent studies on East Asian environmental history by scholars of History, Economic History, Political ecology, Sociology and Environmental Studies. This book examines the local realities and environmental changes in East Asia, and is one of a few publications in English on the subject. Contributors apply rich historical material, maps and statistical data to reveal the local environmental realities infused by global perspectives. Part I deals with attitude toward nature, focusing on the soundscape conceived by traditional Chinese literati and on industrious revolution in Tokugawa Japan. Part II includes four case studies which respectively discuss the hydraulic management and political ecology in the Yongle reign (1403-1424), the Woosung Bar controversy in the 1870s, the

expansion of Daihaizi Reservoir in Xinjiang in the 1950s, and interactions between the indigenous communities and NGOs in Hualien, Taiwan. Part III presents case studies of Japan dealing with natural disasters: volcano eruption, floods, and the human actions around Tokyo since the eighteenth century. These chapters and the insights they offer provide the reader with the most recent research on East Asian environmental history. Covering the geographical areas of Japan, North and Northwest China, the Lower Yangzi Delta and Taiwan, and the timeframe spanning the seventh century BC to the present day, the book will be of great interest to anyone studying the history of East Asia, environmental history or environmental studies.

The Monster That Is History David Der-Wei Wang,Dewei Wang,2004-10-04 In ancient China a monster called Taowu was known for both its vicious nature and its power to see the past and the future. Since the seventeenth century, fictive accounts of history have accommodated themselves to the monstrous nature of Taowu. Moving effortlessly across the entire twentieth-century literary landscape, David Der-wei Wang delineates the many meanings of Chinese violence and its literary manifestations.

Science and Confucian Statecraft in East Asia ,2019-03-27 Science and Confucian Statecraft in East Asia explores science and technology as practiced in the governments of premodern China and Korea. Contrary to the stereotypical image of East Asian bureaucracy as a generally negative force having hindered free enquiries and scientific progress, this volume offers a more nuanced picture of how science and technology was deployed in the service of state governance in East Asia. Presenting richly documented cases of the major state-sponsored sciences, astronomy, medicine, gunpowder production, and hydraulics, this book illustrates how rulers' and scholar-officials' concern for efficient and legitimate governance shaped production, circulation, and application of natural knowledge and useful techniques. Digital Watermarking Fabien Petitcolas,Hyoung Joong Kim,2003-08-03 The 1st International Workshop on Digital Watermarking (IWDW), the con- rence covering all aspects of digital watermarking, was held at the Hotel Riviera situated along the beautiful Han River in Seoul, Korea from November 21 to 22, 2002. These proceedings contain 21 papers that were accepted for presentation at the conference. These papers were selected from 67 submissions including 3 invited papers. They went through a thorough review process by the Program Committee and were selected on the basis of excellence and novelty. The following is a brief description of the history of this conference and - viewing process: In August 2001 some members of the Special Interest Group on Multimedia Protection (SIGMP) of the Korea Institute of Information Security and Cryptology (KIISC) agreed to create the IWDW. In November 2001 we set up a Program Committee and solicited papers while asking Springer-Verlag to publish the proceedings of the workshop in their Lecture Notes in Computer Science series. In July 2002 we received 64 submissions from 14 countries using Microsoft's conference management site (http://cmt. research. microsoft. com/ iwdw2002/). Each submission was assigned a number automatically by the c- ference management tool and the paper was sent to the Program Committee members for their review. We also encouraged di?erent sets of experts to join for fair reviews.

Theaters of Desire: Authors, Readers, and the Reproduction of Early Chinese Song-Drama, 1300–2000 P. Sieber,2003-07-17 Blending a flair for textual nuance with theoretical engagement, Theaters of Desire not only contributes to our understanding of the most influential form of early Chinese song-drama in local and international cultural contexts, but adds a Chinese perspective to the scholarship on print culture,

authorship, and the regulatory discourses of desire. The book argues that, particularly between 1550 and 1680, Chinese elite editors rewrote and printed early plays and songs, so-called Yuan-dynasty zaju and sanqu , to imagine and embody new concepts of authorship, readership and desire, an interpretation that contrasts starkly with the national and racially-oriented reception of song-drama developed by European critics after 1735 and subsequently modified by Japanese and Chinese critics after 1897. By analyzing the critical and material facets of the early song and play tradition across different historical periods and cultural settings, Theaters of Desire presents a compelling case study of literary canon formation.

Chinese Shock of the Anthropocene Kwai-Cheung Lo,Jessica Yeung,2019-05-07 This book examines China's role and its cultural productions in the process of environmental destruction and transformation, focusing on how various cultural media play a significant role in shaping and reproducing Chinese subject formation in relation to changing ecological conditions. It argues that China under the leadership of Xi Jinping vowed in 2017 to play a leading role in preserving the planet for the future, but many of its actions such as its "Belt and Road" initiative have aroused apprehension rather than inspired confidence. Against this backdrop of environmental concern, this volume brings together a cutting-edge critical analysis of Chinese literature, music and cinema, offering a transdisciplinary and comprehensive vision of Chinese arts and literature under the current conditions of the Anthropocene. This volume sets a high scholarly standard in the field, and constitutes a valuable reference for scholars and students of Chinese cultural studies, Chinese studies and Anthropocene studies.

