**Translation and Localisation in Video Games** Miguel Á. Bernal-Merino, 2014-09-19 This book is a multidisciplinary study of the translation and localisation of video games. It offers a descriptive analysis of the industry – understood as a global phenomenon in entertainment – and aims to explain the norms governing present industry practices, as well as game localisation processes. Additionally, it discusses particular translation issues that are unique to the multichannel nature of video games, in which verbal and nonverbal signs must be cohesively combined with interactivity to achieve maximum playability and immerse players in the game’s virtual world. Although positioned within the theoretical framework of descriptive translation studies, Bernal-Merino incorporates research from audiovisual translation, software localisation, computer assisted translation, comparative literature, and video game production. Moving beyond this framework, Translation and Localisation in Video Games challenges some of the basic tenets of translation studies and proposes changes to established and unsatisfactory processes in the video game and language services industries.

**The Lenovo Affair** Ling Zhijun, 2006-06-23 Lenovo is a global leader in the PC market, employing more than 19,000 people worldwide. Its landmark takeover of IBM’s PC division in May 2005 was a major step for the company and a huge boost for Chinese industry. The deal proved to the world that Chinese companies are not only competitive in the domestic markets but can also compete at a global level. Lenovo was founded in 1984 by 11 engineers working out of a small bungalow in Beijing. Their crisis was to create a company that would offer PCs to the Chinese people at an affordable price. Using the brand name, Legend, it promoted PC usage throughout China and developed the revolutionary Legend Chinese character card that translated English software into Chinese characters. In 1994, Legend was successfully listed on the Hong Kong Stock Exchange and in 2003 rebranded itself as Lenovo. The company went from strength to strength and dominated the Chinese market with more than 25% of market share in 2004. The IBM acquisition has marked another key milestone in the history of the company. Lenovo now has over \$13 billion in annual reserves and possesses necessary infrastructure to develop its markets around the world. The company is a worldwide sponsor of the International Olympic Committee and will offer funding and support to the 2006 Winter Games in Torino and the 2008 Summer Games in Beijing. Author Ling Zhijun is well known in China for his reporting on China’s economic reform, and for his book “Jiao Feng”. This book sold over two million copies in China. The author is a seasoned reporter for the People’s Daily; based in Shanghai. Martha Avery, the translator and editor of this book in English, has translated a number of works of Chinese literature into English that have been published by such presses as Viking Penguin, WW Norton, HarperCollins, Farrar Straus Giroux and David Godine. Her most recent authored book is Tea Road: China and Russia Meet Across the Steppe. This is an economic history of the region and was published by the Intercontinental Press (China) in 2004. **COVID and Emerging Infectious Diseases** William Tolbert, Neelakshi Gohain, 2024-02-13 Over the last two years with the strain of coronavirus having a devastating effect on the world’s healthcare system and triggering a global lockdown, one question that has emerged; What, or which infectious disease is going to hit us next? Many infectious diseases prevalent in humans and animals are caused by pathogens that once emerged from other animal hosts. In addition to these established or re-emerging infections, new infectious diseases periodically emerge. In extreme cases they may lead to pandemics as we currently are seeing. The increased urbanization and globalization of the world order with faster connectivity and traveling has further increased the risk factors for emerging infections. Despite this, enormous progress has been made in the field of infectious disease in the last few decades. The number of deaths and severe infections because of diseases like Malaria, HIV, Ebola, Dengue, Yellow fever virus (YFV), Zika etc. have been significantly reduced and diseases like Polio are on the brink of eradication. In particular, the emergence of the devastating SARS-CoV-2 pandemic has revolutionized the field in an unprecedented way. A myriad of vaccine platforms and highly potent therapeutic approaches have been developed by government, industry, academic, and non-governmental organizations. However, the rapid and unparalleled spread of SARS-CoV-2 and its variants, and the amount of toll that it has caused to the public health and global economy also underscores the urgent need to develop broadly cross-reactive, rapidly deployable, and scalable therapeutic platforms. Development of these novel therapeutic modalities also requires a strong emphasis on the functional and mechanistic understanding of how molecular components in a biological process related to emerging infectious diseases work together. Onset of the out-breaks of

recent decades including but not limited to SARS-CoV-1, MERS, Ebola virus, Zika virus, Nipah virus, Yellow fever virus, Lassa virus and the ongoing ever devastating SARS-CoV-2 pandemic also highlight the urgent need to devise a future proof pandemic preparedness strategy and the demand for a fast and early response.

**Systems, Software and Services Process Improvement** Andreas Riel, Rory O'Connor, Serge Tichkiewitch, Richard Messnarz, 2010-09-02 A typical characterization of EuroSPI is reflected in a statement made by a company: ". . . the biggest value of EuroSPI lies in its function as a European knowledge and experience exchange mechanism for SPI and innovation. " Since its beginning in 1994 in Dublin, the EuroSPI initiative has outlined that there is not a single silver bullet to solve SPI issues, but that you need to understand a combination of different SPI methods and approaches to achieve concrete benefits. Therefore each proceedings volume covers a variety of different topics, and at the conference we discuss potential synergies and the combined use of such methods and approaches. These proceedings contain selected research papers for five topics: Section I: SPI Tools Section II: SPI Methods Section III: SPI in SMEs Section IV: Economic Aspects of SPI Section V: The Future of SPI Section I presents studies on SPI tools. The authors provide an insight into new tools which can be used for SPI. Willem Bekkers et al. present a new assessment method and tool for software product management. Ismael Edrei-Espinosa-Curiel et al. illustrate a graphical approach to support the teaching of SPI.
