Assessing the Performance of Passive Houses in Mediterranean Climate Regions Vincenzo Costanzo, 2020-05-15 This book results from a Special Issue related to the latest progress in the thermodynamics of machines systems and processes since the premonitory work of Carnot. Carnot invented his famous cycle and generalized the efficiency concept for thermo-mechanical engines. Since that time, research progressed from the equilibrium approach to the irreversible situation that represents the general case. This book illustrates the present state-of-the-art advances after one or two centuries of consideration regarding applications and fundamental aspects. The research is moving fast in the direction of economic and environmental aspects. This will probably continue during the coming years. This book mainly highlights the recent focus on the maximum power of engines, as well as the corresponding first law efficiency upper bounds.

Chapter 7: The Valley Between Us: The meta-hodology of racial segregation in Milwaukee, Wisconsin Chapter 8: Modeling Hope: Boundary Objects and Design Patterns in a Heartland Heterotopia Chapter 9: Home buying in Everyday Life: How Emotion and Time Pressure Shape High Stakes Deciders' Information Behavior Chapter 10: In Search of Home: Examining Information Seeking and Sources That Help African Americans Determine Where to Live Chapter 11: Where to Live in Retirement: A Complex Information Problem While the book is partly about the goal-directed activity of individuals who want to buy a house, and the infrastructure that supports that activity, it is also about personal activities that are either not goal directed or are directed at other goals such as deciding in which geographic location to live, personal

Virtual Unrealities Alfred Bester, 2013-05-31 Dazzlement and enchantment are Bester's methods. His stories never stand still a moment. —Damon Knight, author of *Why Do Birds* Alfred Bester took science fiction into hyperdrive, endowing it with a wit, speed, and narrative inventiveness that have inspired two generations of writers. And nowhere is Bester funnier, speedier, or more audacious than in these seventeen short stories—two of them previously unpublished—that have now been brought together in a single volume for the first time. Read about the sweet-natured young man whose phenomenal good luck turns out to be disastrous for the rest of humanity. Find out why tourists are flocking to a hellish little town in a post-nuclear Kansas. Meet a warlock who practices on Park Avenue and whose potions comply with the Pure Food and Drug Act. Make a deal with the Devil—but not without calling your agent. Dazzling, effervescent, sexy, and sardonic, *Virtual Unrealities* is a historic collection from one of science fiction's true pathbreakers. Alfred Bester was one of the handful of writers who invented modern science fiction. —Harry Harrison Alfred Bester (1913-1987) was the author of two of science fiction's seminal works, *The Demolished Man* and *The Stars My Destination*. He also wrote some fast-moving, sizzling short stories that were very highly regarded; many of them are included in the 17 stories showcased in *Virtual Realities*; two were never before published. Highlights include *Disappearing Act*, in which shell-shocked soldiers vanish from their hospital ward; *Hobson's Choice*, in which a statistician uncovers a disturbing population trend in post-nuclear Kansas; *Time Is the Traitor*, wherein powerful business people manipulate their most valuable consultant; and *The Devil Without Glasses*, a conspiracy tale with an X-Files feel. The science fiction

and literary classic Fondly Fahrenheit stars wealthy Vandaleur and his mad android who has an unfortunate habit of turning murderous when the temperature gets too hot... All reet!
