The Best of the Independent Journals in Rhetoric and Composition 2012 Julia Voss, Beverly

Moss, 2014-11-15 The Best of the Independent Rhetoric and Composition Journals 2012 represents the result of a nationwide conversation—beginning with journal editors, but expanding to teachers, scholars and workers across the discipline of Rhetoric and Composition—to select essays that showcase the innovative and transformative work now being published in the field's independent journals. Representing both print and digital journals in the field, the essays featured here explore issues ranging from classroom practice to writing in global and digital contexts, from writing workshops to community activism. Together, the essays provide readers with a rich understanding of the present and future direction of the field. In addition to the introduction by Julia Voss and Beverly Moss, the anthology features work by the following authors and representing these journals: Jamie White-Farnham (Community Literacy Journal), Noah R. Roderick (Composition Forum), Kate Pantelides and Mariaelena Bartesaghi (Composition Studies), Heidi A. McKee (Computers and Composition), Rex Veeder (Enculturation), Matthew Pavesich (Journal of Basic Writing), Kelly S. Bradbury (The Journal of Teaching Writing), Derek N. Mueller (Kairos), Richard H. Thames (KB Journal), Jeanne Marie Rose (Pedagogy), and Melvette Melvin Davis (Reflections).

The Mobile Mind Shift Ted Schadler, Josh Bernoff, Julie Ask, 2014-06-24 Mobile has reprogrammed your customers' brains. Your customers now turn to their smartphones for everything. What's tomorrow's weather? Is the flight on time? Where's the nearest store, and is this product cheaper there? Whatever the question, the answer is on the

phone. This Pavlovian response is the mobile mind shift — the expectation that I can get what I want, anytime, in my immediate context. Your new battleground for customers is this mobile moment — the instant in which your customer is seeking an answer. If you're there for them, they'll love you; if you're not, you'll lose their business. Both entrepreneurial companies like Dropbox and huge corporations like Nestlé are winning in that mobile moment. Are you? Based on 200 interviews with entrepreneurs and major companies across the globe, *The Mobile Mind Shift* is the first book to explain how you can exploit mobile moments. You'll learn how to:

- Find your customer's most powerful mobile moments with a mobile moment audit.
- Master the IDEA Cycle, the business discipline for exploiting mobile. Align your business and technology teams in four steps: Identify, Design, Engineer, Analyze.
- Manufacture mobile moments as Krispy Kreme does — it sends a push notification when hot doughnuts are ready near you. Result: 500,000 app downloads, followed by a double-digit increase in same-store sales.
- Turn one-time product sales into ongoing services and engagement, as the Nest thermostat does. And master new business models, as Philips and Uber do. Find ways to charge more and create indelible customer loyalty.
- Transform your technology into systems of engagement. Engineer your business and technology systems to meet the ever-expanding demands of mobile. It's how Dish Network not only increased the efficiency of its installers but also created new on-the-spot upsell opportunities. Mobile is rapidly shifting your customers into a new way of thinking. You'll need your own mobile mind shift to respond.

A comprehensive synthesis of our knowledge about this biologically diverse state, *Ecosystems of California* covers the state from oceans to mountaintops using multiple lenses: past and present, flora and fauna, aquatic and terrestrial, natural and managed. This book also explores the drivers of California's ecological patterns and the history of the state's various ecosystems, outlining how the challenges of climate change and invasive species and opportunities for regulation and stewardship could

potentially affect the state's ecosystems. The text explicitly incorporates both human impacts and conservation and restoration efforts and shows how ecosystems support human well-being. Edited by two esteemed ecosystem ecologists and with overviews by leading experts on each ecosystem, this definitive work will be indispensable for natural resource management and conservation professionals as well as for undergraduate or graduate students of California's environment and curious naturalists.

Work-Life Balance Janice Arenofsky, 2017-01-16 This powerful resource investigates how a positive work-life balance can help create engaged, productive employees, how imbalances in work-life balance create serious issues for workers, and identifies different ways to greatly improve one's work-life balance. Of the 35 countries in the Organisation for Economic Co-operation and Development (OECD), all except the United States provide nationwide paid maternity leave. This is but one example of how the United States has not made adequate provisions to safeguard the work-life balance of its workforce—to the detriment of the overall economic prosperity of the nation. This insightful book shows how problematic an out-of-balance work-to-life ratio is, gives readers the raw data and information to prioritize their values, and describes tools available for selecting a position that matches an individual's talents and is congruent with her desired work-life balance. Work-Life Balance examines the controversies associated with work-life balance in the modern era and emphasizes how winning the struggle to achieve work-life balance requires buy-in from employees, management, and government. Readers will appreciate how optimizing their work-life balance may incorporate employee assistance programs, flextime, improved time management skills, technology-enabled tools, and community programs. The author explains how choosing an appropriate occupation is the first step toward having a positive work-life balance and avoiding the twin scourges of depression and job dissatisfaction. Comparisons between typical benefits in the United States with those in other countries provide data that can be used to advocate and

negotiate for greater flexibility, fairness in gender equality, and better employer-employee relationships.
