Reconfiguring Global Health Innovation Padmashree Gehl Sampath, 2010-10-20 Reconfiguring Global Health Innovation presents the findings of multi-year research, contrasting experiences of different latecomer countries in building health innovation systems to cater to local needs. It analyses the emerging industrial structures in health innovation as more and more latecomer countries are foraying into what is a highly difficult and technologically intensive sector, with the aim of finding ways and means to balance these promising developments with public health needs worldwide. The book presents empirical findings from six countries across Asia and Africa on health innovation, namely, India, Bangladesh, Vietnam, Kenya, Tanzania and Nigeria. The book concludes that the growth of knowledge and the accumulation of capabilities influence the ability of a country to generate wealth.

The Aquila Trials Kruti Shah,2020-08-04 The monetization of medicine is merely in its cradle. - Ronit Arora, CEO, Meridian Labs In Frankfurt, an affluent heir faces his nemesis ten years after a miraculous cure. In Kolkata, an eminent NGO doctors the health records of unwitting sex workers. In cyberspace, an invisible army distorts consumers' reality. And in Mumbai, biotechnologist Shubhra Sen connects the dots through 'The Aquila Trials.' In the maze of a clinical trial gone awry, Shubhra is set against an opponent who will stop at nothing to rise to the echelons of the Global Billionaire CEO Club. A kaleidoscopic perspective on pharmaocracy lays bare the commercialization, politicization, and ritualization of medicine. Pitting the strategies of Chanakya against those of Sun Tzu, communications specialist Kruti Shah unfolds a story of Big Pharma greed, corporate arm-twisting, and thrill.

Accelerating access to hepatitis C diagnostics and treatment ,2021-01-26 WHO approved more hepatitis direct-acting antivirals (DAAs) for the treatment of infection with the hepatitis C virus (HCV) by 2020 which helped low- and middle-

income countries increase the number of registered treatments, reduce prices of a full treatment under US\$100 – update is as low as \$60 for three months, and strive towards hepatitis C elimination. For the first time, this year's report includes information on hepatitis C diagnostics. With a focus on selected countries with diverse HCV epidemics, the report provides updates on the various dimensions of access to HCV diagnostics and pharmaceutical products, including product pricing, the regulatory environment and patent status, which together shape the national hepatitis response in different settings. It highlights key areas for action by ministries of health and other government decision-makers, pharmaceutical manufacturers and technical partners. Globally, at the end of 2017, only 5 million – or 7% – of the 71 (62–79) million people chronically infected with HCV had cumulatively received treatment with DAAs. As countries continue to tackle the disease burden and service disruptions caused by the COVID-19 pandemic, it is critical to ensure that the recent momentum and gains in the response to hepatitis C are not lost. Against this backdrop, this report is a strong reminder to continue to invest in building resilient and sustainable health systems that are focused on universal health coverage.

Moving Mountains Anne-Christine D'Adesky, 2006-07-17 In this work, Anne-Christine D'Adesky, an award-winning reporter, offers a global analysis of AIDS treatment and prevention, in countries from South Africa to China.

(Hetero)sexual Politics Mary Maynard, June Purvis, 1995 Sexuality and sexual politics have been much debated over the last 20 years. Feminists, in particular, have been responsible for politicising the debate: pointing out how something that is usually regarded as private and personal is, in fact, a public and political issue. The very title of this book signals the debt owed by feminists to Kate Millett whose pioneering work in the field was first published in 1969. The arguments and debates have moved on since then, and, heterosexuality in particular can no longer be

taken for granted and must, along with other forms of sexuality, be explicitly addressed. Discussing sexuality in a diverse range of contexts, from hetero-sensibilities on the Oprah Winfrey show to Women Warriors in the Gulf war, (Hetero)sexual Politics illustrates the diversity and excitement of debates about sexuality in Women's Studies and feminism today, and points to new paths for feminist analysis, thinking and action.
