Low Temperature Molecular Spectroscopy Rui Fausto, 2013-11-11 Molecular spectroscopy has achieved rapid and significant progress in recent years, the low temperature techniques in particular having proved very useful for the study of reactive species, phase transitions, molecular clusters and crystals, superconductors and semiconductors, biochemical systems, astrophysical problems, etc. The widening range of applications has been accompanied by significant improvements in experimental methods, and low temperature molecular spectroscopy has been revealed as the best technique, in many cases, to establish the connection between experiment and theoretical calculations. This, in turn, has led to a rapidly increasing ability to predict molecular spectroscopic properties. The combination of an advanced tutorial standpoint with an emphasis on recent advances and new perspectives in both experimental and theoretical molecular spectroscopy contained in this book offers the reader insight into a wide range of techniques, particular emphasis being given to supersonic jet and matrix isolation techniques, spectroscopy in cryogenic solutions (including liquid noble gases), and in both crystalline and amorphous states. Suitable quantum chemical methods are also considered, as are empirically based force field methods for calculating spectra of large molecular systems. The wide range of topics covered includes: molecular dynamics and reactivity, time-resolved and high-resolution spectroscopy, conformational analysis, hydrogen bonding and solvent effects, structure and dynamics of weakly bound complexes, transition metal and organic photochemistry, spectroscopy of excited states, ab initio prediction of molecular spectra, and biochemical and astrophysical applications.

## Heavy-Duty Wheeled Vehicles Boris Nikolaevich

Belousov, Sergey D Popov, 2014-01-27 Heavy-duty wheeled vehicles (HDWVs) are all-wheel-drive vehicles that carry 25 tons or more and have three or more axles. They transport heavy, bulky cargo such as raw minerals, timber, construction materials, pre-fabricated modules, weapons, combat vehicles, and more. HDWVs are used in a variety of industries (mining, logging, construction, energy) and are critical to a country's economy and defense. These vehicles have unique development requirements due to their high loads, huge dimensions, and specific operating conditions. Hauling efficiencies can be improved by increasing vehicle load capacity; however capacities are influenced by legislation, road limits, and design. Designing HDWVs differs from other multi-purpose all-wheel-drive vehicles. The chassis must be custom-designed to suit the customer's particular purpose. The number of axles is another variable, as well as which ones are driving and which are driven. Tires are also customizable. Translated by SAE from Russian, this book narrates the history of HDWVs and presents the theory and calculations required to design them. It summarizes results of the authors' academic research and experience and presents innovative technical solutions used for electric and hydrostatic transmissions, steering systems, and active safety of these vehicles. The book consists of three parts. Part one covers HDWV design history and general design methods, including basic vehicle design, and evaluating HDWV use conditions. Part one also covers general operation requirements and consumer needs, and a brief analysis of structural components of existing HDWVs and prototypes. Part two outlines information needs for designing HDWVs. Part three reviews basic theory and calculation of innovative technical solutions, as well as special

requirements for component parts. This comprehensive title provides the following information about HDWVs: • History of design and manufacture. • Manufacturers' summary design data. • Background data on sample vehicles. • Component calculation examples. • Overview of motion theory, which is useful in design and placement of bulky cargo.

**Big Green Purse** Diane Maceachern,2008-02-28 Read Diane McEachern's posts on the Penguin Blog. Protecting our environment is one of the biggest issues facing our planet today. But how do we solve a problem that can seem overwhelming-even hopeless? As Diane MacEachern argues in *Big Green Purse*, the best way to fight the industries that pollute the planet, thereby changing the marketplace forever, is to mobilize the most powerful consumer force in the world-women. MacEachern's message is simple but revolutionary. If women harness the power of their purse and intentionally shift their spending money to commodities that have the greatest environmental benefit, they can create a cleaner, greener world. Spirited and informative, this book: - targets twenty commodities-cars, cosmetics, coffee, food, paper products, appliances, cleansers, and more-where women's dollars can make a dramatic difference; - provides easy-to-follow guidelines and lists so women can choose the greenest option regardless of what they're buying, along with recommended companies they should support; - encourages women to spend wisely by explaining what's worth the premium price some green products cost, what's not, and when they shouldn't spend money at all; and - differentiates between products that are actually green and those that are simply marketed as ecofriendly. Whether readers want to start with small changes or are ready to

devote the majority of their budget to green products, MacEachern offers concrete and immediate ways that women can take action and make a difference. Empowering and enlightening, Big Green Purse will become the green shopping bible for women everywhere who are asking, What can I do?

