Intercultural Interactions in Business and Management Rita Salvi, Hiromasa Tanaka, 2011 Given the consolidated position of English as the international language for communication in business and management, this book depicts a wide scenario in which to analyse and compare interactions between eastern/western European users of English, as well as Asian/European/North American speakers. From each chapter, different sociolinguistic realities emerge. They affect English, as used largely by non-native speakers, but also the relationship between local or national cultures and the global professional discourse community. In this context not only the specialized lexis is analysed, but rather the ways in which different geo-political cultures construe, manifest and establish their identities. Although it is difficult to classify pragmatic usages of language, the six chapters in the first section deal with language and culture following a genre-based approach, whereas the six chapters of the second section specifically consider corporate identity in intercultural interactions. This volume, which aims to avoid stereotypes and promote mutual understanding, is the offspring of a two-day seminar as part of the 10th ESSE (European Society for the Study of English) Conference, held in Turin, August 2010.

Discourse Perspectives on Organizational Communication Jolanta Artiz, Robyn C. Walker, 2011-10-16 Discourse Perspectives in Organizational Communication brings together researchers from the social sciences and humanities to look at discourse and how it shapes organizations and their social actors. Unlike others in the field, this book assumes that language creates and constitutes reality, rather than simply mirroring or describing it. This collection illustrates the variety of organizational phenomena that might be studied and the range of epistemological and methodological approaches that might be used in discourse analysis techniques.

Trust and Discourse Katja Pelsmaekers, Geert Jacobs, Craig Rollo, 2014-07-15 Trust and Discourse: Organizational perspectives offers a timely collection of new articles on the relationship between discursive practices in organizational or institutional contexts and the psychological/moral category of trust. As globalization, the drive for efficiency and accountability, and increased time pressure lead groups and individuals to rethink the way they communicate, it is becoming more and more important to investigate how these streamlined and impersonal forms of communication affect issues of responsibility, authenticity and – ultimately – trust. The book deals with a variety of organizational settings ranging from in-hospital bedside teaching encounters and government communication following a nuclear accident to job interviews and foreign news reporting. This comprehensive study of an emerging new field will provide essential reading for linguists, discourse analysts, communication scholars, and other social scientists interested in a range of perspectives on oral, written and digital language use in society, including interactional sociolinguistics, Critical Discourse Analysis, ethnography, multimodality and organizational studies.

Critical Qualitative Research in Second Language Studies Kathryn A. Davis, 2011-03-01 This volume begins by locating critical inquiry within the epistemological and methodological history of second language study. Subsequent chapters portray researcher-participant exploration of identity and agency while challenging inequitable policies and practices. Research on internationalization, Englishization, and/or transborder migration address language policies and knowledge production at universities in Hong Kong, Standard English and Singlish controversies in Singapore, media portrayals of the English as an Official

Language movement in South Korea, transnational advocacy in Japan, and Nicaraguan/Costa Rican South to South migration. Transnational locations of identity and agency are fore-fronted in narrative descriptions of Korean heritage language learners, a discursive journey from East Timor to Hawaii, and a reclaimed life history by a Chinese peasant woman. Labor union and GLBT legal work illustrate discourses that can hinder or facilitate agency and change. Hawaiian educators advocate for indigenous self-determination through revealing the political and social meanings of research. California educators describe struggles at the front-lines of resistance to policies and practices harmful to marginalized children. A Participatory Action Research (PAR) project portrays how Latina youth in the U.S. “resist wounding inscriptions” of the intersecting emotional and physical violence of homes, communities, and anti-immigrant policies and attitudes. Promoting agency through drawing on diversity resources is modeled in a bilingual undergraduate PAR project. The volume as a whole provides a model for critical research that explores the multifaceted and evolving nature of language identities while placing those traditionally known as participants at the center of agency and advocacy.

Plasma Medical Science Shinya Toyokuni, Yuzuru Ikehara, Fumitaka Kikkawa, Masaru Hori, 2018-07-06 *Plasma Medical Science* describes the progress that has been made in the field over the past five years, illustrating what readers must know to be successful. As non-thermal, atmospheric pressure plasma has been applied for a wide variety of medical fields, including wound healing, blood coagulation, and cancer therapy, this book is a timely resource on the topics discussed. Provides a dedicated reference for this emerging topic Discusses the state-of-the-art developments in plasma technology Introduces topics of plasma biophysics and biochemistry that are required to understand the application of the technology for plasma medicine Brings together diverse experience in this field in one reference text Provides a roadmap for future developments in the area

International Management and Language Susanne Tietze, 2013-01-11 Globalization processes have resulted in the emergence of business and management networks in which the sharing of knowledge is of crucial importance. Combining two contemporary and important subject areas – namely that of international management and also language and communication in multi-language contexts – the author of this book presents a wealth of ideas, examples and applications taken from international and global contexts, which show that ‘language matters’ in the pursuit of international business affairs. The book establishes the theoretical core of its main ideas by introducing two orientations (social construction and linguistic relativity) and demonstrates how they can be drawn on to frame and understand the activities of managers. Highly innovative and topical, Susanne Tietze’s book will appeal to students of international management and international human resource management as well as those studying intercultural communication. It is also useful for managers and practitioners who work internationally.

