The Alchemy of Growth Mehrdad Baghai,Steve Coley,David White,2000-06-30 Growth unleashes benefits beyond the economic. It revitalizes organizations and invigorates the people in them, creating energy, a sense of purpose, and the glow of being on a winning team. Like the alchemy of old, it seeks to transform the everyday into the exalted by means that seem little short of magical. Yet growth is often elusive, achieved at unacceptable costs, or managed in fits and starts. Based on over three years of research and application at high-performing companies around the world, *The Alchemy of Growth* is a comprehensive, practical approach to initiating, achieving, and sustaining profitable growth—today and tomorrow. As the book shows, the secret is to manage business opportunities across three time horizons at once: extending and defending core businesses, building new businesses, and seeding options for the future. *The Alchemy of Growth* offers managers at all levels the tools and concepts for investing in the right initiatives, capabilities, and talent to propel their companies into the future.

**Price-Forecasting Models for Horizon Technology Finance Corporation HRZN Stock** Ton Viet Ta,2020-08-22 Do you want to earn up to a 1753% annual return on your money by two trades per day on Horizon Technology Finance Corporation HRZN Stock? Reading this book is the only way to have a specific strategy. This book offers you a chance to trade HRZN Stock at predicted prices. Eight methods for buying and selling HRZN Stock at predicted low/high prices are introduced. These prices are very close to the lowest and highest prices of the stock in a day. All methods are explained in a very easy-to-understand way by using many examples, formulas, figures, and tables. The BIG DATA of the 2470 consecutive trading days (from October 29, 2010 to August 21, 2020) are utilized. The methods do not require any background on mathematics from readers. Furthermore, they are easy to use. Each takes you no more than 30 seconds for calculation to obtain a specific predicted price. The methods are not transient. They cannot be beaten by Mr. Market in several years, even until the stock doubles its current age. They are traits of Mr. Market. The reason is that the author uses the law of large numbers in the probability theory to construct them. In other words, you can use the methods in a long time without worrying about their change. The efficiency of the methods can be checked easily. Just compare the predicted prices with the actual price of the stock while referring to the probabilities of success which are shown clearly in the book (click the LOOK INSIDE button to read more information before buying this book). Depending on the number of investors who are interested in this book, the performance of the methods from the publication date will be added to the book after one year, and will be stated here in the description of the book too. You will then see that the methods in this book are outstanding or not. The book is very useful for Investors who have decided to buy the stock and keep it for a long time (as the strategy of Warren Buffett), or to sell the stock and pay attention to other stocks. The methods will help them to maximize profits for their decision. Day traders who buy and sell the stock many times in a day. Although each method is valid one time per day, the information from the methods will help the traders buy/sell the stock in the second time, third time or more in a day. Beginners to HRZN Stock. The book gives an insight about the behavior of the stock. They will surely gain their knowledge of HRZN Stock after reading the book. Everyone who wants to know about the U.S. stock market.

**Choice of Payoff Horizon and Firm Performance** David Lawrence Souder, 2007 An important managerial challenge is choosing the payoff horizon for strategic investments, since projects with long run benefits have immediate costs that reduce short run profits. My dissertation draws from the behavioral theory of the firm and agency theory to explain differences in payoff horizon choices between firms, based on performance relative to aspirations, incentive compensation, and external market pressure. I also test the intuition that long horizon investments have a positive impact on long run performance. The business model for cable operators during its programming variety phase from 1972-1996 offers a quasi-experimental setting ideally suited for research into these issues. Like public utilities, local cable companies are natural monopolies with single providers in each market. Unlike electricity, heat, or water service, however, there is neither a mandate for universal service nor municipal financing for capital investments. Furthermore, the distribution technology of microwave and, later, satellite eliminate the need for single firms to serve contiguous geographic regions, and the industry's pre-1972 history as a broadcast retransmission service contributed to a particularly disparate pattern of geographic expansion. As a result, cable operators during the research period do not compete with each other for market share among customers, but they do compete over future growth through their choice of investments. These investments have varying payoff horizons. In testing predictions about which firms pursue longer or shorter payoff horizons, I use simultaneous equation techniques. To assess the impact of short- and long-horizon investments on ex post performance, I use dynamic panel modeling that allows the direction and significance of investment choices to be interpreted at different lag lengths. What makes firms choose different payoff horizons? Are longer horizon investments associated with higher eventual performance, as conventional wisdom suggests? The first question is central to understanding firm strategy, while the second is crucial for evaluating that strategy. By addressing both, my dissertation generates corporate governance implications and insight into the value-creation potential of longer payoff horizons. In addition, it analyzes the causes and effects of the wide heterogeneity of firm strategies observed in the partially regulated and monopolistic cable industry--