Split Intransitivity in Italian Delia Bentley, 2011-07-13

Split intransitivity has received a great deal of attention in theoretical linguistics since the formulation of the Unaccusative Hypothesis by David Perlmutter (1978). This book provides an in-depth investigation of split intransitivity as it occurs in Italian. The principal proposal is that the manifestations of split intransitivity in Italian, whilst being variously constrained by well-formedness conditions on the encoding of information structure, primarily derive from the tension between accusative (syntactic) and active (semantic) alignment. In contrast to approaches which consider the selection of the perfective operator to be the primary diagnostic of unaccusative or unergative syntax, this study identifies two morphosemantic domains in intransitive constructions on the basis of the analysis of a cluster of related phenomena (including agreement, argument suppression, ne-cliticization, past-participle behaviour, the morphosyntax of experiencer predicates and word order, as well as the selection of the perfective operator). Analysing the degree to which semantic, syntactic and discourse factors interact in determining each manifestation of split intransitivity, this work captures successfully the mismatches in the scope of the various diagnostics. Drawing upon insights provided by Role and Reference Grammar, and relying on

corpus-based evidence and crossdialectal comparison, this study makes new empirical and theoretical contributions to the debate on split intransitivity. The book is accessible to linguists of all theoretical persuasions and will make stimulating reading for researchers and scholars in Italian and Romance linguistics, typology and theoretical linguistics.

**Mexico** Daniel Levy, 2019-03-06 In the four years since the first edition was published, Mexico's political system—exceptional among Latin American nations—has been severely tested. The administration has been struggling to cope with the effects of a depressed market for oil, the demands of an increasingly vocal opposition, and the foreign policy challenges posed by violence in Central America. In this timely second edition of a work that has received favorable attention in the United States and in Mexico, the authors extend their analysis of Mexico's current and future prospects to cover the dramatic developments of the past few years. Throughout, the authors have updated their discussion to assess the social and political impact of the latest elections, the recent earthquakes, and the continuing cycle of economic crisis, recovery, and renewed crisis. They also pay special attention to Mexico's initiatives for peace in Central America and to recent shifts in Mexican-U.S. relations. Appropriate for courses in Mexican studies, Latin American politics, and Third World development, this text also will be of value to anyone interested in Mexico's political and economic affairs.

*A grammar of Komnzo* Christian Döhler, Komnzo is a Papuan language of Southern New Guinea spoken by around 250 people in the village of Rouku. Komnzo belongs to the Tonda subgroup of the Yam language family, which is also known as the Morehead Upper-Maró group. This

grammar provides the first comprehensive description of a Yam language. It is based on 16 months of fieldwork. The primary source of data is a text corpus of around 12 hours recorded and transcribed between 2010 and 2015. Komnzo provides many fields of future research, but the most interesting aspect of its structure lies in the verb morphology, to which the two largest chapters of the grammar are dedicated. Komnzo verbs may index up to two arguments showing agreement in person, number and gender. Verbs encode 18 TAM categories, valency, directionality and deictic status. Morphological complexity lies not only in the amount of categories that verbs may express, but also in the way these are encoded. Komnzo verbs exhibit what may be called ‘distributed exponence’, i.e. single morphemes are underspecified for a particular grammatical category. Therefore, morphological material from different sites has to be integrated first, and only after this integration can one arrive at a particular grammatical category. The descriptive approach in this grammar is theory-informed rather than theory-driven. Comparison to other Yam languages and diachronic developments are taken into account whenever it seems helpful.

The Middle Voice in Baltic Axel Holvoet,2020-05-15

The fifth volume in the VARGReB series is a monograph presenting a collection of studies on middle-voice grams in Baltic, that is, on a widely ramified family of constructions with different syntactic and semantic properties but sharing a morphological marker of reflexive origin. Though the emphasis is on Baltic, ample attention is given to other languages as well, especially to Slavonic. The book offers

many new insights into questions of syntactic and semantic interpretation, correct demarcation and diachronic explanation of middle-voice grams. The relationship between reflexive and middle, the workings of metonymy, changes in syntactic structure and lexical input as factors determining diachronic shifts within the middle-voice domain and transitions from one middle-voice gram to another – these are among the topics discussed in the book, which, beyond its relevance to Baltic and Slavonic scholarship, is also a contribution to the typology of the middle voice.

**Perspective** Thomas Stolz, Julia Nintemann, 2023-12-04 For the first time place names are made the topic of a cross-linguistic account of morphosyntactic properties which formally distinguish place names from personal names and common nouns. It is shown that the behavior of place names in morphology and syntax frequently disagrees with the rules established for other word classes independent of the language's genetic affiliation, grammatical structure, and geographic location. Place names boast a grammar of their own. They are candidates for the status of a distinct word class. The special grammar of place names comes frequently to the fore in the domain of spatial relations. This fact is explained with reference to functional notions.