The Gaze of the West and Framings of the East S. Nair-Venugopal, 2012-05-09 This volume explores Western attitudes towards the phenomenon of Easternization, drawing upon Eastern perspectives and examining the impact upon contemporary culture to argue that Easternization is another type of globalization.

The Routledge Handbook of Pronouns Laura L. Paterson, 2023-12-07 This original volume provides the first state-of-the-art overview of research on pronouns in the 21st century. With its dedicated sections on grammar, history, and change, language learning/acquisition, cognition and comprehension, power, politics, and identity, *The Routledge Handbook of Pronouns* shows that contemporary interest in pronouns and gender represents just the tip of the iceberg.

Led by Laura Paterson, a transdisciplinary collection of experts discuss the global history of different pronoun systems, synthesize the literature, and contextualize the salient issues and current debates shaping research on pronouns across different spheres and via different theoretical-methodological traditions. The Handbook is designed to encourage readers to engage with a range of perspectives from within and beyond their immediate areas of interest, with the ultimate aim of shaping the future trajectory of interdisciplinary, multi-lingual research on pronouns. Using data from multiple languages and engaging deeply with the social, cultural, political, technological, and psychological factors that can influence pronoun use, this innovative book will be an indispensable resource to scholars and advanced students of theoretical and applied linguistics, education, and the social and behavioural sciences.

Good Data in Business and Professional Discourse Research and Teaching Geert Jacobs, Sofie Decock, 2021-01-27 This edited book engages with the richly interdisciplinary field of business and professional communication, aiming to reconcile the prescriptive ambitions of the US-centred business communication tradition with the more descriptive approach favoured in discourse studies and applied linguistics. A follow-up to the award-winning book *The Ins and Outs of Business and Professional Discourse Research* (Palgrave Macmillan, 2016), this volume brings together scholars and their recent work from wide-ranging business and professional settings to engage with the question of what counts as good data. The authors focus on four key themes - authenticity, triangulation, background and relevance - to shine a light on business and professional discourse as essential contextual and intertextual. This book will be of interest to scholars working in applied linguistics, sociolinguistics, and business communication, but also other social scientists interested in a range of perspectives on oral, written and digital language use in workplace settings.

Discourse Perspectives on Organizational Communication Jolanta Aritz, Robyn Walker, 2012 *Discourse Perspectives in Organizational Communication* brings together researchers from the social sciences and humanities to look at discourse and how it shapes organizations and their social actors. Unlike others in the field, this book assumes that language creates and constitutes reality, rather than simply mirroring or describing it. This collection illustrates the variety of organizational phenomena that might be studied and the range of epistemological and methodological approaches that might be used in discourse analysis techniques.

Bearing Steel Technology John M. Beswick, 2002 Just as sushi can be made with any kind of rice, so bearings can be made with any kind of steel, but the discerning can tell the difference, and will not be back for seconds. Here 34 papers from an international symposium in Phoenix look at developments in the process for making steel suitable for b

Plasma Cancer Therapy Michael Keidar, 2020-08-18 This book, written by key researchers in the field, provides a comprehensive analysis and overview of the state of the art of plasma-based cancer therapy. Recent progress in atmospheric plasmas has led to non-thermal or cold atmospheric plasma (CAP) devices with ion temperatures close to room temperature. In contrast to many existing anti-cancer approaches, CAP is a selective anti-cancer modality which has demonstrated significant potential in cancer therapy. Written by a global, cross-disciplinary group of leading researchers, this book covers basic theory, generation, diagnostics, and simulation of cold atmospheric plasma, as well as their clinical application in cancer therapy, immunotherapy, and future outlook, giving a complete picture of the field. It is meant for a broad audience, from students to engineers and scientists, who are interested in the emerging world of plasma medical applications. It presents recent advances, primary challenges, and future directions of this exciting, cutting-edge field.

Comprehensive Clinical Plasma Medicine Hans-Robert Metelmann, Thomas von Woedtke, Klaus-Dieter Weltmann, 2018-05-04 This book presents the state of the art in clinical plasma medicine and outlines translational research strategies. Written by an international group of authors, it is divided into four parts. Part I is a detailed introduction and includes basic and recent research information on plasma sciences, plasma devices and mechanisms of biological plasma effects. Parts II and III provide valuable clinical insights f.e. into the treatment of superficial contaminations, ulcerations, wounds, treatment of cells in cancer, special indications like in heart surgery, dentistry, palliative treatment in head and neck cancer or the use of plasma in hygiene. Part IV offers information on how and where to qualify in plasma medicine and which companies produce and supply medical devices and is thus of particular interest to medical practitioners. This comprehensive book offers a sciences based practical to the clinical use of plasma and includes an extended selection of scientific medical data and translational literature.

