Hawthorne Works Dennis Schlagheck and Catherine Lantz,2014 Discover the maufacturing plant that typifies the era when American industrial giants dominated the global economy and generations of blue-collar workers strived for a fair share of the American Dream. A burgeoning town on the fringes of Chicago rose and fell with the successes of the Western Electric Company. For almost 90 years, the Hawthorne Works plant employed, educated, entertained, and defined the township of Cicero. As the manufacturing arm of Western Electric, Hawthorne contributed greatly to the prosperity and national defense of the United States. As the site of the controversial Hawthorne Studies of workplace motivation and behavior, the plant reconfigured business and social science models. A community within a community, Hawthorne had its own sports teams, social clubs, hospital, railroad yards, and savings and loan. At its peak, the works was the largest single-site employer in Illinois and one of the biggest manufacturing establishments in the country, second only to the Ford plant in Detroit.

Autopsy of a Crime Lab Brandon L. Garrett,2022-03 This book exposes the dangerously imperfect forensic evidence that we rely on for criminal convictions. That's not my fingerprint, your honor, said the defendant, after FBI experts reported a 100-percent identification. The FBI was wrong. It is shocking how often they are. Autopsy of a Crime Lab is the first book to catalog the sources of error and the faulty science behind a range of well-known forensic evidence, from fingerprints and firearms to forensic algorithms. In this devastating forensic takedown, noted legal expert Brandon L. Garrett poses the questions that should be asked in courtrooms every day: Where are the studies that validate the basic premises of widely accepted techniques such as fingerprinting? How can experts testify with 100-percent certainty about a fingerprint, when there is no such thing as a 100 percent match? Where is the quality control at the crime scenes and in the laboratories? Should we so readily adopt powerful new technologies like facial recognition software and rapid DNA machines? And why have judges been so reluctant to consider the weaknesses of so many long-accepted methods? Taking us into the lives of the wrongfully convicted or nearly convicted, into crime labs rocked by scandal, and onto the front lines of promising reform efforts driven by professionals and researchers alike, Autopsy of a Crime Lab illustrates the persistence and perniciousness of shaky science and its well-meaning practitioners.
