India's Rise to Power in the Twentieth Century and Beyond S. Gordon, 1994-11-13 '...sober and extremely well-researched book.' - Inder Malhotra, Business World '...very detailed and up-to-date account.' - Richard Newman, Times Higher Education Supplement This book examines the economic and technological basis for India's rise to power and the political factors that shape the nature of the power it will develop into. It shows that while India has concentrated on many of the scientific and technical capabilities that serve the needs of a rising power, it has not been able to achieve a balanced process of development. This imbalance feeds sub-national political discontent and undercuts the very power that India has sought to acquire, thus delaying her rise to power.

Methods in Ancient Wine Archaeology Emlyn Dodd, Dimitri Van Limbergen, 2024-02-08 Bringing together a wide array of modern scientific techniques and interdisciplinary approaches, this book provides an accessible guide to the methods that form the current bedrock of research into Roman, and more broadly ancient, wine. Chapters are arranged into thematic sections, covering biomolecular archaeology and chemical analysis, archaeobotany and palynology, vineyard and landscape archaeology and computational and experimental archaeology. These include discussions of some of the most recent techniques, such as ancient DNA and organic residue analyses, geophysical prospection, multispectral imaging and spatial and climatic modelling. While most of the content is of direct relevance to the Roman Mediterranean, the assortment of detailed case studies, methodological outlines and broader 'state of the field' reflections is of equal use to researchers working across disparate disciplines, geographies, and chronologies. The study of ancient Roman wine has been dominated until recently by traditional archaeological analyses focused upon production facilities and ceramic evidence related to transport. While such architecture and artefact-focussed approaches provide a fundamental foundation for our understanding of this topic, they fail to provide the requisite nuance to answer other questions regarding grape cultivation and wine production, consumption, use and trade. As the first compendium of its kind, this book supports the embedding of modern scientific and experimental techniques into archaeological fieldwork, research and laboratory analysis, pushing the boundaries of what questions can be explored, and serving as a launching point for future avenues of interdisciplinary research.