Attitude and Stance in Discourse Liliana Ionescu-Ruxăndoiu, Mihaela-Viorica Constantinescu, Gabriela Stoica, Șerban Hartular, 2022-01-27 Stancetaking is inherent in verbal communication, as it is connected with the expression of subjectivity and the construction of intersubjectivity in discourse. This book presents theoretical findings in this field and their practical implications, exploring the variations in time and space of meaning negotiation processes in a large variety of communicative forms, including political and judicial discourse, journalism, fiction, private letters, informal conversations, and school debates. Some articles refer to events with a strong impact on social and political life, such as the COVID-19 pandemic or Ceaușescu's trial. The volume's approach is mainly pragma-rhetoric and interactional, but also interdisciplinary, promoting dialogue between stance researchers in different fields. There is a specific focus on possible applications of some key findings of stance research in improving inter-ethnic communication and the teaching of foreign languages, as well as students' communicative abilities.

English in Business and Commerce Tamah Sherman, Jiri Nekvapil, 2018-05-07 This volume fills an important gap in exploring English in the domains of business and commerce through the prism of sociolinguistics and the sociology of language, as opposed to analyzing business genres or taking a linguodidactic approach. It expands the regional coverage of English in Europe, with several studies based in Central Europe, and also considers contexts which interact with Europe even though they are physically outside of it (Asia, Africa). It addresses English as just one of several languages at play in the ecology of the countries. It focuses not only on the position of languages as declared in documents of various organizations, that is, language policy, but also everyday linguistic practices as observed in business contexts, that is, interactions. The studies are divided into three thematic areas: ideologies and discourses on English in the business sphere, the management of English in business and organizational contexts, and English and other languages on local and international labor markets. It will be of interest to readers concerned with multilingualism in the economic sphere and the workplace and the interplay between macro and micro levels during the management of communication in organizations.

Insect Timing: Circadian Rhythmicity to Seasonality D.L. Denlinger, J. Giebultowicz, D.S. Saunders, 2001-06-19 Leading experts in the field bring together diverse aspects of insect timing mechanisms. This work combines three topics that are central to the understanding of biological timing in insects: circadian rhythms, photoperiodism, and diapause. The common theme underlining each of the contributions to this book is an understanding of the timing of events in

the insect life cycle. Most daily activities (emergence, feeding, mating, egg laying, etc.) undertaken by insects occur at precise times each day. Likewise, seasonal events such as the entry into or termination from an overwintering dormancy (diapause) occur at distinct times of the year. This book documents such events and provides an up-to-date interpretation of the molecular and physiological events undergirding these activities. The study of circadian rhythms has undergone a flowering in recent years with the molecular dissection of the components of the circadian clock. Now that many of the clock genes have been identified it is possible to track daily patterns of clock-related mRNAs and proteins to link the entraining light cycles with molecular oscillations within the cell. Insect experiments have led the way in demonstrating that the concept of a master clock can no longer be used to explain the temporal organization within an animal. Insects have a multitude of cellular clocks that can function independently and retain their function under organ culture conditions, and they thus offer a premier system for studying how the hierarchical organization of clocks results in the overall temporal organization of the animal. Photoperiodism, and its most obvious manifestation, diapause, does not yet have the molecular underpinning that has been established for circadian rhythms, but recent studies are beginning to identify genes that appear to be involved in the regulation of diapause. Overall, the book presents the rich diversity of challenges and opportunities provided by insects for the study of timing mechanisms.

Language Life in Japan Patrick Heinrich, Christian Galan, 2010-09-13 Despite its monolingual self-image, Japan is multilingual and growing more so due to indigenous minority language revitalization and as an effect of migration. Besides Japan's autochthonous languages such as the Ainu and Ryukyuan languages, there are more than 75,000 immigrant children in the Japanese public education system alone who came to Japan in the 1980s and who speak more than a hundred different languages. Added to this growing linguistic diversity, the importance of English as the language of international communication in business and science especially is hotly debated. This book analyses how this linguistic diversity, and indeed recognition of this phenomenon, presents a wide range of sociolinguistic challenges and opportunities in fundamental institutions such as schools, in cultural patterns and in social behaviours and attitudes. This topic is an important one as Japan fights to re-establish itself in the new world order and will be of interest to all those who are concerned language change, language versus dialect, the effect of modern technology on language usage, and the way national and social problems are always reflected through the prism of language.
