String Fields, Higher Spins And Number Theory Polyakov Dimitri,2018-09-17 The book aims to analyze and explore deep and profound relations between string field theory, higher spin gauge theories and holography — the disciplines that have been on the cutting edge of theoretical high energy physics and other fields. These intriguing relations and connections involve some profound ideas in number theory, which appear to be part of a unifying language to describe these connections.

Floods and Long-Term Water-Level Changes in Medieval Hungary Andrea Kiss,2019-05-15 The book provides an overview of the floods and major hydrological changes that occurred in the medieval Hungarian kingdom (covering the majority of the Carpathian Basin) between 1000 and 1500 AD. The analysis was based on contemporary documentary evidence presented for the first time and the results of archaeological and scientific investigations. Beyond the evidence on individual flood events, the book includes a comprehensive overview of short-, medium-, and long-term changes detected in a hydrologically sensitive environment during the transition period between the Medieval Warm Period and the Little Ice Age. It also discusses the possible causes (including climate and human intervention) and the consequences for the physical and human environment, namely the related hydro-morphological changes, short- and long-term social response, and human perception issues.

Basic Income and Sovereign Money Geoff Crocker,2020-02-20 “This is a radical, thought-provoking book, which brings together debates that are often kept separate about basic income and 'sovereign money'. You might not agree with all of it, but it makes big arguments and does so with constructive intent: that of proposing alternative ways of organising our economy and welfare states.” Nick Pearce, Director of The Institute for Policy Research, University of Bath, UK “Though I have criticized modern money theory (MMT) for being too facile regarding the consequences of money financed deficits, I welcome this book’s advocacy of a universal basic income. MMT proponents have focused on the problem of employment. Geoff Crocker wants to shift the focus to basic income, and I believe he is right. We are in an era of transition. Employment was the fundamental problem of the 20th century. Income distribution will be the fundamental problem of the 21st century. We must begin transitioning the policy discourse now. In coming decades we will need both employment and basic income policy. It is good to have MMT advocates on board.” Thomas Palley, independent economist, Washington, DC, USA Geoff Crocker's book is a very stimulating and provoking contribution to the discussion of how to define, identify, and finance basic income. It addresses very clearly the societal issue of a monetary basic income funding which will excite the discussion beside well --known tax proposals, and establishes the discussion on integrating basic income directly into crisis prevention and crisis solution. Bernhard Neumärker, Götz Werner Professor of Economic Policy & Constitutional Economic Theory and Head of Freiburg Institute for Basic Income Studies (FRIBIS) at the University of Freiburg The current economic system is dysfunctional, characterised by crises, austerity, excessive household and government debt, low pay, poverty, inequality, and ecological damage. This needs a radical re-think and re-engineering of the economic system. The standard explanation of the 2007 economic crisis is that banks behaved badly and governments failed to regulate. But policies of tighter bank regulation, quantitative easing, and austerity failed, and proved counter-productive. This book challenges this orthodox view. From a

careful analysis of long-term economic data, it shows that earned income has inexorably fallen behind economic output, leading to huge increases in consumer debt, causing the crisis. Governments have sought to curtail deficit spending by socially harmful austerity policy. The answer is a universal basic income, funded by debt-free sovereign money, which also funds government social expenditure, always limited by economic output to avoid inflation. This book will appeal to policy makers, academic economists, think tank networks, and everyone who is concerned with the ongoing dysfunctionality of the current economic system.

Geschichte der Stadt Pressburg Theodor Ortway, 1903

Ports of Call Susan Ingram, Markus Reisenleitner, Cornelia Szabo-Knotik, 2003 This volume collects papers put together by an interdisciplinary group of scholars, which explore how the two imaginary geo-cultural spaces «Central Europe» and «(North) America» have mutually attributed meanings to each other over the past two centuries, how traveling images of an «othered» cultural space - inserted into specific regional, national and social contexts and appropriated for negotiations of cultural identity and belonging as well as exclusion and colonization - have laid the basis for a cultural essentialism which thinks culture through space and negotiates cultural status through de-historicized notions of place and territory. It particularly focuses on processes of motion and travel which helped to create these images and discusses in individual case studies a wide variety of cultural phenomena - ranging from music to film, from tourism to world fairs - while sharing the common concern to explore how motion through space - whether physical or imaginary - helped shape, crystallize and negotiate images of the cultural other in contact or transit zones where people, images and cultures meet in asymmetrical relations of domination and subordination, and where tourists, exiles, travelers, displaced commodities and foreign cultural practices generate powerful, as well as potentially subversive, visions and imaginings. Thus this volume invites to find individual paths and ports in/between the subjects presented and in a way to contribute to, to follow up the web of exchange represented by its authors, themselves a (mostly) virtual community of researchers.