Embedded Software and Systems Zhaohui Wu,Minyi Guo,Chun Chen,Jiajun Bu,2005-08-29 Welcome to the post proceedings of the First International Conference on Embedded Software and Systems (ICESS 2004), which was held in Hangzhou,

P. R. China, 9–10 December 2004. Embedded Software and Systems technology is of increasing importance for a wide range of industrial areas, such as aerospace, automotive, telecommunication, and manufacturing automation. Embedded technology is playing an increasingly dominant role in modern society. This is a natural outcome of amazingly fast developments in the embedded field. The ICESS 2004 conference brought together researchers and developers from academia, industry, and government to advance the science, engineering, and technology in embedded software and systems development, and provided them with a forum to present and exchange their ideas, results, work in progress, and experience in all areas of embedded systems research and development. The ICESS 2004 conference attracted much more interest than expected. The total number of paper submissions to the main conference and its three workshops, namely, Pervasive Computing, Automobile Electronics and Tele-communication, was almost 400, from nearly 20 countries and regions. All submissions were reviewed by at least three Program or Technical Committee members or external reviewers. It was extremely difficult to make the final decision on paper acceptance because there were so many excellent, foreseeing, and interesting submissions with brilliant ideas.

Biocomputing 2021 - Proceedings Of The Pacific Symposium Russ B Altman,A Keith Dunker,Lawrence Hunter,Marylyn D Ritchie,Tiffany A Murray,Teri E Klein,2020-11-24 The Pacific Symposium on Biocomputing (PSB) 2021 is an international, multidisciplinary conference for the presentation and discussion of current research in the theory and application of computational methods in problems of biological significance. Presentations are rigorously peer reviewed and are published in an archival

proceedings volume. PSB 2021 will be held on a virtual platform at psb.stanford.edu/ on January 5-7, 2021. Tutorials and workshops will be offered prior to the start of the conference.PSB 2021 will bring together top researchers from the US, the Asian Pacific nations, and around the world to exchange research results and address open issues in all aspects of computational biology. It is a forum for the presentation of work in databases, algorithms, interfaces, visualization, modeling, and other computational methods, as applied to biological problems, with emphasis on applications in data-rich areas of molecular biology.The PSB has been designed to be responsive to the need for critical mass in sub-disciplines within biocomputing. For that reason, it is the only meeting whose sessions are defined dynamically each year in response to specific proposals. PSB sessions are organized by leaders of research in biocomputing's 'hot topics.' In this way, the meeting provides an early forum for serious examination of emerging methods and approaches in this rapidly changing field.

Clustering and Routing Algorithms for Wireless Sensor Networks Pratyay Kuila,Prasanta K Jana,2017-09-22 Wireless Sensor Networks have a wide range of applications in different areas. Their main constraint is the limited and irreplaceable power source of the sensor nodes. In many applications, energy conservation of the sensor nodes and their replacement or replenishment due to the hostile nature of the environment is the most challenging issue. Energy efficient clustering and routing are the two main important topics studied extensively for this purpose. This book focuses on the energy efficient clustering and routing with a great emphasis on the evolutionary approaches. It provides a comprehensive and systematic introduction of the fundamentals of WSNs, major issues and effective solutions.

Smart Sensor Networks Using AI for Industry 4.0 Soumya Ranjan Nayak,Biswa Mohan Sahoo,Muthukumaran Malarvel,Jibitesh Mishra,2021-10-10 Smart Sensor Networks (WSNs) using AI have left a mark on the lives of all by aiding in various sectors, such as manufacturing, education, healthcare, and monitoring of the environment and industries. This book covers recent AI applications and explores aspects of modern sensor technologies and the systems needed to operate them. The book reviews the fundamental concepts of gathering, processing, and analyzing different AI-based models and methods. It covers recent WSN techniques for the purpose of effective network management on par with the standards laid out by international organizations in related fields and focuses on both core concepts along with major applicational areas. The book will be used by technical developers, academicians, data sciences, industrial professionals, researchers, and students interested in the latest innovations on problem-oriented processing techniques in sensor networks using IoT and evolutionary computer applications for Industry 4.0.

Literary Societies of Republican China Michel Hockx,Kirk A. Denton,2008 Literary Societies of Republican China provides a

new and comprehensive perspective on the fascinating literary world of the most turbulent period in recent Chinese history: the Republican era of 1911-1949. Wedged between the fall of the Empire and the founding of the Communist state, the Republican period witnessed enormous social, political, and cultural changes. Kirk A. Denton and Michel Hockx have collected thirteen essays by eleven scholars from North America, Europe, and Asia that present detailed discussions of particular literary groups active in the Republican-era literary scene. Some of these groups are familiar representatives of what used to be considered the mainstream, while others represent literary styles that have hitherto been considered marginal or that have been ignored altogether. Each of the essays in this volume looks in detail at literary societies both as producers of literary views and texts and as organizations with sometimes very complex social structures. The result is a unique blend of literary, cultural, and social history, unrivalled in any English-language scholarship on China to date. Book jacket.

The Top Books of the Year Guowei Wu The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the engaging narratives that have enthralled audiences this year. The Must-Read : Colleen Hoovers "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a

world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and gripping novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
