**Marketing Scheme on Peer-to-Peer (P2P) Communication Software Anticipating 4G** Steffen Dubiel,2004-11-04 Inhaltsangabe:Abstract: This diploma thesis paper is, after contemplating the current state of ITC / telco's shift towards commoditisation and challenges in facing the upcoming overall mobile / wireless development (beyond 3G, B3G, / 4G) aimed at prosperously resolving a marketing proposition on a quite ingenious Siemens mobile P2P communication solution, named Siemens Anyw@re PocketSERVent, by virtue of the marketers' generic means, the Product-marketing mix dedicated to fundamental questions of product, price, promotion, place (P4). Strategic marketing and ITC business as well as down-to-earth / operational themes will get propelled. The chief emphasis is put on surging virtualisation related to product / svce / property and, as usually less exposed, the shift towards intangible values, foremost customer relationship and momentum of the hi-tech. brand (perception). The intend is to supply a big yet detailed P2P, 3G / B3G and wireless picture to the marketer (even accountant) as well as applied marketing / pricing issues to the S/W developer or mobile techn. expert. After a brief overview (ch. 1), chapter 2 is about introducing the main points rel. peer-to-peer (P2P) it's rather social impacts, technological mindset and ongoing research, as well as contemporary benefits. The intention is to free both the subject and evaluation from hype or byzantine aspects; to present P2P's potential as well as existent contributions to corporations aware of bus. value from IT, paralleling the fashion well-known IT players dominate e.g. Web services. Chapter 3 prepares a general understanding of present-day and forthcoming ITC leitmotivs, more precisely, for why ITC, esp. 3G innovations, have been disappointing. Analysing soft product and service (svce / svc.) innovations is upon hard value; at the dawn of this decade's decentralisation / mobilisation and virtualisation following results and side effects of globalisation the tractate's author is going to constantly question whether proven and established marketing practice can answer the train of virtual i.e. through-and-through digital products, value chains, organisations or business and / or value creation communities. Nevertheless ch. 3's focal point is the wireless or mobile wireless, resp., upgrowth (convergence rel. mobile IP, P2P, B3G / 4G). At beginning of the new millennium telcos are forced to get out of the industrial age's proprietary hardware and services. Less because of customer's [...]

**The Future of Digital Data, Heritage and Curation** Fiona R. Cameron,2021-03-30 The Future of Digital Data, Heritage and Curation critiques digital cultural heritage concepts and their application to data, developing new theories, curatorial practices and a more-than-human museology for a contemporary and future world. Presenting a diverse range of case examples from around the globe, Cameron offers a critical and philosophical reflection on the ways in which digital cultural heritage is currently framed as societal data worth passing on to future generations in two distinct forms: digitally born and digitizations. Demonstrating that most perceptions of digital cultural heritage are distinctly western in nature, the book also examines the complicity of such heritage in climate change, and environmental destruction and injustice. Going further still, the book theorizes the future of digital data, heritage, curation and the notion of the human in the context of the profusion of new types of societal data and production processes driven by the intensification of data economies and through the emergence of new technologies. In so doing, the book makes a case for the development of new types of heritage that comprise AI, automated systems, biological entities, infrastructures, minerals and chemicals – all of which have their own forms of agency, intelligence and cognition. The Future of Digital Data, Heritage and Curation is essential reading for academics and students engaged in the study of museums, archives, libraries, galleries, archaeology, cultural heritage management, information management, curatorial studies and digital humanities.

**A Defense for the Chronological Order of Luke's Gospel** Benjamin Wing Wo Fung,2019-01-09 For decades scholars have reached no consensus on the writing order of Luke's gospel. The author, through a thorough study of the word "orderly" in Luke 1:3; a comparison of Luke's writing methodologies with those of the Greco-Roman historians; and a detailed investigation of the differences in the narrative accounts among the Synoptic Gospels, concludes that Luke writes in chronological order. The author

also explains how Luke has employed writing methodologies commonly used by Greco-Roman historians to write the prefaces in Luke-Acts and divide the Gospel into sections, and the implications of these writing methodologies on Luke’s writing order. He explicates the possible reasons behind the differences in the writing style between the “travel” section (9:52b to 19:44) and the rest of the Gospel, proposes the central theme of Luke-Acts, and assesses the possible implications for accepting Luke’s chronological writing order on biblical studies.
