Indian Multinationals in the World Economy Jaya Prakash Pradhan,2008 Indian multinationals have been active in the world economy since early 1960s. However, their number and scale of operation have grown significantly in the last fifteen years or so. In the face of increasing global competition unleashed by extensive liberalization measures, Indian firms have adopted the strategy of outward foreign direct investment (OFDI) as an integral part of their business strategies. By undertaking greenfield OFDI and brownfield OFDI for acquiring foreign companies, Indian firms are enhancing their potential for growth and global competitiveness. Consequently India has emerged as a major developing source country of FDI and Indian multinationals are likely to affect world development in several ways. The book analyses the phenomenon of Indian multinationals from both macro level factors and firm-level corporate strategies and examines its implications for India and host countries. A detailed investigation of Indian overseas investment flows and stocks from sectoral, regional, ownership and motivational perspectives provides a rigorous long-run coverage of Indian multinational firms from 1970s onwards. The role of innovation, entrepreneurial skills, scale of business, productivity, and the role of government policies, received critical attention in explaining the emergence of Indian multinationals. The comprehensive quantitative and case studies approach offers valuable insights into the behaviour and impacts of these new global actors on home and host countries. This book offers a number of lessons to home country, host countries, and Indian enterprises becoming multinationals. With the growing global interest from policy makers, business practitioners, researchers, and students in Indian multinationals, this book would serve as an important and timely reading for all of them.

Employees First, Customers Second Vineet Nayar,2010-06-08 One small idea can ignite a revolution just as a single matchstick can start a fire. One such idea—putting employees first and customers second—sparked a revolution at HCL Technologies, the IT services giant. In this candid and personal account, Vineet Nayar—HCLT's celebrated CEO—recounts how he defied the conventional wisdom that companies must put customers first, then turned the hierarchical pyramid upside down by making management accountable to the employees, and not the other way around. By doing so, Nayar fired the imagination of both employees and customers and set HCLT on a journey of transformation that has made it one of the fastest-growing and profitable global IT services companies and, according to BusinessWeek, one of the twenty most influential companies in the world. Chapter by chapter, Nayar recounts the exciting journey of how he and his team implemented the employee first philosophy by: • Creating a sense of urgency by enabling the employees to see the truth of the company's current state as well as feel the "romance" of its possible future state • Creating a culture of trust by pushing the envelope of transparency in communication and information sharing • Inverting the organizational hierarchy by making the management and the enabling functions accountable to the employee in the value zone • Unlocking

the potential of the employees by fostering an entrepreneurial mind-set, decentralizing decision making, and transferring the ownership of "change" to the employee in the value zone Refreshingly honest and practical, this book offers valuable insights for managers seeking to realize their aspirations to grow faster and become self-propelled engines of change.

Accelerating Decline in America's High-Skilled Workforce Jacob Funk Kirkegaard,2008 Kirkegaard explores the increasingly dysfunctional state of present US high-skilled immigration laws and recommends a coherent set of immediate reforms, which should aim to facilitate continuously high and increasingly economically necessary levels of high-skilled immigration to the United States. In recent decades American skill levels have stagnated and struggled to make the global top 10. As baby boomers retire, the United States risks losing these skills altogether. In response, the United States should address high-skilled immigration in its broader foreign economic policies in an attempt to remain a global leader in the face of accelerating global economic integration.
